SUMMARY SECTION

Investment Objective

The Fund's investment objective is long-term capital appreciation and income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

| | Class R Shares | Class I Shares |
|---|----------------|----------------|
| Shareholder Fees (fees paid directly from your investment) | None | None |
| Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment) | | |
| Management Fees | 1.00% | 1.00% |
| Distribution and/or Service (12b-1) Fees | 0.25% | None |
| Other Expenses | 0.29% | 0.29% |
| Acquired Fund Fees and Expenses ⁽¹⁾ | 1.40% | 1.40% |
| Total Annual Fund Operating Expenses | 2.94% | 2.69% |

⁽¹⁾ *Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund's financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.*

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in Class R shares and \$100,000 in Class I shares of the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year, and that the Fund's operating expenses remain the same.

Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

| | 1 Year | 3 Years | 5 Years | 10 Years |
|----------------|---------|---------|----------|----------|
| Class R Shares | \$297 | \$909 | \$1,547 | \$3,257 |
| Class I Shares | \$2,721 | \$8,351 | \$14,240 | \$30,178 |

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the Example, affect the Fund's performance. For the fiscal year ended September 30, 2020, the Fund's portfolio turnover rate was 110% of the average value of its portfolio.

Principal Investment Strategies

The Fund's adviser will allocate the Fund's investments among equities, fixed income securities, and cash and cash equivalents. The adviser may allocate to the various asset classes either through the purchase of closed-end investment companies (including business development companies ("BDCs")), exchange-traded funds ("ETFs") and other investment companies (collectively, "Underlying Funds") or through direct investment in the various securities. The adviser considers a number of factors when making these allocations, including fundamental and technical analysis to assess the relative risk and reward potential throughout the financial markets. As a result, the percentages allocated to equities, fixed income securities and cash and cash equivalents will vary. The Fund does not expect to directly invest in securities rated below Baa3 by Moody's Investor Services, Inc. ("Moody's") (securities rated below BBB by S&P Global Ratings ("S&P") and Baa3 by Moody's are commonly referred to as "junk bonds"), although it may invest in Underlying Funds that hold securities rated below Baa3 or that are in default.

To achieve exposure to the asset classes discussed above, the Fund will typically invest more than 50% of its assets in Underlying Funds. The remaining portion of the Fund's assets will be invested in individual equity and fixed income securities and real estate investment trusts ("REITs"), limited partnerships and structured securities, such as collateralized mortgage and debt obligations. REITs are companies that invest in real estate either directly or through mortgage securities. Collateralized mortgage obligations are securities that are backed by a pool of mortgage instruments and collateralized debt obligations are securities backed by a pool of bonds, debt or other assets. The Fund may invest directly in exchange-traded notes ("ETNs"), which are debt securities whose returns are linked to a particular index. The Fund may also invest in structured notes, which are debt securities whose returns are linked to the performance of a single equity security, a basket of equity securities, or an equity index.

The Fund also may invest directly in the equity and debt securities of U.S. corporate issuers, and U.S. government securities. Equity securities purchased by the Fund may include, but are not limited to, common stocks, preferred stocks, convertible securities, and warrants to buy common stocks. Fixed income securities purchased by the Fund may include corporate bonds, U.S. Treasury securities and municipal bonds. In addition, the Fund may invest without limitation in foreign securities, including securities issued in emerging market countries, either directly or by purchasing sponsored or unsponsored American Depositary Receipts ("ADRs"). Un-sponsored ADRs are generally established by banks or brokers and may not share in the benefits or voting rights of sponsored ADRs. The Fund may also invest in Underlying Funds that hold foreign securities or ADRs. The Fund may also seek to realize additional gains or hedge investments by selling a security short. When the Fund engages in a short sale, it sells a security it does not own and, to complete the sale, borrows the same security from a broker or other institution. The Fund may liquidate positions in order to change the Fund's asset allocation or to generate cash to invest in more attractive opportunities, which may result in a larger portion of any net gains being realized as short-term capital gains. In addition, a negative change in the fundamental or qualitative characteristics of the issuer may cause the adviser to sell a security. Finally, the adviser may sell a security when its price approaches, meets or exceeds the adviser's target price.

The Fund may invest in special purpose acquisition companies ("SPACs"). SPACs are collective investment structures that pool funds in order to seek potential acquisition opportunities. SPACs and similar entities may be blank check companies with no operating history or ongoing business other than to seek a potential acquisition. Certain SPACs may seek acquisitions only in limited industries or regions, which may increase the volatility of their prices. Investments in SPACs may be illiquid and/or be subject to restrictions on resale. To the extent the SPAC is invested in cash or similar securities, this may impact the Fund's ability to meet its investment objective.

The Fund may enter into total return swaps. Total return swaps are agreements that provide the Fund with a return based on the performance of an underlying asset (called a “reference asset”), in exchange for fee payments to a counterparty based on a specific rate of return. The difference in the value of these income streams is recorded daily by the Fund, and is settled in cash at the end of each month. The fee paid by the Fund will typically be determined by multiplying the face value of the swap agreement by an agreed upon interest rate. In addition, if the reference asset declines in value over the term of the swap, the Fund would also be required to pay the dollar value of that decline to the counterparty. Total return swaps could result in losses if the reference asset does not perform as anticipated by the adviser. The Fund may use its own net asset value (“NAV”) or the NAV of a similar fund as the reference asset in a total return swap. This strategy serves to reduce “cash drag” (the impact of uninvested cash on the Fund’s overall return) by replacing it with the total return of the Fund’s own, or a similar fund’s investment holdings. The Fund records fluctuations in the value of open swap contracts on a daily basis as unrealized gains or losses.

Principal Risks

All mutual funds carry a certain amount of risk. The Fund’s returns will vary and you could lose money on your investment in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any other government agency. Below is a summary of the principal risks of investing in the Fund. The Fund’s principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

Borrowing Risk. The Fund may borrow amounts up to one-third of the value of its total assets, but it will not borrow more than 5% of the value of its total assets except to satisfy redemption requests or for other temporary purposes. Such borrowings would result in increased expense to the Fund and, while they are outstanding, would magnify increases or decreases in the value of Fund shares. The Fund will not purchase additional portfolio securities while outstanding borrowings exceed 5% of the value of its total assets.

Closed-End Fund Risk. The Fund invests in closed-end investment companies or funds. The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share that is less than the NAV per share, the difference representing the “market discount” of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined NAV, but rather, are subject to supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their NAV.

The Fund may invest in shares of closed-end funds that are trading at a discount to NAV or at a premium to NAV. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the NAV of the Fund’s shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and NAV than an investment in shares of investment companies without a leveraged capital structure.

Convertible Security Risk. The market value of convertible securities and other debt securities tends to fall when prevailing interest rates rise. The value of convertible securities also tends to change whenever the market value of the underlying common or preferred stock fluctuates.

Correlation Risk. Because the Fund allocates its investments among different asset classes, the Fund is subject to correlation risk. Although the prices of equity securities and fixed-income securities, as well as other asset classes, often rise and fall at different times so that a fall in the price of one may be offset by a rise in the price of the other, in down markets the prices of these securities and asset classes can also fall in tandem.

Derivatives Risk. Derivatives risk is the risk that derivatives may pose risks in addition to and greater than those associated with investing directly in securities, currencies and other instruments, may be illiquid or less liquid, more volatile, more difficult to value and leveraged so that small changes in the value of the underlying instrument may produce disproportionate losses to the Fund. Derivatives are also subject to counterparty risk, which is the risk that the other party to the transaction will not perform its contractual obligations. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments.

Emerging Markets Risk. Investment in emerging market securities involves greater risk than that associated with investment in securities of issuers in developed foreign countries. These risks include volatile currency exchange rates, periods of high inflation, increased risk of default, greater social, economic and political uncertainty and instability, less governmental supervision and regulation of securities markets, weaker auditing and financial reporting standards, lack of liquidity in the markets, and the significantly smaller market capitalizations of emerging market issuers.

Equity Risk. To the extent the Fund invests in common stocks, preferred stocks, convertible securities, rights and warrants, it will be exposed to equity risk. Equity markets may experience volatility and the value of equity securities may move in opposite directions from each other and from other equity markets generally. Preferred stocks often behave more like fixed income securities. If interest rates rise, the value of preferred stocks having a fixed dividend rate tends to fall. The value of convertible securities fluctuates with the value of the underlying stock. Convertible stocks can also fluctuate based on the issuer's credit rating or creditworthiness and may be subject to call or redemption by the issuer. Rights and warrants do not necessarily move in parallel with the price of the underlying stock and the market for rights and warrants may be limited. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Exchange-Traded Fund Risk. ETFs may trade at a discount to the aggregate value of the underlying securities and frequent trading of ETFs by the Fund can generate brokerage expenses. ETFs do not sell individual shares directly to investors and only issue their shares in large blocks known as “creation units.” The investor purchasing a creation unit may sell the individual shares on a secondary market. Therefore, the liquidity of ETFs depends on the adequacy of the secondary market. Shareholders of the Fund will indirectly be subject to the fees and expenses of the individual ETFs in which the Fund invests and these fees and expenses are in addition to the fees and expenses that Fund shareholders directly bear in connection with the Fund’s own operations.

Exchange-Traded Note Risk. The Fund may invest in ETNs, which are notes representing unsecured debt of the issuer. ETNs are typically linked to the performance of an index plus a specified rate of interest that could be earned on cash collateral. The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, changes in the applicable interest rates, changes in the issuer’s credit rating and economic, legal, political or geographic events that affect the referenced index. There may be restrictions on the Fund’s right to redeem its investment in an ETN, and there may be limited availability of a secondary market.

Fixed Income Risk. The Fund may invest, directly or indirectly, through Underlying Funds in fixed income securities, including high yield securities, also known as “junk bonds.” Fixed income securities increase or decrease in value based on changes in interest rates. If rates increase, the value of the Fund’s fixed income securities generally declines. On the other hand, if rates fall, the value of the fixed income securities generally increases. Junk bonds are not considered to be investment grade. Junk bonds may provide greater income and opportunity for gain, but entail greater risk of loss of principal. The issuer of a fixed income security may not be able to make interest and principal payments when due. With regard to junk bond issuers, the issuer’s capacity to pay interest and repay principal in accordance with the terms of the obligation may be more at risk. Some of the related risks of fixed income securities include:

- **Credit Risk.** The issuer of a fixed income security may not be able to make interest and principal payments when due. The Fund could also be delayed or hindered in its enforcement of rights against an issuer, guarantor or counterparty.
- **High Yield Securities/Junk Bond Risk.** The Fund may invest in Underlying Funds that invest in high yield securities, also known as “junk bonds.” High yield securities may provide greater income and opportunity for gain, but entail greater risk of loss of principal.
- **Government Risk.** The U.S. government’s guarantee of ultimate payment of principal and timely payment of interest on certain U. S. government securities owned by the Fund does not imply that the Fund’s shares are guaranteed or that the price of the Fund’s shares will not fluctuate. All U.S. government obligations are subject to interest rate risk.
- **Interest Rate Risk.** The Fund’s share price and total return will vary in response to changes in interest rates. If rates increase, the value of the Fund’s investments generally will decline, as will the value of your investment in the Fund. Changing interest rates may have unpredictable effects on the markets and the Fund’s investments. Recent and any future declines in interest rates could cause the Fund’s earnings to fall below the Fund’s expense ratio, resulting in a decline in the Fund’s share price. Securities with longer maturities tend to produce higher yields, but are more sensitive to changes in interest rates and are subject to greater fluctuations in value.

-
- **Sovereign Obligation Risk.** The Underlying Funds may invest in sovereign debt obligations. The issuer of the sovereign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and the Underlying Funds may have limited recourse in the event of a default.

Foreign Investing Risk. Investments in foreign securities may be affected by currency controls and exchange rates, different accounting, auditing, financial reporting, and legal standards and practices, expropriation, changes in tax policy, greater market volatility, differing securities market structures, higher transaction costs, and various administrative difficulties, such as delays in clearing and settling portfolio transactions or in receiving payment of dividends. These risks may be heightened in connection with investments in emerging or developing countries.

High Portfolio Turnover Risk. The Fund's investment strategy may result in high portfolio turnover rates. This may increase the Fund's brokerage commission costs, which would reduce performance. Rapid portfolio turnover also exposes shareholders to a higher current realization of short-term gains which could cause you to pay higher taxes. Annual portfolio turnover greater than 100% is considered to be high.

Investment Style Risk. The Fund is managed by allocating the Fund's assets to Underlying Funds. Underlying Funds charge their own management and operating fees. This may cause the Fund to underperform funds that do not allocate their assets to Underlying Funds.

Large Shareholder Purchase and Redemption Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell its securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large purchases of the Fund's shares may also adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

LIBOR Risk. Many financial instruments may be tied to the London Interbank Offered Rate ("LIBOR") to determine payment obligations, financing terms, hedging strategies, or investment value. LIBOR is the offered rate for short-term Eurodollar deposits between major international banks. On July 27, 2017, the head of the UK Financial Conduct Authority announced a desire to phase out the use of LIBOR by the end of 2021. Regulators and industry working groups have suggested alternative reference rates, but global consensus is lacking and the process for amending existing contracts or instruments to transition away from LIBOR remains unclear. There also remains uncertainty and risk regarding the willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments. As such, the transition away from LIBOR may lead to increased volatility and illiquidity in markets that are tied to LIBOR, reduced values of LIBOR-related investments, and reduced effectiveness of hedging strategies, adversely affecting the Fund's performance or NAV. In addition, the alternative reference rate may be an ineffective substitute resulting in prolonged adverse market conditions for the Fund.

Liquidity Risk. When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities in a timely manner at or near their perceived value. In such a market, the value of such securities and the Fund's share price may fall dramatically, even during periods of declining interest rates. Investments that are illiquid or that trade in lower volumes may be more difficult to value. Investments in foreign securities tend to have greater exposure to liquidity risk than domestic securities. Liquidity risk also may refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period stated in this prospectus because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions, which may adversely affect the Fund's share price.

Management Risk. The adviser's judgments about the attractiveness, value and potential appreciation of a particular asset class or individual security in which the Fund invests may prove to be incorrect and there is no guarantee that the adviser's judgment will produce the desired results.

Market Risk. The value of the Fund's investments may increase or decrease in response to expected, real or perceived economic, political or financial events in the U.S. or global markets. The frequency and magnitude of such changes in value cannot be predicted. Certain securities and other investments held by the Fund may experience increased volatility, illiquidity, or other potentially adverse effects in response to changing market conditions, inflation, changes in interest rates, lack of liquidity in the bond or equity markets, volatility in the equity markets, market disruptions caused by local or regional events such as war, acts of terrorism, the spread of infectious illness (including epidemics and pandemics) or other public health issues, recessions or other events or adverse investor sentiment or other political, regulatory, economic and social developments, and developments that impact specific economic sectors, industries or segments of the market. These risks may be magnified if certain events or developments adversely interrupt the global supply chain; in these and other circumstances, such risks might affect companies worldwide due to increasingly interconnected global economies and financial markets.

Preferred Stock Risk. Preferred stock represents the senior residual interest in the assets of an issuer after meeting all claims, with priority to corporate income and liquidation payments over the issuer's common stock. As such, preferred stock is inherently more risky than the bonds and other debt instruments of the issuer, but less risky than its common stock. There is no assurance that dividends on preferred stocks in which the Fund invests will be declared or otherwise made payable. When interest rates fall below the rate payable on an issue of preferred stock or for other reasons, the issuer may redeem the preferred stock, generally after an initial period of call protection in which the stock is not redeemable. Preferred stocks may be significantly less liquid than many other securities, such as U.S. government securities, corporate debt and common stock.

REIT Risk. The value of equity REITs may be affected by changes in the value and vacancy rate of the underlying property owned by the REITs, while the value of mortgage REITs may be affected by the quality of any credit extended. Investment in REITs involves risks similar to those associated with investing in small capitalization companies, and REITs (especially mortgage REITs) are subject to interest rate risks. Mortgage REITs are also subject to prepayment risk. Because REITs incur expenses like management fees, investments in REITs also add an additional layer of expenses. In addition, REITs could possibly fail to (i) qualify for favorable tax treatment under applicable tax law, or (ii) maintain their exemptions from registration under the Investment Company Act of 1940, as amended (the "1940 Act").

Security Risk. The value of the Fund may decrease in response to the activities and financial prospects of individual securities in the Fund's portfolio.

Short Sale Risk. Positions in shorted securities are speculative and more risky than long positions (purchases) in securities. Short selling will also result in higher transaction costs (such as interest and dividends), and may result in higher taxes, which reduce the Fund's return. Generally the short sales in which the Fund may invest will not be "against the box," meaning the Fund will not own the shorted security, so theoretically the potential loss resulting from short sales is unlimited.

Smaller Company Risk. The Fund, directly or indirectly through Underlying Funds, may invest in smaller capitalization companies (companies with market capitalizations of \$1 billion or less). The earnings and prospects of smaller companies are more volatile than those of larger companies. Smaller companies also may experience higher failure rates than larger companies. In addition, the securities of smaller companies may trade less frequently and in smaller volumes than the securities of larger companies, which may disproportionately affect their market price, tending to make them fall more in response to selling pressure than is the case with larger companies. Finally, smaller companies may have limited markets, product lines or financial resources and may lack management experience.

Special Purpose Acquisition Companies Risks. The Fund may invest in SPACs. Unless and until an acquisition is completed, a SPAC generally invests its assets (less an amount to cover expenses) in U.S. government securities, money market fund securities and cash. SPACs and similar entities may be blank check companies with no operating history or ongoing business other than to seek a potential acquisition. Accordingly, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. Certain SPACs may seek acquisitions only in limited industries or regions, which may increase the volatility of their prices. Investments in SPACs may be illiquid and/or be subject to restrictions on resale. To the extent the SPAC is invested in cash or similar securities, this may impact the Fund's ability to meet its investment objective.

Structured Notes Risk. Structured notes are subject to a number of fixed income risks including general market risk, interest rate risk, and the risk that the issuer on the note may fail to make interest and/or principal payments when due, or may default on its obligations entirely. In addition, as a result of the imbedded derivative features, structured notes generally are subject to more risk than investing in a simple note or bond issued by the same issuer.

Swap Risk. The Fund may invest in total return swap agreements. The degree to which the Fund may invest in these instruments is not limited, although maximum notional amounts are generally set by counterparties. These agreements are considered derivatives. Total return swaps could result in losses if the reference index, security, or investments do not perform as anticipated. The use of swaps may not always be successful; using swaps could lower Fund total return, their prices can be highly volatile, and the potential loss from the use of swaps can exceed the Fund's initial investment in such instruments. Also, the other party to a swap agreement could default on its obligations or refuse to cash out the Fund's investment at a reasonable price, which could turn an expected gain into a loss.

Tax Risk. With respect to federal income taxes, any distributions to shareholders that represent income from taxable securities will generally be taxable as ordinary income, while other distributions, such as capital gains, are taxable to the same extent they would be for any mutual fund. Distributions also are generally subject to state taxes with certain exceptions (e.g. some states may have an exception where a portion of the Fund's income is attributable to municipal securities issued in the state in which you reside). New federal or state governmental action could adversely affect the tax-exempt status of securities held by the Fund, resulting in higher tax liability for shareholders and potentially hurting Fund performance as well.

Underlying Fund Risk. The Fund will incur higher and duplicative expenses, including advisory fees, when it invests in Underlying Funds. There is also the risk that the Fund may suffer losses due to the investment practices of the Underlying Funds (such as the use of derivatives). The Underlying Funds in which the Fund invests that attempt to track an index may not be able to replicate exactly the performance of the indices they track, due to transactions costs and other expenses of the Underlying Funds. The shares of closed-end funds frequently trade at a discount to their NAV. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease, and it is possible that the discount may increase.

Performance

The bar chart below shows how the Fund's Class R Shares' investment results have varied from year to year. The table below shows how the Class R and Class I Shares' average annual total returns compare over time to those of a broad-based securities market index. This information provides some indication of the risks of investing in the Fund. Past performance of the Fund (before and after taxes) is no guarantee of how it will perform in the future. Performance for the Fund is updated monthly and may be obtained online at www.RiverNorth.com or by calling 1-888-848-7569.

Calendar Year Total Returns through December 31, 2020 – Class R Shares

The Fund's 2020 year-to-date total return through December 31, 2020 was 4.55%.

Highest/Lowest quarterly results for Class R Shares during this time period were:

| | | |
|----------------|-------------------|----------|
| Best Quarter: | 2nd Quarter, 2020 | 18.02% |
| Worst Quarter: | 1st Quarter, 2020 | (25.51)% |

Average Annual Total Returns (as of December 31, 2020)

| | 1 Year | 5 Years | 10 Years | Since Inception (December 27, 2006) |
|---|--------|---------|----------|---|
| <i>RiverNorth Core Opportunity Fund – Class R</i> | | | | |
| Return Before Taxes | 4.55% | 9.12% | 7.18% | 7.57% |
| Return After Taxes on Distributions | 2.21% | 5.41% | 4.14% | 5.05% |
| Return After Taxes on Distributions and Sale of Fund Shares | 2.80% | 6.19% | 4.80% | 5.31% |
| | | | | Since Inception (August 11, 2014) |
| <i>RiverNorth Core Opportunity Fund – Class I</i> | | | | |
| Return Before Taxes | 4.82% | 9.39% | N/A | 6.41% |
| S&P 500 Index (reflects no deduction for fees, expenses, or taxes) | 18.40% | 15.22% | 13.88% | 9.42% |
| Blend Index (reflects no deduction for fees, expenses, or taxes) | 14.73% | 11.11% | 10.02% | 7.75% |

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or Individual Retirement Accounts ("IRAs"). If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The S&P 500 Index is the Fund's primary benchmark. The Blend Index is calculated by the adviser and consists of 60% S&P 500 Index and 40% Bloomberg Barclays U.S. Aggregate Bond Index ("Barclays Index"). The Blend Index is representative of a broader market and range of securities than are found in the Fund's portfolio. The 60/40 blend reflects the typical mix of equity and fixed income exposure in the Fund. The 60/40 blend is not subject to change based on the actual investments in the Fund. The S&P 500 Index consists of 500 stocks and is a widely recognized common measure of the performance of the overall U.S. stock market. The Barclays Index measures the performance of investment-grade fixed-rate debt obligations of U.S. and foreign corporations that are taxable, dollar-denominated, non-convertible, publicly traded, and with maturities of at least 1 year. The Barclays Index assumes reinvestment of all distributions.

Portfolio Management

Investment Adviser – RiverNorth Capital Management, LLC

Portfolio Managers

- Patrick W. Galley, CFA®, Co-Portfolio Manager of the Fund and Chief Executive Officer and Chief Investment Officer of RiverNorth Capital Management, LLC. Portfolio Manager of the Fund since its inception in 2006.
- Stephen O'Neill, CFA®, Co-Portfolio Manager of the Fund and Portfolio Manager of RiverNorth Capital Management, LLC. Portfolio Manager of the Fund since 2008.

Buying and Selling Fund Shares

To open an account and make an initial purchase directly with the Fund, you can mail a check (payable to RiverNorth Funds) in the minimum amounts described below along with a completed and signed Account Application. To obtain an Account Application, call 1-888-848-7569 or download one from www.RiverNorth.com.

Minimum Initial Investment for Class R Shares

\$1,000 for IRA accounts

\$5,000 for other types of accounts

Minimum Initial Investment for Class I Shares

\$100,000 for all accounts

Minimum Subsequent Investment for both Class R and Class I Shares

\$100 for all accounts

You may purchase or redeem (sell) shares by (i) writing to the address above, or by telephone at the number above or (ii) through a broker, dealer or other financial intermediary that has entered into an agreement with the Fund's distributor.

You may normally redeem (sell) your shares on any Business Day that the New York Stock Exchange is open and the Fund receives such redemption request in good order by mail or telephone.

Tax Information

The Fund's distributions are taxable and will be taxed as ordinary income, long-term capital gains, qualified dividend income, section 199A dividends or a combination of the above, unless you are investing through a tax-exempt or tax-deferred account, such as a 401(k) plan, IRA or 529 college savings plan. Distributions from a tax-exempt or tax-deferred account may be taxable.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or trust company), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND'S PRINCIPAL STRATEGIES AND RELATED RISKS

The Fund's Investment Objective

The Fund's investment objective is long-term capital appreciation and income.

The Fund's Principal Strategies

The Fund pursues a flexible and tactically managed asset allocation strategy. The strategy utilizes a mix of various asset classes and investment vehicles that the Fund's adviser believes will produce an optimal portfolio asset mix similar to that achieved by an institutional investor. The Fund is designed to provide investors with a single highly diversified and integrated investment solution for their long-term investment portfolio. That is, it is intended as the base, or core, from which a patient investor can build an investment portfolio.

The Fund's adviser has the ability to allocate the Fund's investments among international and domestic equities, fixed income securities, and cash and cash equivalents. The adviser may allocate to the various asset classes either through the purchase of Underlying Funds or through direct investment in the various securities. Allocations to asset classes, investment vehicles, sectors and countries are made based on the research and judgment of the adviser. The adviser considers a number of factors when making these allocations, including fundamental and technical analysis to assess the relative risk and reward potential throughout the financial markets. As a result, the percentages allocated to equities, fixed income securities and cash and cash equivalents will vary. The Fund does not expect to directly invest in securities rated below Baa3 by Moody's (securities rated below BBB by S&P and Baa3 by Moody's are commonly referred to as "junk bonds") although it may invest in Underlying Funds that hold securities rated below Baa3 or that are in default.

To achieve exposure to the asset classes discussed above, the Fund will typically invest more than 50% of its assets in Underlying Funds. The remaining portion of the Fund's assets will be invested in individual equity and fixed income securities and REITs, limited partnerships and structured securities, such as collateralized mortgage and debt obligations. REITs are companies that invest in real estate either directly or through mortgage securities. Collateralized mortgage obligations are securities that are backed by a pool of mortgage instruments and collateralized debt obligations are securities backed by a pool of bonds, debt or other assets. The Fund may invest directly in ETNs, which are debt securities whose returns are linked to a particular index. The Fund may also invest in structured notes, which are debt securities whose returns are linked to the performance of a single equity security, a basket of equity securities, or an equity index. Rather than paying a straight fixed or floating coupon, the interest payment typically fluctuates based on the value of the linked item, as well as the underlying debt obligation.

When considering investments in a closed-end fund, the adviser analyzes the Fund's portfolio to ascertain growth and income potential and uses historical models to determine whether the fund is trading at an attractive discount. When shares of a closed-end fund can be purchased at a discount to NAV, investors are buying a dollar's worth of assets for less than a dollar. The narrowing or elimination of the discount and/or the appreciation of the value of the closed-end fund will typically result in a gain to the Fund. An ETF is an investment company that typically seeks to track the performance of a particular market index. These indices include not only broad-market indices, but more specific indices as well, including those relating to particular sectors, markets, regions and industries. ETFs will be selected based on their ability to offer specific sector and style exposure in a cost and tax efficient manner. The Fund purchases ETF shares on the secondary market. Unlike a fund of funds that allocates its assets based on the perceived ability of the advisers to the Underlying Funds, the Fund's adviser actively manages the Fund's portfolio among the Underlying Funds based on its research and analysis of the market and the investment merit of the Underlying Funds themselves.

The 1940 Act restricts investments by registered investment companies, such as the Fund, in the securities of other investment companies, including ETFs. However, pursuant to exemptive orders issued by the Securities and Exchange Commission ("SEC") to various ETF sponsors, the Fund is permitted to invest in these ETFs beyond the limits set forth in the 1940 Act subject to certain terms and conditions set forth in the applicable exemptive order, including a condition that the Fund enter into an agreement with the relevant ETF sponsor prior to investing beyond the 1940 Act's limits.

The Fund also may invest directly in the equity and debt securities of U.S. corporate issuers, and U.S. government securities. Equity securities purchased by the Fund may include, but are not limited to, common stocks, preferred stocks, convertible securities, and warrants to buy common stocks. Fixed income securities purchased by the Fund may include corporate bonds, U.S. Treasury securities and municipal bonds. In addition, the Fund may invest without limitation in foreign securities, including securities issued in emerging market countries, either directly or by purchasing sponsored or unsponsored ADRs. Unsponsored ADRs are generally established by banks or brokers and may not share in the benefits or voting rights of sponsored ADRs. The Fund may also invest in Underlying Funds and other investment companies that hold foreign securities or ADRs.

The Fund may invest in SPACs. SPACs are collective investment structures that pool funds in order to seek potential acquisition opportunities. Unless and until an acquisition is completed, a SPAC generally invests its assets (less an amount to cover expenses) in U.S. government securities, money market fund securities and cash. SPACs and similar entities may be blank check companies with no operating history or ongoing business other than to seek a potential acquisition. Accordingly, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. Certain SPACs may seek acquisitions only in limited industries or regions, which may increase the volatility of their prices. If an acquisition that meets the requirements for the SPAC is not completed within a predetermined period of time, the invested funds are returned to the entity's shareholders. Investments in SPACs may be illiquid and/or be subject to restrictions on resale. To the extent the SPAC is invested in cash or similar securities, this may impact the Fund's ability to meet its investment objective.

The Fund may seek to realize additional gains or hedge investments by selling a security short. A short sale is a transaction in which the Fund sells a security that it does not own in anticipation of a decline in the market price of the security. To complete the short sale, the Fund must arrange through a broker to borrow the security in order to deliver it to the buyer. The Fund is obligated to replace the borrowed security by purchasing it at a market price at or prior to the time it must be returned to the lender. The price at which the Fund is required to replace the borrowed security may be more or less than the price at which the security was sold by the Fund. The Fund will incur a loss if the price of the security sold short increases between the date of the short sale and the date on which the Fund replaces the borrowed security. The Fund will realize a gain if the price of the security declines between those dates.

The Fund may obtain exposure to below investment grade securities (i.e., junk bonds), debt obligations of foreign governments (i.e., sovereign debt obligations), supranational debt (i.e., debt issued by entities such as the World Bank and the Asian Development Bank), foreign currency transactions and commodities, principally through its investments in Underlying Funds and other investment companies that invest in these asset classes, although the Fund may also invest directly in such instruments.

The Fund may enter into total return swaps. Total return swaps are agreements that provide the Fund with a return based on the performance of an underlying asset (called a “reference asset”), in exchange for fee payments to a counterparty based on a specific rate of return. The difference in the value of these income streams is recorded daily by the Fund, and is settled in cash at the end of each month or when the amount owed to either party reaches some specific amount. The fee paid by the Fund will typically be determined by multiplying the face value of the swap agreement by an agreed upon interest rate. In addition, if the reference asset declines in value over the term of the swap, the Fund would also be required to pay the dollar value of that decline to the counterparty. Total return swaps could result in losses if the reference asset does not perform as anticipated by the adviser. The Fund may use its own NAV or the NAV of a similar fund as the reference asset in a total return swap. This strategy serves to reduce “cash drag” (the impact of uninvested cash on the Fund’s overall return) by replacing it with the total return of the Fund’s own, or a similar fund’s investment holdings. The Fund records fluctuations in the value of open swap contracts on a daily basis as unrealized gains or losses. While it is possible to lose money investing in total return swaps, the adviser has determined that the use of total return swaps, over time, will benefit the Fund and its shareholders by providing market exposure to the cash positions held by the Fund. To minimize the risk, the adviser periodically examines the creditworthiness of the counterparty. The maximum notional amount available for the total return swap is generally some percentage of the Fund’s total assets or the assets of the reference asset, usually aggregated with other funds also using the same reference asset. Settlement of amounts owed between the parties occurs monthly or when the amount owed exceeds a limit established between the parties.

The Fund may liquidate positions in order to change the Fund’s asset allocation or to generate cash to invest in more attractive opportunities, which may result in a larger portion of any net gains being realized as short-term capital gains. In addition, a negative change in the fundamental or qualitative characteristics of the issuer may cause the adviser to sell a security. Finally, the adviser may sell a security when its price approaches, meets or exceeds the adviser’s target price. For instance, the adviser may sell shares of a closed-end fund when it is no longer selling at a discount. This may result in a higher rate of portfolio turnover. A higher portfolio turnover rate may indicate higher transaction cost and may result in higher taxes when Fund shares are held in a taxable account.

The Fund's Principal Investment Risks

The following provides additional information about the principal risks of investing in the Fund. More information about the Fund's risks is included in the Statement of Additional Information.

The Fund may borrow amounts up to one-third of the value of its total assets, but it will not borrow more than 5% of the value of its total assets except to satisfy redemption requests or for other temporary purposes.

Borrowing Risk. The Fund may borrow amounts up to one-third of the value of its total assets, but it will not borrow more than 5% of the value of its total assets except to satisfy redemption requests or for other temporary purposes. Such borrowings would result in increased expense to the Fund and, while they are outstanding, would magnify increases or decreases in the value of Fund shares. The Fund will not purchase additional portfolio securities while outstanding borrowings exceed 5% of the value of its total assets.

Closed-End Fund Risk. The Fund invests in closed-end investment companies or funds. The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share that is less than the NAV per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined NAV, but rather, are subject to supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their NAV.

The Fund may invest in shares of closed-end funds that are trading at a discount to NAV or at a premium to NAV. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the NAV of the Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and NAV than an investment in shares of investment companies without a leveraged capital structure.

BDCs are a type of closed-end investment company that generally invest in less mature U.S. private companies or thinly traded U.S. public companies, which involve greater risk than well-established publicly-traded companies. While BDCs are expected to generate income in the form of dividends, certain BDCs during certain periods of time may not generate such income. The Fund will indirectly bear its proportionate share of any management fees and other operating expenses incurred by closed-end funds and BDCs in which it invests, and of any performance-based or incentive fees payable by the BDCs in which it invests, in addition to the expenses paid by the Fund.

Convertible Security Risk. The market value of convertible securities and other debt securities tends to fall when prevailing interest rates rise. The value of convertible securities also tends to change whenever the market value of the underlying common or preferred stock fluctuates.

Correlation Risk. Because the Fund allocates its investments among different asset classes, the Fund is subject to correlation risk. Although the prices of equity securities and fixed-income securities, as well as other asset classes, often rise and fall at different times so that a fall in the price of one may be offset by a rise in the price of the other, in down markets the prices of these securities and asset classes can also fall in tandem.

Cyber Security Risk. The Fund and its service providers may be prone to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cyber security include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber-attacks. Cyber security breaches affecting the Fund or its adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Fund. For instance, cyber security breaches may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its NAVs, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. Such attacks, failures or other events could also subject the Fund or its service providers to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and/or additional compliance costs. Insurance protection and contractual indemnification provisions may be insufficient to cover these losses. The Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such companies to lose value.

Derivatives Risk. Some of the instruments in which the Fund may invest may be referred to as "derivatives," because their value "derives" from the value of an underlying asset, reference rate or index. These instruments include options, futures contracts, forward currency contracts, swap agreements and similar instruments. The market value of derivative instruments and securities sometimes is more volatile than that of other instruments and each type of derivative instrument may have its own special risks.

Some over-the-counter derivatives instruments may expose the Fund to the credit risk of its counterparty. In the event the counterparty to such a derivative instrument becomes insolvent, the Fund will lose all or substantially all of its investment in the derivative instrument, as well as the benefits derived therefrom.

Investing for hedging purposes or to increase the Fund's return may result in certain additional transaction costs that may reduce the Fund's performance. In addition, when used for hedging purposes, no assurance can be given that each derivative position will achieve a close correlation with the security or currency against which it is being hedged, or that a particular derivative position will be available when sought by the adviser. While hedging strategies involving derivatives can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other Fund investments. Certain derivatives may create a risk of loss greater than the amount invested.

The Fund's transactions in derivatives may be subject to one or more special tax rules. These rules may: (i) affect whether gains and losses recognized by the Fund are treated as ordinary or capital or as short-term or long-term, (ii) accelerate the recognition of income or gains to the Fund, (iii) defer losses to the Fund, and (iv) cause adjustments in the holding periods of the Fund's securities. The Fund's use of derivatives may be limited by the requirements for taxation of the Fund as a regulated investment company.

In October 2020, the SEC adopted new regulations governing the use of derivatives by registered investment companies. The Fund will be required to implement and comply with new Rule 18f-4 by the third quarter of 2022. Once implemented, Rule 18f-4 will impose limits on the amount of derivatives a fund can enter into, eliminate the asset segregation framework currently used by funds to comply with Section 18 of the 1940 Act, treat derivatives as senior securities so that a failure to comply with the limits would result in a statutory violation and require funds whose use of derivatives is more than a limited specified exposure to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager.

Economic and Market Events Risk. Events in certain sectors historically have resulted, and may in the future result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. These events have included, but are not limited to: bankruptcies, corporate restructurings, and other events related to the sub-prime mortgage crisis in 2008; governmental efforts to limit short selling and high frequency trading; measures to address U.S. federal and state budget deficits; social, political, and economic instability in Europe; economic stimulus by the Japanese central bank; steep declines in oil prices; dramatic changes in currency exchange rates; and China's economic slowdown. Interconnected global economies and financial markets increase the possibility that conditions in one country or region might adversely impact issuers in a different country or region. Both domestic and foreign equity markets have experienced increased volatility and turmoil, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. Banks and financial services companies could suffer losses if interest rates continue to rise or economic conditions deteriorate.

A recent outbreak of respiratory disease caused by a novel coronavirus was first detected in December 2019 and has spread internationally. The outbreak and efforts to contain its spread have resulted in closing borders and quarantines, restricting international and domestic travel, enhanced health screenings, cancellations, disrupted supply chains and customer activity, responses by businesses (including changes to operations and reducing staff), and have produced general concern and uncertainty. The impact of the coronavirus pandemic, and other epidemics and pandemics that may arise in the future, could adversely affect national and global economies, individual companies and the market in general in a manner and for a period of time that cannot be foreseen at the present time. These conditions could result in the Fund's inability to achieve its investment objectives, cause the postponement of reconstitution or rebalance dates for benchmark indices, adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, negatively impact the Fund's performance, and cause losses on your investment in the Fund. You should also review this prospectus and the Statement of Additional Information to understand the Fund's discretion to implement temporary defensive measures, as well as the circumstances in which the Fund may satisfy redemption requests in-kind.

In addition, relatively high market volatility and reduced liquidity in credit and fixed-income markets may adversely affect many issuers worldwide. Actions taken by the U.S. Federal Reserve (Fed) or foreign central banks to stimulate or stabilize economic growth, such as interventions in currency markets, could cause high volatility in the equity and fixed-income markets. Reduced liquidity may result in less money being available to purchase raw materials, goods, and services from emerging markets, which may, in turn, bring down the prices of these economic staples. It may also result in emerging-market issuers having more difficulty obtaining financing, which may, in turn, cause a decline in their securities prices.

In addition, while interest rates have been unusually low in recent years in the United States and abroad, any decision by the Fed to adjust the target Fed funds rate, among other factors, could cause markets to experience continuing high volatility. A significant increase in interest rates may cause a decline in the market for equity securities. Also, regulators have expressed concern that rate increases may contribute to price volatility. These events and the possible resulting market volatility may have an adverse effect on the Fund.

Political turmoil within the United States and abroad may also impact the Fund. Although the U.S. government has honored its credit obligations, it remains possible that the United States could default on its obligations. While it is impossible to predict the consequences of such an unprecedented event, it is likely that a default by the United States would be highly disruptive to the U.S. and global securities markets and could significantly impair the value of the Fund's investments. Similarly, political events within the United States at times have resulted, and may in the future result, in a shutdown of government services, which could negatively affect the U.S. economy, decrease the value of many Fund investments, and increase uncertainty in or impair the operation of the U.S. or other securities markets.

Uncertainties surrounding the sovereign debt of a number of European Union (EU) countries and the viability of the EU have disrupted and may in the future disrupt markets in the United States and around the world. If one or more countries leave the EU or the EU dissolves, the world's securities markets likely will be significantly disrupted. In June 2016, the United Kingdom ("UK") approved a referendum to leave the EU. The withdrawal, known colloquially as "Brexit", was agreed to and ratified by the UK Parliament, and the UK left the EU on January 31, 2020. It began a transition period in which to negotiate a new trading relationship for goods and services that ended on December 31, 2020. On January 1, 2021, the UK left the EU Single Market and Customs Union, as well as all EU policies and international agreements. On December 24, 2020, the UK and EU agreed to a trade deal with no tariffs or quotas on products, regulatory and customs cooperation mechanisms as well as provisions ensuring a level playing field for open and fair competition. The UK and EU plan to put in place a regulatory dialogue on financial systems based on a separate memorandum of understanding by March 2021. Since the referendum, there have been periods of significant volatility in the global stock markets and currency exchange rates, as well as challenging market conditions in the UK. At this time, the impact that the trade deal and any future agreements on services, particularly financial services, will have on the Fund cannot be predicted, and it is possible that the new terms may adversely affect the Fund. Political and military events, including in North Korea, Venezuela, Syria, and other areas of the Middle East, and nationalist unrest in Europe, also may cause market disruptions.

In addition, there is a risk that the prices of goods and services in the United States and many foreign economies may decline over time, known as deflation. Deflation may have an adverse effect on stock prices and creditworthiness and may make defaults on debt more likely. If a country's economy slips into a deflationary pattern, it could last for a prolonged period and may be difficult to reverse.

Emerging Markets Risk. Investment in emerging market securities involves greater risk than that associated with investment in securities of issuers in developed foreign countries. These risks include volatile currency exchange rates, periods of high inflation, increased risk of default, greater social, economic and political uncertainty and instability, less governmental supervision and regulation of securities markets, weaker auditing and financial reporting standards, lack of liquidity in the markets, market manipulation, limited access to capital, the significantly smaller market capitalizations of emerging market issuers and risks related to foreign investment structures. Risks arising from differences in regulatory, accounting, auditing, and recordkeeping standards could impede the adviser's ability to evaluate companies or impact the Fund's performance. A lack of reliable information, rights and remedies increase the risks of investing in emerging markets in comparison to more developed markets. In addition to the Foreign Investing Risks discussed below, countries with emerging markets may have relatively unstable governments, social, financial and legal systems that do not protect shareholders, economies based on only a few industries, and securities markets that trade a small number of issues. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. These limitations may affect the Fund's ability to meet its investment objective.

Equity Risk. To the extent the Fund invests in common stocks, preferred stocks, convertible securities, rights and warrants, it will be exposed to equity risk. Equity markets may experience volatility and the value of equity securities may move in opposite directions from each other and from other equity markets generally. Preferred stocks often behave more like fixed income securities. If interest rates rise, the value of preferred stocks having a fixed dividend rate tends to fall. The value of convertible securities fluctuates with the value of the underlying stock. Convertible stocks can also fluctuate based on the issuer's credit rating or creditworthiness and may be subject to call or redemption by the issuer. Rights and warrants do not necessarily move in parallel with the price of the underlying stock and the market for rights and warrants may be limited. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Exchange-Traded Fund Risk. ETFs may trade at a discount to the aggregate value of the underlying securities and frequent trading of ETFs by the Fund can generate brokerage expenses. ETFs do not sell individual shares directly to investors and only issue their shares in large blocks known as "creation units." The investor purchasing a creation unit may sell the individual shares on a secondary market. Therefore, the liquidity of ETFs depends on the adequacy of the secondary market. In times of market stress, market makers or authorized participants may step away from their respective roles in making a market in shares of the ETF, which could also lead to variances between the market price of the ETF's shares and the underlying value of those shares. An ETF portfolio generally holds the same stocks or bonds as the index it tracks or it may hold a representative sample of such securities. Thus, an ETF typically is designed so that its performance will correspond closely with that of the index it tracks. In some cases, an ETF may be actively-managed by an investment adviser and/or sub-advisers. Actively-managed ETFs are subject to the risk of poor investment selection, and the individual investments in an actively-managed ETF may not perform as well as its investment adviser and/or sub-advisers expected, and/or the actively-managed ETF's portfolio management practices do not work to achieve their desired result. Shareholders of the Fund will indirectly be subject to the fees and expenses of the individual ETFs in which the Fund invests and these fees and expenses are in addition to the fees and expenses that Fund shareholders directly bear in connection with the Fund's own operations.

Exchange-Traded Note Risk. The Fund may invest in ETNs, which are notes representing unsecured debt of the issuer. ETNs are typically linked to the performance of an index plus a specified rate of interest that could be earned on cash collateral. The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, changes in the applicable interest rates, changes in the issuer's credit rating and economic, legal, political or geographic events that affect the referenced index. ETNs in which the Fund may invest typically mature thirty years from the date of issue. The issuer's credit rating will be investment grade at the time of investment, however, the credit rating may be revised or withdrawn at any time and there is no assurance that a credit rating will remain in effect for any given time period. If a rating agency lowers the issuer's credit rating, the value of the ETN will decline and a lower credit rating reflects a greater risk that the issuer will default on its obligation. When the Fund invests in ETNs it will bear its proportionate share of any fees and expenses associated with investment in such securities. Such fees reduce the amount of return on investment at maturity or upon redemption. There may be restrictions on the Fund's right to redeem its investment in an ETN, which are meant to be held until maturity. The Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market.

Fixed Income Risk. Fixed income securities increase or decrease in value based on changes in interest rates. If rates increase, the value of the Fund's fixed income securities generally declines. On the other hand, if rates fall, the value of the fixed income securities generally increases. The issuer of a fixed income security may not be able to make interest and principal payments when due. This risk is increased in the case of issuers of high yield securities, also known as "junk bonds." If a U.S. government agency or instrumentality in which the Fund invests defaults, and the U.S. government does not stand behind the obligation, the Fund's share price or yield could fall. Securities of certain U.S. government sponsored entities are neither issued nor guaranteed by the U.S. government. Fixed income risks include components of the following additional risks:

- **Credit Risk.** The issuer of a fixed income security may not be able to make interest and principal payments when due. Generally, the lower the credit rating of a security, the greater the risk that the issuer will default on its obligation, which could result in a loss to the Fund. The Fund may invest in an Underlying Fund that invests in securities that are rated in the lowest investment grade category. Issuers of these securities are more vulnerable to changes in economic conditions than issuers of higher grade securities. In addition, the Fund may incur expenses in an effort to protect the Fund's interests or enforce its rights against an issuer, guarantor or counterparty or may be hindered or delayed in exercising these rights.
- **High Yield Securities/Junk Bond Risk.** The Fund may invest in Underlying Funds that invest in high yield securities, also known as "junk bonds." High yield securities are not considered to be investment grade. High yield securities may provide greater income and opportunity for gain, but entail greater risk of loss of principal. High yield securities are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligation. The market for high yield securities is generally less active than the market for higher quality securities. This may limit the ability of the Underlying Fund to sell high yield securities at the price at which it is being valued for purposes of calculating NAV.

- **Government Risk.** The U.S. government's guarantee of ultimate payment of principal and timely payment of interest on certain U. S. Government securities owned by the Fund does not imply that the Fund's shares are guaranteed or that the price of the Fund's shares will not fluctuate. In addition, securities issued by Freddie Mac, Fannie Mae and Federal Home Loan Banks are not obligations of, or insured by, the U.S. government. If a U.S. government agency or instrumentality in which the Fund invests defaults and the U.S. government does not stand behind the obligation, the Fund's share price could fall. All U.S. government obligations are subject to interest rate risk.
- **Interest Rate Risk.** The Fund's share price and total return will vary in response to changes in interest rates. If rates increase, the value of the Fund's investments generally will decline, as will the value of your investment in the Fund. Recent and any future declines in interest rate levels could cause the Fund's earnings to fall below the Fund's expense ratio, resulting in a decline in the Fund's share price. Securities with longer maturities tend to produce higher yields, but are more sensitive to changes in interest rates and are subject to greater fluctuations in value.
- **Sovereign Obligation Risk.** The Underlying Funds may invest in sovereign debt obligations. Investment in sovereign debt obligations involves special risks not present in corporate debt obligations. The issuer of the sovereign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and the Underlying Funds may have limited recourse in the event of a default. During periods of economic uncertainty, the market prices of sovereign debt may be more volatile than prices of U.S. debt obligations. In the past, certain emerging markets have encountered difficulties in servicing their debt obligations, withheld payments of principal and interest, and declared moratoria on the payment of principal and interest on their sovereign debts. Sovereign debt obligations are also subject to political risks (e.g., government instability, poor socioeconomic conditions, corruption, lack of democratic accountability, internal and external conflict, poor quality of bureaucracy, and religious and ethnic tensions) and economic risks (e.g., the relative size of the governmental entity's debt position in relation to the economy, high foreign debt as a percentage of gross domestic product or exports, high inflation or deflation, or an overvalued exchange rate) or a combination of these risks, such as the failure to put in place economic reforms required by the International Monetary Fund or other multilateral agencies.

Foreign Investing Risk. Because the Fund may invest in foreign securities directly or indirectly in sponsored or unsponsored ADRs and Underlying Funds that hold foreign debt and equity securities, including the debt of foreign governments and supranational organizations, and ADRs, it is subject to foreign investing risk. Unsponsored ADRs are generally established by banks or brokers and may not share in the benefits or voting rights of sponsored ADRs. Foreign investing involves risks not typically associated with U.S. investments. These risks include, among others, adverse fluctuations in foreign currency values as well as adverse political, social and economic developments affecting a foreign country. In addition, foreign investing involves less publicly available information, and more volatile or less liquid securities markets. Investments in foreign countries could be affected by factors not present in the U.S., such as restrictions on receiving the investment proceeds from a foreign country, foreign tax laws, and potential difficulties in enforcing contractual obligations. Foreign accounting may be less transparent than U.S. accounting practices and foreign regulation may be inadequate or irregular. Owning foreign securities could cause the Fund's performance to fluctuate more than if it held only U.S. securities.

Investment Style Risk. The Fund is managed by allocating the Fund's assets to Underlying Funds. Underlying Funds charge their own management and operating fees. This may cause the Fund to underperform funds that do not allocate their assets to Underlying Funds.

LIBOR Transition. Certain of the Fund's investments, payment obligations and financing terms may be based on floating rates, such as LIBOR, Euro Interbank Offered Rate and other similar types of reference rates (each, a "Reference Rate"). On July 27, 2017, the Chief Executive of the UK Financial Conduct Authority ("FCA"), which regulates LIBOR, announced that the FCA will no longer persuade nor compel banks to submit rates for the calculation of LIBOR and certain other Reference Rates after 2021. Such announcement indicates that the continuation of LIBOR and other Reference Rates on the current basis cannot and will not be guaranteed after 2021. The transition away from Reference Rates may lead to increased volatility and illiquidity in markets that are tied to such Reference Rates and reduced values of Reference Rate-related investments. This announcement and any additional regulatory or market changes that occur as a result of the transition away from Reference Rates may have an adverse impact on the Fund's investments, performance or financial condition.

Large Shareholder Purchase and Redemption Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell its securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large purchases of the Fund's shares may also adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Liquidity Risk. The Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment is an investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the security. Pursuant to Rule 22e-4 (the "Liquidity Rule") under the 1940 Act, RiverNorth Funds had implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to the Liquidity Rule. If the limitation on illiquid investments is exceeded, other than by a change in market values, the condition will be reported to the Board of Trustees and, when required by the Liquidity Rule, to the SEC.

When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities in a timely manner at or near their perceived value. In such a market, the value of such securities and the Fund's share price may fall dramatically, even during periods of declining interest rates. Other market developments can adversely affect fixed-income securities markets. Regulations and business practices, for example, have led some financial intermediaries to curtail their capacity to engage in trading (i.e., "market making") activities for certain fixed-income securities, which could have the potential to decrease liquidity and increase volatility in the fixed-income securities markets. Investments that are illiquid or that trade in lower volumes may be more difficult to value. The market for below investment grade securities may be less liquid and therefore these securities may be harder to value or sell at an acceptable price, especially during times of market volatility or decline. Investments in foreign securities tend to have greater exposure to liquidity risk than domestic securities. Liquidity can decline unpredictably in response to overall economic conditions or credit tightening. Increases in volatility and decreases in liquidity may be caused by a rise in interest rates (or the expectation of a rise in interest rates). Liquidity risk also may refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period stated in this prospectus because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions, which may adversely affect the Fund's share price.

Management Risk. The adviser's judgments about the attractiveness, value and potential appreciation of a particular asset class or individual security in which the Fund invests may prove to be incorrect and there is no guarantee that the adviser's judgment will produce the desired results. In addition, the Fund may allocate its assets so as to under-emphasize or over-emphasize ETFs or other investments under the wrong market conditions, in which case the Fund's value may be adversely affected.

Market Risk. Overall stock market risks may also affect the value of the Fund. Factors such as domestic economic growth and market conditions, interest rate levels and political events affect the securities markets.

Portfolio Turnover Risk. A high portfolio turnover rate (100% or more) is likely to involve higher brokerage commissions and other transaction costs, which could reduce the Fund's return. It also may result in higher short-term capital gains that are taxable to shareholders when distributed. Distributions may be derived primarily from short-term capital gains that are taxable as ordinary income. Short-term capital gains and losses realized by the Fund are not eligible to offset a shareholder's short-term capital losses or gains, respectively, earned from other investments. See "Financial Highlights" for the Fund's historical portfolio turnover rates.

Preferred Stock Risk. Preferred stock represents the senior residual interest in the assets of an issuer after meeting all claims, with priority to corporate income and liquidation payments over the issuer's common stock. As such, preferred stock is inherently more risky than the bonds and other debt instruments of the issuer, but less risky than its common stock. Certain preferred stocks contain provisions that allow an issuer under certain conditions to skip (in the case of "non-cumulative" preferred stocks) or defer (in the case of "cumulative" preferred stocks) dividend payments. Preferred stocks often contain provisions that allow for redemption in the event of certain tax or legal changes or at the issuer's call. Preferred stocks typically do not provide any voting rights, except in cases when dividends are in arrears beyond a certain time period. There is no assurance that dividends on preferred stocks in which the Fund invests will be declared or otherwise made payable. If the Fund owns preferred stock that is deferring its distributions, the Fund may be required to report income

for U.S. federal income tax purposes while it is not receiving cash payments corresponding to such income. When interest rates fall below the rate payable on an issue of preferred stock or for other reasons, the issuer may redeem the preferred stock, generally after an initial period of call protection in which the stock is not redeemable. Preferred stocks may be significantly less liquid than many other securities, such as U.S. government securities, corporate debt and common stock.

REIT Risk. The Fund may invest in REITs. Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value and vacancy rate of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation. REITs also are subject to the possibilities of failing to qualify for tax free pass-through of income under the Internal Revenue Code of 1986, as amended (the “Code”) and failing to maintain their exemption from registration under the 1940 Act. Investment in REITs involves risks similar to those associated with investing in small capitalization companies, and REITs (especially mortgage REITs) are subject to interest rate risks. When interest rates decline, the value of a REIT’s investment in fixed rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT’s investment in fixed rate obligations can be expected to decline. Mortgage REITs are also subject to prepayment risk. Because REITs incur expenses like management fees, investments in REITs also add an additional layer of expenses.

Security Risk. The value of the Fund may decrease in response to the activities and financial prospects of individual securities in the Fund’s portfolio.

Short Sale Risk. Positions in shorted securities are speculative and more risky than long positions (purchases) in securities because the maximum sustainable loss on a security purchased is limited to the amount paid for the security plus the transaction costs, whereas there is no maximum attainable price of the shorted security. Therefore, in theory, securities sold short have unlimited risk. Short selling will also result in higher transaction costs (such as interest and dividends), and may result in higher taxes, which reduce the Fund’s return. Generally the short sales in which the Fund may invest will not be “against the box,” meaning the Fund will not own the shorted security, so theoretically the potential loss resulting from short sales is unlimited.

Smaller Company Risk. The Fund may invest in smaller capitalization companies (that is, companies with market capitalizations of \$1 billion or less). The earnings and prospects of smaller companies are more volatile than those of larger companies. Smaller companies also may experience higher failure rates than do larger companies. In addition, the securities of smaller companies may trade less frequently and in smaller volumes than the securities of larger companies, which may disproportionately affect their market price, tending to make them fall more in response to selling pressure than is the case with larger companies. Finally, smaller companies may have limited markets, product lines or financial resources and may lack management experience.

Special Purpose Acquisition Companies Risks. The Fund may invest in SPACs. SPACs are collective investment structures that pool funds in order to seek potential acquisition opportunities. Unless and until an acquisition is completed, a SPAC generally invests its assets (less an amount to cover expenses) in U.S. government securities, money market fund securities and cash. SPACs and similar entities may be blank check companies with no operating history or ongoing business other than to seek a potential acquisition. Accordingly, the value of their securities is particularly dependent on the ability of the entity’s management to identify and complete a profitable acquisition. Certain SPACs may seek acquisitions only in limited industries or regions, which may increase the volatility

of their prices. If an acquisition that meets the requirements for the SPAC is not completed within a predetermined period of time, the invested funds are returned to the entity's shareholders. Investments in SPACs may be illiquid and/or be subject to restrictions on resale. To the extent the SPAC is invested in cash or similar securities, this may impact the Fund's ability to meet its investment objective.

Structured Notes Risk. Structured notes are subject to a number of fixed income risks including general market risk, interest rate risk, and the risk that the issuer on the note may fail to make interest and/or principal payments when due, or may default on its obligations entirely. In addition, as a result of the imbedded derivative features, structured notes generally are subject to more risk than investing in a simple note or bond issued by the same issuer. It is impossible to predict whether the referenced factor (such as an index or interest rate) or prices of the underlying securities will rise or fall. To the extent that the fixed income portion of the Fund's portfolio includes structured notes, the Fund may be more volatile than other funds that do not invest in structured notes. The actual trading prices of structured notes may be significantly different from the principal amount of the notes. If the Fund sells the structured notes prior to maturity, it may suffer a loss of principal. At final maturity, structured notes may be redeemed in cash or in kind, which is at the discretion of the issuer. If the notes are redeemed in kind, the Fund would receive shares of stock at a depressed price. To the extent that a structured note is not principal-protected through an insurance feature, the note's principal will not be protected. In the case of a decrease in the value of the underlying asset, the Fund would receive shares at a value less than the original amount invested; while an increase in the value of an underlying asset will not increase the return on the note.

Swap Risk. The Fund may invest in total return swap agreements. The degree of the Fund's investment in these instruments is not limited, although maximum notional amounts are generally set by counterparties. These agreements are considered derivatives. Swap agreements are two-party contracts under which the Fund and a counterparty, such as a broker or dealer, agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or indices. Swaps and swap options can be used for a variety of purposes, including: as an efficient means of adjusting the Fund's overall exposure to certain markets; in an effort to enhance income or total return or protect the value of portfolio securities; and to serve as a cash management tool.

There are risks in the use of swaps. Total return swaps could result in losses if the reference index, security, or investments do not perform as anticipated. The use of swaps may not always be successful; using them could lower the Fund's total return, their prices can be highly volatile, and the potential loss from the use of swaps can exceed the Fund's initial investment in such instruments. Also, the other party to a swap agreement could default on its obligations or refuse to cash out the Fund's investment at a reasonable price, which could turn an expected gain into a loss. The adviser will monitor the creditworthiness of all counterparties in any swap contract. The maximum notional amount available for a total return swap is \$75 million and settlement of amounts owed between the parties occurs monthly or when the amount owed exceeds \$1 million.

Tax Risk. With respect to federal income taxes, any distributions to shareholders that represent income from taxable securities will generally be taxable as ordinary income, while other distributions, such as capital gains, are taxable to the same extent they would be for any mutual fund. Distributions also are generally subject to state taxes with certain exceptions (e.g. some states may have an exception where a portion of the fund's income is attributable to municipal securities issued in the

state in which you reside). New federal or state governmental action could adversely affect the tax-exempt status of securities held by the Fund, resulting in higher tax liability for shareholders and potentially hurting Fund performance as well.

Underlying Fund Risk. The Fund will invest in Underlying Funds such as other open-end investment companies, ETFs, and closed-end funds. The cost of investing in the Fund will generally be higher than the cost of investing directly in other investment company shares. Investors in the Fund will indirectly bear fees and expenses charged by the Underlying Funds in which the Fund invests, including advisory fees, in addition to the Fund's direct fees and expenses. The Fund may also incur brokerage costs when it purchases Underlying Funds. Furthermore, investments in Underlying Funds could affect the timing, amount and character of distributions to shareholders and therefore may increase the amount of taxes payable by investors in the Fund. The Fund is best suited for long-term investors.

The Underlying Funds in which the Fund invests may not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the ETFs and index funds will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by these investments may, from time to time, temporarily be unavailable, which may further impede the ability of the ETFs and index funds to track their applicable indices.

Additionally, the Fund may invest in shares of closed-end funds that are trading at a discount to NAV or at a premium to NAV. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the NAV of the Fund's shares.

In addition, certain closed-end funds utilize leverage in their portfolios. This use of leverage could subject the Underlying Fund, and indirectly, the Fund, to increased risks including increased volatility in the price of the Underlying Fund shares. The Fund will invest in closed-end funds that pay periodic dividends to shareholders, some of which may be classified as return of capital distributions.

In October 2020, the SEC adopted certain regulatory changes and took other actions related to the ability of an investment company to invest in another investment company. These changes include, among other things, amendments to Rule 12d1-1, the rescission of Rule 12d1-2, the adoption of Rule 12d1-4, and the rescission of certain exemptive relief issued by the SEC permitting such investments in excess of statutory limits. These regulatory changes may adversely impact the Fund's investment strategies and operations.

Other Information About the Fund

The investment objective of the Fund may be changed without shareholder approval; however, you will be given advance written notice of any material changes. Information about the Fund's policies and procedures with respect to disclosure of the Fund's portfolio holdings is included in the Statement of Additional Information.

From time to time, the Fund may hold all or a portion of its assets in cash or cash equivalents pending investment or when attempting to respond to adverse market, economic, political or other conditions, causing investment opportunities to be limited. Cash equivalents include certificates of deposit; short term, high quality taxable debt securities; money market funds and repurchase agreements. If the Fund invests in shares of a money market fund or other investment company, the

shareholders of the Fund generally will be subject to duplicative management fees. These temporary defensive positions may be inconsistent with the Fund's principal investment strategy and, as a result of engaging in these temporary measures, the Fund may not achieve its investment objective.

HOW TO BUY SHARES

Opening an Account

The Fund is a series of RiverNorth Funds and you may purchase shares directly from RiverNorth Funds. You also may purchase shares through a brokerage firm or other intermediary that has contracted with RiverNorth Funds to sell shares of the Fund. You may be charged a separate fee by the brokerage firm or other intermediary through whom you purchase shares. Shares of the Fund are available exclusively to U.S. citizens.

If you are investing directly in the Fund for the first time, please call the Fund's transfer agent at 1-888-848-7569 to request a Shareholder Account Application. You will need to establish an account before investing. Be sure to sign up for all the account options that you plan to take advantage of. For example, if you would not like to be able to redeem your shares by telephone, you should select this option on your Shareholder Account Application. Doing so when you open your account means that you will not need to complete additional paperwork later.

Your investment in the Fund should be intended as a long-term investment vehicle. The Fund is not designed to provide you with a means of speculating on the short-term fluctuations in the stock market. The Fund reserves the right to reject any purchase request that it regards as disruptive to the efficient management of the Fund, which includes investors with a history of excessive trading. The Fund also reserves the right to stop offering shares at any time.

To help the U.S. government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account. This means that when you open an account, we will ask for your name, residential address, date of birth, government identification number and other information that will allow us to identify you. We also may ask to see your driver's license or other identifying documents, and may take additional steps to verify your identity. If we do not receive these required pieces of information, there may be a delay in processing your investment request, which could subject your investment to market risk. If we are unable to immediately verify your identify, the Fund may restrict further investment until your identify is verified. However, if we are unable to verify your identity, the Fund reserves the right to close your account without notice and return your investment to you at the NAV determined on the day in which your account is closed. If we close your account because we are unable to verify your identity, your investment will be subject to market fluctuation, which could result in a loss of a portion of your principal investment. The Fund has appointed an Anti-Money Laundering Compliance Officer to oversee these policies.

If you have any questions regarding the Fund, please call the transfer agent at 1-888-848-7569.

If you are opening an account in the name of a legal entity (e.g., a partnership, business trust, limited liability company, corporation, etc.), you may be required to supply the identity of the beneficial owner or controlling person(s) of the legal entity prior to the opening of your account. The Fund may request additional information about you (which may include certain documents, such as articles of incorporation for companies) to help the Fund's transfer agent verify your identity.

Purchasing Shares

You may buy shares on any “business day.” Business days are Monday through Friday, other than days the New York Stock Exchange (NYSE) is closed, including the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas Day.

Shares of the Fund are sold at NAV per share. The NAV generally is calculated as of the close of trading on the NYSE every day the NYSE is open. The NYSE normally closes at 4:00 p.m. Eastern Time (“ET”). The NAV of each class of shares of the Fund is calculated by taking the total value of the Fund’s assets attributable to that class, subtracting its liabilities, and then dividing by the total number of shares of that class outstanding, rounded to the nearest cent.

If you are purchasing directly from RiverNorth Funds, send the completed Shareholder Account Application and a check payable to the Fund to the following address:

To Place Orders

By Mail:

RiverNorth Funds
P.O. Box 1920
Denver, CO 80201

Overnight Mail:

RiverNorth Funds
c/o ALPS Fund Services
1290 Broadway, Suite 1000
Denver, CO 80203

Purchase orders received in “proper form” by the Fund’s transfer agent or designated intermediary before the close of trading on the NYSE will be effective at the NAV next calculated after your order is received. On occasion, the NYSE closes before 4:00 p.m. ET. When that happens, purchase orders received after the NYSE closes will be effective the following business day.

To be in “proper form,” the purchase order must include:

- Fund name and account number;
- Account name(s) and address;
- The dollar amount or number of shares you wish to purchase.

The Fund does not consider the US Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the RiverNorth Funds’ post office box, of purchase orders does not constitute receipt by the Fund.

The Fund may limit the amount of purchases and refuse to sell to any person.

There is an annual pass through IRA and Coverdell Education Savings Account maintenance fee of \$10.00 for accounts held directly with the Fund that is charged by the IRA custodian on a per-account basis.

Method of Payment. The Fund will accept purchases only in US dollars drawn from US financial institutions. Cashier’s checks, third party checks, money orders, credit card convenience checks, cash or equivalents or payments in foreign currencies are not acceptable forms of payment. Checks made payable to any individual or company and endorsed to RiverNorth Funds or the Fund are considered third-party checks.

A \$20 fee will be charged against your account for any payment check returned to the transfer agent or for any incomplete electronic funds transfer, insufficient funds, stop payment, closed account or other reasons. If a check does not clear your bank or the Fund is unable to debit your pre-designated bank account on the day of purchase, the Fund reserves the right to cancel the purchase. If your purchase is canceled, you will be responsible for any fees charged to the Fund for insufficient funds (failed payment) and you may be responsible for any fees imposed by your bank as well as any losses that may be incurred as a result of a decline in the value of the canceled purchase. The Fund (or the Fund's agent) has the authority to redeem shares in your account(s) to cover any losses due to fluctuations in share price. Any profit on such cancellation will accrue to the Fund.

If you choose to pay by wire, you must call the Fund's transfer agent at 1-888-848-7569 to set up your account, to obtain an account number, and obtain instructions on how to complete the wire transfer. You must provide a signed application to ALPS Fund Services, Inc., at the above address in order to complete your initial wire purchase. Wire orders will be accepted only on a day on which the Fund, custodian and transfer agent are open for business. A wire purchase will not be considered made until the wired money and the purchase order are received by the Fund. Any delays that may occur in wiring money, including delays that may occur in processing by the banks, are not the responsibility of the Fund or its transfer agent. The Fund presently does not charge a fee for the receipt of wired funds, but the Fund may charge shareholders for this service in the future.

Purchases In Kind. You may, if the Fund approves, purchase shares of the Fund with securities that are eligible for purchase by the Fund (consistent with the Fund's investment objective, restrictions and policies) and that have a value that is readily ascertainable in accordance with the Fund's valuation policies. To ascertain whether your securities will qualify to be accepted as a purchase in kind for the Fund, please contact the Fund at 1-888-848-7569. If accepted, the securities will be valued using the same criteria and methods for valuing securities to compute the Fund's NAV. The Fund or the adviser may, each in their sole discretion, determine to periodically activate or deactivate this purchase in kind option.

Minimum Investments

The minimum initial investment for Class R Shares is \$5,000. For an IRA account, the minimum initial investment for Class R Shares is \$1,000. The minimum initial investment for Class I Shares is \$100,000. The minimum subsequent investment for all share classes and all accounts is \$100. You are required to maintain a minimum account balance equal to \$5,000 for Class R Shares and \$25,000 for Class I Shares and may be required to redeem your shares if the value of your shares in the Fund falls below the minimum investment amount due to redemptions. For more information, please read "Additional Redemption Information". If you are a Class R shareholder and you meet the investment minimums for Class I Shares, you may be eligible to convert your shares, typically on a tax-free basis. Contact the Fund's transfer agent or your intermediary for more details.

The Fund reserves the right to change the amount of these minimums from time to time or to waive them in whole or in part for certain accounts. Investment minimums may be higher or lower for investors purchasing shares through a brokerage firm or other financial institution. To the extent investments of individual investors are aggregated into an omnibus account established by an investment adviser, brokerage firm, retirement plan sponsor or other intermediary, the account minimums apply to the omnibus account, not to the account of the individual investor.

For accounts sold through brokerage firms and other intermediaries, it is the responsibility of the brokerage firm or intermediary to enforce compliance with investment minimums.

Other Purchase Information

If your wire does not clear, you will be responsible for any loss incurred by the Fund. If you are already a shareholder, the Fund can redeem shares from any identically registered account in the Fund as reimbursement for any loss incurred. You may be prohibited or restricted from making future purchases in the Fund.

The Fund may authorize certain brokerage firms and other intermediaries (including its designated correspondents) to accept purchase and redemption orders on its behalf. The Fund is deemed to have received an order when the authorized person or designee receives the order, and the order is processed at the NAV next calculated thereafter. It is the responsibility of the brokerage firm or other intermediary to transmit orders promptly to the Fund's transfer agent.

RiverNorth Funds discourages market timing. Market timing is an investment strategy using frequent purchases, redemptions and/or exchanges in an attempt to profit from short term market movements. Market timing may result in dilution of the value of the Fund's shares held by long term shareholders, disrupt portfolio management and increase Fund expenses for all shareholders. The Fund may indirectly invest a portion of its assets in small capitalization companies. Because these securities are often infrequently traded, investors may seek to trade Fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the Fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the Fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage also may cause dilution in the value of Fund shares held by other shareholders. The Board of Trustees has adopted a policy directing the Fund to reject any purchase order with respect to one investor, a related group of investors or their agent(s), where it detects a pattern of purchases and sales of the Fund that indicates market timing or trading that it determines is abusive. This policy applies to all Fund shareholders. While the Fund attempts to deter market timing, there is no assurance that it will be able to identify or eliminate all market timers. For example, certain accounts called "omnibus accounts" include multiple shareholders and typically provide the Fund with a net purchase or redemption request on any given day. That is, purchasers of Fund shares and redeemers of Fund shares are netted against one another and the identities of individual purchasers and redeemers whose orders are aggregated are not known by the Fund. The netting effect often makes it more difficult for the Fund to detect market timing, and there can be no assurance that the Fund will be able to do so.

HOW TO REDEEM (SELL) SHARES

Redeeming Shares

You may redeem your shares on any business day. Redemption orders received in proper form by the Fund's transfer agent or by a brokerage firm or other intermediary selling Fund shares before 4:00 p.m. ET (or before the NYSE closes if the NYSE closes before 4:00 p.m. ET) will be processed at that day's NAV of the particular class. Your brokerage firm or intermediary may have an earlier cut-off time.

"Proper form" means your request for redemption must:

- Include the Fund name and account number;
- Include the account name(s) and address;
- State the dollar amount or number of shares you wish to redeem; and
- Be signed by all registered share owner(s) in the exact name(s) and any special capacity in which they are registered.

The Fund does not consider the US Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the RiverNorth Funds' post office box, of redemption requests does not constitute receipt by the Fund.

The Fund may require that the signatures be guaranteed if you request the redemption check be mailed to an address other than the address of record, or if the mailing address has been changed within 30 days of the redemption request. The Fund also may require that signatures be guaranteed for redemptions of \$100,000 or more. Signature guarantees are for the protection of shareholders. You can obtain a signature guarantee from most banks and securities dealers, but not from a notary public. All documentation requiring a signature guarantee must utilize a New Technology Medallion stamp. For joint accounts, both signatures must be guaranteed. Please call the transfer agent at 1-888-848-7569 if you have questions regarding signature guarantees. At the discretion of the Fund, you may be required to furnish additional legal documents to insure proper authorization.

Shares of the Fund may be redeemed by mail or telephone. You may receive redemption payments in the form of a check or federal wire transfer. If you redeem your shares through a brokerage firm or other intermediary, you may be charged a fee by that institution.

The Fund is not responsible for losses or fees resulting from posting delays or non-receipt of redemption payments at your bank when shareholder payment instructions are followed.

Redeeming By Mail

You may redeem (sell) any part of your account in the Fund by mail at no charge. Your request, in proper form, should be addressed to:

By Mail:

RiverNorth Funds
P.O. Box 1920
Denver, CO 80201

Overnight Mail:

RiverNorth Funds
c/o ALPS Fund Services
1290 Broadway, Suite 1000
Denver, CO 80203

Telephone Redemptions

You may redeem any part of your account (up to \$25,000) in the Fund by calling the transfer agent at 1-888-848-7569. You must first complete the Telephone & Online Privileges section of the investment application to institute this option. The Fund, the transfer agent and the custodian are not liable for following redemption instructions communicated by telephone to the extent that they reasonably believe the telephone instructions to be genuine. However, if they do not employ reasonable procedures to confirm that telephone instructions are genuine, they may be liable for any losses due to unauthorized or fraudulent instructions. Procedures employed may include recording telephone instructions and requiring a form of personal identification from the caller.

The Fund may terminate the telephone redemption procedures at any time. During periods of extreme market activity it is possible that shareholders may encounter some difficulty in telephoning the Fund, although neither the Fund nor the transfer agent has ever experienced difficulties in receiving and responding to telephone requests for redemptions in a timely fashion. If you are unable to reach the Fund by telephone, you may request a redemption by mail.

Redemptions-In-Kind

Generally, all redemptions will be for cash. However, if you redeem shares worth more than \$250,000 or 1% of the value of the Fund's assets, the Fund reserves the right to pay all or part of your redemption proceeds in readily marketable securities instead of cash under unusual circumstances in order to protect the interests of remaining shareholders, or to accommodate a request by a particular shareholder. If payment is made in securities, the Fund will value the securities selected in the same manner in which it computes its NAV. This process minimizes the effect of large redemptions on the Fund and its remaining shareholders. In the event that an in-kind distribution is made, you may incur additional expenses, such as the payment of brokerage commissions, on the sale or other disposition of the securities received from the Fund.

Additional Redemption Information

If you are not certain of the redemption requirements, please call the transfer agent at 1-888-848-7569. Redemptions specifying a certain date or share price cannot be accepted and will be returned. You will be mailed the proceeds on or before the fifth business day following the redemption. However, if you recently purchased your shares by check, your redemption proceeds will not be sent to you until your original check clears, which may take up to 15 days. You may be assessed a fee if the Fund incurs bank charges because you request that the Fund re-issue a redemption check. Also, when the NYSE is closed (or when trading is restricted) for any reason other than its customary weekend or holiday closing or under any emergency circumstances, as determined by the SEC, the Fund may suspend redemptions or postpone payment dates.

Redemption proceeds sent via check by the Fund and not cashed within 180 days will be reinvested in the Fund at the current day's NAV of the particular class to which the redemption proceeds relate. Redemption proceeds that are reinvested are subject to the risk of loss like any other investment in the Fund.

Because the Fund incurs certain fixed costs in maintaining shareholder accounts, the Fund may require that you redeem all of your shares in the Fund upon 30 days' written notice if the value of your Class R Shares of the Fund is less than \$5,000, or your Class I Shares of the Fund is less than \$25,000 due to redemption, or such other minimum amount as the Fund may determine from time to time. You may increase the value of your shares in the Fund to the minimum amount within the 30-day period. All shares of the Fund also are subject to involuntary redemption if the Board of Trustees determines to liquidate the Fund. An involuntary redemption will create a capital gain or a capital loss, which may have tax consequences to you and about which you should consult your tax adviser.

DISTRIBUTION PLAN

The Fund has adopted a plan under Rule 12b-1 of the 1940 Act for Class R Shares that allows the Fund to pay distribution fees for the sale and distribution of its Class R Shares and allows the Fund to pay for distribution-related activities and/or shareholder services provided to shareholders. Shareholders of Class R Shares of the Fund may pay annual 12b-1 expenses of up to 0.25%. Because these fees are paid out of the Fund's assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

VALUING THE FUND'S ASSETS

The Fund's assets are generally valued at their market value using market quotations. The Fund may use pricing services to determine market value. If market prices are not available or, in the adviser's opinion, market prices do not reflect fair value, or if an event occurs after the close of trading on the domestic or foreign exchange or market on which the security is principally traded (but prior to the time the NAV is calculated) that materially affects fair value, the adviser will value the Fund's assets at their fair value according to policies approved by the Fund's Board of Trustees. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short term traders could take advantage of the arbitrage opportunity and dilute the NAV of long term investors. Securities trading on overseas markets present time zone arbitrage opportunities when events affecting portfolio security values occur after the close of the overseas market, but prior to the close of the U.S. market. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. Fair valuation involves subjective judgments and it is possible that the fair value determined for a security may differ materially from the value that could be realized upon the sale of the security. The Fund will invest in Underlying Funds. The Fund's NAV is calculated based, in part, upon the market prices of the Underlying Funds in its portfolio, and the prospectuses of those companies explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Dividends and Distributions

The Fund typically distributes substantially all of its net investment income in the form of dividends and taxable capital gains to its shareholders. The Fund distributes dividends monthly and capital gains annually. The Fund expects that distributions will consist primarily of ordinary income and short term capital gains. These distributions are automatically reinvested in the Fund unless you request cash distributions on your application or through a written request to the Fund. Reinvested dividends and distributions receive the same tax treatment as those paid in cash. If you are interested in changing your election, you may call the Fund's transfer agent at 1-888-848-7569 or send a written notification to:

By Mail:

RiverNorth Funds
P.O. Box 1920
Denver, CO 80201

Overnight Mail:

RiverNorth Funds
c/o ALPS Fund Services
1290 Broadway, Suite 1000
Denver, CO 80203

The Fund will send dividends and capital gain distributions elected to be received as cash to the address of record or bank of record on the applicable account. Distribution checks will only be issued for payments greater than \$25.00. Distributions will automatically be reinvested in shares of the Fund(s) generating the distribution if under \$25.00. Your outstanding checks may be canceled and proceeds reinvested, and your distribution options will automatically be converted to having all dividends and other distributions reinvested in additional shares if any of the following occur:

- Postal or other delivery service is unable to deliver checks to the address of record;
- Dividends and capital gain distribution are not cashed within 180 days; or
- Bank account of record is no longer valid.

Interest will not accrue on uncashed distribution checks.

Taxes

The following summarizes certain federal income tax considerations of investing in the Fund. The discussion is based on current law which is subject to change, even retroactively. The discussion below only relates to shares held by those who are U.S. citizens or U.S. residents. The Fund qualifies as a regulated investment company under the Code and intends to maintain its status as such. Accordingly, it will distribute all or substantially all of its income and its gains to its shareholders. Distributions of the Fund's income and gains, whether paid in cash or reinvested in additional shares are taxed as ordinary income, long term capital gains, qualified dividend income, section 199A dividends or a combination of the above. Long term capital gains and qualified dividend income are currently taxed at a maximum federal rate of 20%. In addition, if the Fund invests in REITs, or Underlying Funds that invest in REITs or real estate a portion of Fund income distributed to you may be depreciation recapture income taxed at a 25% rate. To the extent, however, that the Fund designates dividends it pays to you as "section 199A dividends" such shareholder may be eligible for a 20% deduction with respect to such dividends. Fund dividends are taxable to you in the year paid, except that dividends declared before December 31 but paid in January of the next year will be taxed in the prior year. Individuals, trusts and estates whose income exceeds certain threshold amounts are subject to an additional Medicare contribution tax of 3.8% on investment income including capital gains and dividends from the Fund.

The sale or redemption of Fund shares is a taxable transaction which may result in a recognition of gain or loss for federal income tax purposes. The amount of any gain or loss to be recognized is determined by the difference between the amount realized and your adjusted tax basis in your shares. The Fund is required to compute and report to the Internal Revenue Service the basis of all shares acquired on or after January 1, 2012. The Fund has elected to use the average cost method in calculating your basis, unless you instruct otherwise. In general, gain or loss from shares held for more than one year will be long term capital gain or loss.

You are taxable on dividends received regardless of how long you have owned the shares and accordingly may want to avoid making a substantial investment in the Fund when the Fund is about to make a taxable distribution, because you would be responsible for any taxes on the distribution.

Early each year, the Fund will mail to you a statement setting forth the federal income tax information for all distributions made for the previous year. If you do not provide your taxpayer identification number, your account will be subject to backup withholding.

The tax considerations described in this section do not apply to tax-exempt or tax-deferred accounts or other non-taxable entities such as 401(k) plans, individual retirement accounts or 529 plans. Distributions from tax-exempt or tax-deferred accounts may be taxable. Because each investor's tax circumstances are unique, please consult with your tax adviser about your investment.

MANAGEMENT OF THE FUND

RiverNorth Capital Management, LLC ("RiverNorth Capital") is the Fund's investment adviser and makes the day-to-day investment decisions for the Fund. Founded in 2000, RiverNorth Capital is located at 325 N. LaSalle Street, Suite 645, Chicago, Illinois 60654. RiverNorth Capital is registered with the SEC and, as of December 31, 2020, manages approximately \$4.4 billion in registered funds, private funds and separately managed accounts.

Patrick W. Galley, CFA® is the Fund's co-portfolio manager. Mr. Galley is the Chief Executive Officer, Chief Investment Officer and Portfolio Manager for RiverNorth Capital. While serving as the President and Chairman of RiverNorth Funds, Mr. Galley also heads RiverNorth Capital's research and investment team and oversees all portfolio management activities at the firm. Prior to joining RiverNorth Capital, Mr. Galley was most recently a Vice President at Bank of America in the Global Investment Bank's Portfolio Management group. He graduated with honors from Rochester Institute of Technology with a B.S. in Finance. Mr. Galley has received the Chartered Financial Analyst (CFA®) designation, is a member of the CFA Institute, and is a member of the CFA Society of Chicago.

Stephen O'Neill, CFA® is the Fund's other co-portfolio manager. Mr. O'Neill conducts qualitative and quantitative analysis of closed-end funds and their respective asset classes. Prior to joining RiverNorth Capital, Mr. O'Neill was most recently an Assistant Vice President at Bank of America in the Global Investment Bank's Portfolio Management group. At Bank of America, he specialized in the corporate real estate, asset management, and structured finance industries. Mr. O'Neill graduated magna cum laude from Miami University in Oxford, Ohio with a B.S. in Finance. Mr. O'Neill has received the Chartered Financial Analyst (CFA®) designation, is a member of the CFA Institute, and is a member of the CFA Society of Chicago.

The Fund's Statement of Additional Information provides information about the compensation received by Mr. Galley and Mr. O'Neill, other accounts that they manage and their ownership of Fund shares.

Under a Management Agreement between the Fund and RiverNorth Capital, the Fund pays the adviser a management fee equal to 1.00% of the Fund's average annual daily net assets. For the fiscal year ended September 30, 2020, the aggregate management fee paid by the Fund to RiverNorth Capital was equal to 1.00% of the Fund's average daily net assets. A discussion regarding the basis of the Board of Trustees' approval of the Management Agreement between the Fund and RiverNorth Capital is available in the Fund's semi-annual report to shareholders for the period ended March 31 of each year.

RiverNorth Capital (not the Fund) may pay certain financial institutions (which may include banks, brokers, securities dealers and other industry professionals) a fee for providing distribution related services and/or for performing certain administrative servicing functions for Fund shareholders to the extent these institutions are allowed to do so by applicable statute, rule or regulation.

SHAREHOLDER STATEMENTS AND REPORTS

RiverNorth Funds or your brokerage firm or other intermediary will send you transaction confirmation statements and quarterly account statements. Please review these statements carefully.

The Fund's annual and semi-annual shareholder reports will be made available on the Fund's website at www.RiverNorth.com, and you will be notified by mail each time a report is posted and provided with a website link to access the report. You may elect to receive future reports in paper free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to request paper copies of your shareholder reports. If you invest directly with the Fund, you can call 1-888-848-7569 to let the Fund know you wish to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with RiverNorth Funds.

To reduce expenses and conserve natural resources, RiverNorth Funds will deliver a single copy of prospectuses, financial reports and other notices to individual investors who share a residential address, provided they have the same last name or the Fund reasonably believes they are members of the same family. If you would like to receive separate mailings, please call 1-888-848-7569 and RiverNorth Funds will begin individual delivery within 30 days after RiverNorth Funds receives your instructions.

At least twice a year, you will receive a financial report from the Fund. In addition, you may periodically receive proxy statements and other reports.

FINANCIAL HIGHLIGHTS

The Financial Highlights tables are intended to help you understand the Fund's financial performance during the period of its operations. Certain financial information reflects financial results for a single Fund share. The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Cohen & Company, Ltd., Independent Registered Public Accounting Firm, whose report, along with the Fund's financial statements, are included in the Annual Report contained in the Fund's Form N-CSR, filed with the SEC on December 4, 2020, which is available upon request.

Privacy Policy

The policies and procedures detailed below (“Privacy Policy”) establish the guidelines concerning how RiverNorth Capital Management, LLC and its affiliates¹ (referred to herein collectively as “RiverNorth”) gathers and uses information about you. Please review the Privacy Policy carefully.

Financial companies such as RiverNorth choose how they share your personal information. This Privacy Policy provides information about how we collect, share, and protect your personal information, and how you might choose to limit our ability to share certain information about you.

All financial companies need to share customers’ personal information to run their everyday businesses. Accordingly, your information plays an important role in the success of our business. However, we recognize that you have entrusted us with your personal and financial data, and we recognize our obligation to keep this information secure. Maintaining your privacy is important to us, and we hold ourselves to a high standard in its safekeeping and use. Most importantly, RiverNorth does not sell its customers’ non-public personal information to any third parties. RiverNorth uses its customers’ non-public personal information primarily to complete financial transactions that its customers request or to make its customers aware of other financial products and services offered by RiverNorth.

RiverNorth may collect non-public information about you from the following sources:

- Information we receive about you on applications or other forms;
- Information you may give us orally;
- Information about your transactions with us or others;
- Information you submit to us in correspondence, including emails or other electronic communications; and
- Information about any bank account you use for transfers between your bank account and any Fund account, including information provided when effecting wire transfers.

RiverNorth does not disclose any non-public personal information about our customers or former customers without the customer’s authorization, except that we may disclose the information listed above, as follows:

It may be necessary for RiverNorth to provide information to nonaffiliated third parties in connection with our performance of the services we have agreed to provide you. For example, it might be necessary to do so in order to process transactions and maintain accounts. RiverNorth exercises great care in making sure those entities have safeguards to protect your information and that they do not use your information for other purposes.

RiverNorth will release any of the non-public information listed above about a customer if directed to do so by that customer or if RiverNorth is authorized by law to do so, such as in the case of a court order, legal investigation, or other properly executed governmental request.

¹ This Privacy Policy covers direct clients of RiverNorth Capital Management, LLC and the following funds managed or advised by RiverNorth Capital Management, LLC: RiverNorth Funds, RiverNorth Capital Partners, L.P., RiverNorth Institutional Partners, L.P., RiverNorth Specialty Finance Corporation, RiverNorth Opportunistic Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund, Inc., RiverNorth/DoubleLine Strategic Opportunity Fund, Inc., and RiverNorth Flexible Municipal Income Fund, Inc.

In order to alert a customer to other financial products and services offered by RiverNorth or an affiliate, RiverNorth may share information with an affiliate, including companies using the RiverNorth name or logo. Such products and services may include, for example, other investment products managed by or affiliated with RiverNorth. If you prefer that we not contact you for this purpose or not disclose non-public personal information about you to our affiliates for this purpose, you may direct us not to make such disclosures (other than disclosures permitted by law) by calling 1-800-646-0148, emailing us at info@rivernorth.com or mailing us at 325 North LaSalle Street, Suite 645, Chicago, Illinois 60654. If you limit this sharing and you have a joint account, your decision will be applied to all owners of the account.

We will limit access to your personal account information to those agents and vendors who need to know that information to provide products and services to you. Your information is not provided by us to nonaffiliated third parties for marketing purposes. We maintain physical, electronic, and procedural safeguards to guard your non-public personal information.

As required by federal law, RiverNorth will notify customers of RiverNorth's Privacy Policy annually. RiverNorth reserves the right to modify this policy at any time, but in the event that there is a change, RiverNorth will promptly inform its customers of that change.
