

RIVERNORTH/DOUBLELINE STRATEGIC OPPORTUNITY FUND, INC.

STATEMENT OF ADDITIONAL INFORMATION

RiverNorth/DoubleLine Strategic Opportunity Fund, Inc. (the “Fund”) is a Maryland corporation that is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a diversified, closed-end management investment company. The investment objective of the Fund is current income and overall total return. RiverNorth Capital Management, LLC, the investment adviser of the Fund (“RiverNorth” or the “Adviser”), and DoubleLine® Capital LP, the subadviser of the Fund (“DoubleLine” or the “Subadviser”), will attempt to achieve the Fund’s investment objective by allocating the Fund’s assets among two principal investment strategies: Tactical Closed-End Fund Income Strategy and Opportunistic Income Strategy. See “Investment Objective, Strategies and Policies—Principal Investment Strategies” in the Fund’s Prospectus (as defined below). There is no assurance that the Fund will achieve its investment objective.

This Statement of Additional Information (“SAI”) relating to the shares of common stock of the Fund (the “Common Shares”) is not a prospectus, but should be read in conjunction with the prospectus for the Fund dated September 27, 2016 (the “Prospectus”). This SAI does not include all information that a prospective investor should consider before purchasing Common Shares. Investors should obtain and read the Prospectus prior to purchasing such Common Shares. A copy of the Prospectus may be obtained without charge by calling the Fund at (855) 862-6092.

The Prospectus and this SAI omit certain of the information contained in the registration statement filed with the Securities and Exchange Commission (“SEC”), Washington, D.C. The registration statement may be obtained from the SEC upon payment of the fee prescribed, or inspected at the SEC’s office or via its website (www.sec.gov) at no charge. Capitalized terms used but not defined herein have the meanings ascribed to them in the Prospectus.

This Statement of Additional Information is dated September 27, 2016.

INVESTMENT RESTRICTIONS

Except as otherwise indicated, the Fund's investment policies are not fundamental and may be changed without a vote of shareholders. There can be no assurance the Fund's investment objective will be met.

Any investment restrictions herein that involve a maximum percentage of securities or assets shall not be considered to be violated unless an excess over the percentage occurs immediately after and is caused by an acquisition or encumbrance of securities or assets of, or borrowings by, the Fund.

As a matter of fundamental policy, the Fund will not:

(1) with respect to 75% of its total assets, purchase any securities if, as a result, more than 5% of the Fund's total assets would then be invested in securities of any single issuer or if, as a result, the Fund would hold more than 10% of the outstanding voting securities of any single issuer; provided, that Government securities (as defined in the 1940 Act), securities issued by other investment companies and cash items (including receivables) shall not be counted for purposes of this limitation;

(2) borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time;

(3) issue senior securities, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time;

(4) purchase any security if, as a result, 25% or more of the Fund's total assets (taken at current value) would be invested in a single industry or group of industries, except that the Fund's investments in Underlying Funds shall not be deemed to be investments in a single industry or group of industries, and except that the Fund, under normal circumstances, will invest at least 25% of its total assets in mortgage-backed and other asset-backed securities (including such securities issued or guaranteed as to principal or interest by the U.S. Government or its agencies or instrumentalities) and other investments that the Adviser or the Subadviser considers to have the same primary economic characteristics, and such securities will be considered, solely for the purpose of this restriction, to be issued by issuers in a single industry;

(5) engage in the business of underwriting securities issued by others, except to the extent that the Fund may be deemed to be an underwriter in connection with the disposition of portfolio securities;

(6) purchase or sell real estate. The Fund may, for clarity, (i) purchase interests in issuers which deal or invest in real estate, including limited partnership interests of limited partnerships that invest or deal in real estate, (ii) purchase securities which are secured by real estate or interests in real estate, including real estate mortgage loans, (iii) invest in loans collateralized by real estate and (iv) hold and dispose of real estate or interests in real estate acquired through the exercise of its rights as a holder of investments which are secured by real estate or interests therein. (For purposes of this restriction, investments by the Fund in mortgage-backed securities and other securities representing interests in mortgage pools shall not constitute the purchase or sale of real estate.);

(7) purchase or sell commodities, unless acquired as a result of ownership of securities or other instruments; *provided* that this restriction shall not prohibit the Fund from purchasing or selling options, future contracts and related options thereon, forward contracts, swaps, caps, floors, collars and any other financial instruments or from investing in securities or other instruments backed by physical commodities or as otherwise permitted by the 1940 Act and as interpreted or modified by regulatory authority having jurisdiction, from time to time, or an exemption or other relief applicable to the Fund from the provisions of the 1940 Act, as amended from time to time; or

(8) make loans, except by purchase of debt obligations or other financial instruments in which a Fund may invest consistent with its investment policies, by entering into repurchase agreements, or through the lending of its portfolio securities. A Fund may purchase loan participations or otherwise invest in loans or similar obligations, and may make loans directly to issuers, itself or as part of a lending syndicate.

A fundamental policy may not be changed without the approval of a majority of the outstanding voting securities of the Fund which, under the 1940 Act and the rules thereunder and as used in this SAI, means the lesser of (1) 67% or more of the voting securities present at such meeting, if the holders of more than 50% of the outstanding voting securities of the Fund are present or represented by proxy, or (2) more than 50% of the outstanding voting securities of the Fund.

Fundamental Investment Restriction (2)

The 1940 Act permits the Fund to borrow money in an amount up to one-third of its total assets (including the amount borrowed) less its liabilities (not including any borrowings but including the fair market value at the time of computation of any other senior securities then outstanding). The Fund may also borrow an additional 5% of its total assets without regard to the foregoing limitation for temporary purposes such as clearance of portfolio transactions.

Practices and investments that may involve leverage but are not considered to be borrowings are not subject to the policy. For more information on leverage and the risks relating thereto, see “Risks—Leverage Risks” in the Prospectus.

Fundamental Investment Restriction (3)

The ability of a closed-end fund to issue senior securities is severely circumscribed by complex regulatory constraints under the 1940 Act that restrict, for instance, the amount, timing, and form of senior securities that may be issued. Certain portfolio management techniques, such as reverse repurchase agreements, credit default swaps, futures contracts, the purchase of securities on margin, short sales, or the writing of puts on portfolio securities, may be considered senior securities unless appropriate steps are taken to segregate assets or otherwise cover obligations. To the extent the Fund covers its commitment under these transactions, including by the segregation of liquid assets, such instrument will not be considered a “senior security” by the Fund and therefore will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the Fund (or, as the case may be, the 200% asset coverage requirement applicable to preferred stock).

The Fund does not anticipate issuing any class of equity senior securities within 12 months of the date of this SAI. Under the 1940 Act, the issuance of any other type of senior security by the Fund is subject to a requirement that provision is made that, (i) if on the last business day of each of 12 consecutive calendar months the asset coverage with respect to the senior security is less than 100%, the holders of such securities voting as a class shall be entitled to elect at least a majority of the Board with such voting right to continue until the asset coverage for such class of senior security is at least 110% on the last business day of each of 3 consecutive calendar months or, (ii) if on the last business day of each of 24 consecutive calendar months the asset coverage for such class of senior security is less than 100%, an event of default shall be deemed to have occurred.

Fundamental Investment Restriction (4)

Although the Fund’s investments in Underlying Funds are not deemed to be investments in a particular industry or group of industries, to the extent that the Fund is aware of the investments held by the Underlying Funds, the Fund will consider such information when determining compliance with fundamental investment restriction (4).

Fundamental Investment Restriction (7)

The ability of the Fund to invest directly in commodities, and in certain commodity-related securities and other instruments, is subject to significant limitations in order to enable the Fund to maintain its status as a regulated investment company under the Internal Revenue Code of 1986, as amended (the “Code”).

Fundamental Investment Restriction (8)

The 1940 Act does not prohibit a fund from making loans; however, SEC staff interpretations currently prohibit funds from lending more than one-third of their total assets, except through the purchase of debt obligations or the use of repurchase agreements. A repurchase agreement is an agreement to purchase a security, coupled with an agreement to sell that security back to the original seller on an agreed-upon date at a price that reflects current interest rates. The SEC frequently treats repurchase agreements as loans.

INVESTMENT POLICIES AND TECHNIQUES

The following describes certain investment practices and techniques in which the Fund may engage, and certain of the risks associated with such practices and techniques, and includes a discussion of the spectrum of investments that the Adviser and the Subadviser in their discretion may, but are not required to, use in managing the Fund’s assets.

Certain risks may only apply to a particular investment strategy of the Fund, or may apply to both investment strategies. The following descriptions supplement the descriptions of the investment objective, policies, strategies and risks as set forth in the Fund's Prospectus.

These same investment practices or techniques may be used by the Underlying Funds in which the Fund invests (as described in the Prospectus) and, therefore, the risks described below may apply to the Underlying Funds as well. Furthermore, it is possible that certain types of financial instruments or investment techniques described herein may not be available, permissible, economically feasible or effective for their intended purposes in all markets. Certain practices, techniques or instruments may not be principal activities of the Fund but, to the extent employed, could from time to time have a material impact on the Fund's performance.

Asset-Backed Securities. Asset-backed securities represent direct or indirect participations in, or are secured by and payable from, pools of assets such as, among other things, motor vehicle installment sales contracts, installment loan contracts, leases of various types of real and personal property, and receivables from revolving credit (credit card) agreements or a combination of the foregoing. These assets are securitized through the use of trusts and special purpose entities. Credit enhancements, such as various forms of cash collateral accounts or letters of credit, may support payments of principal and interest on asset-backed securities. Although these securities may be supported by letters of credit or other credit enhancements, payment of interest and principal ultimately depends upon individuals paying the underlying loans or accounts, which payment may be adversely affected by general downturns in the economy. Asset-backed securities are subject to prepayment risk. There is risk that recovery on repossessed collateral might be unavailable or inadequate to support payments on the underlying investments.

Below Investment Grade Securities. The Fund and the Underlying Funds may invest in below investment grade securities, which are commonly referred to as "junk" or "high yield" securities. These securities are considered to be high-risk investments. The risks include the following:

Greater Risk of Loss. These securities are regarded as predominately speculative. There is a greater risk that issuers of lower-rated securities will default than issuers of higher-rated securities. Issuers of lower-rated securities generally are less creditworthy and may be highly indebted, financially distressed or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, below investment grade securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, the fund would experience a decrease in income and a decline in the market value of its investments. The fund also may incur additional expenses in seeking recovery from the issuer.

Sensitivity to Interest Rate and Economic Changes. The income and market value of lower-rated securities may fluctuate more than higher-rated securities. Although certain below investment grade securities may be less sensitive to interest rate changes than investment grade securities, below investment grade securities generally are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn.

Valuation Difficulties. It is often more difficult to value lower-rated securities than higher-rated securities. If an issuer's financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower-rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower-rated securities, valuation of such investments is much more dependent on judgment than is the case with higher-rated securities.

Liquidity. There may be no established secondary or public market for investments in lower-rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher-rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, lower-rated securities may be required to be sold at substantial losses or retained indefinitely even where an issuer's financial condition is deteriorating.

Credit Quality. Credit quality of below investment grade securities can change suddenly and unexpectedly, and even recently-issued credit ratings may not fully reflect the actual risks posed by a particular below investment grade security.

New Legislation. Future legislation may have a possible negative impact on the market for below investment grade securities.

Borrowing. The Fund may borrow funds and/or issue preferred stock, notes or other debt securities to the extent permitted by the 1940 Act for investment and other purposes, such as for satisfying Common Share repurchase requests (if any) or to otherwise provide the Fund with liquidity. The Fund's use of leverage may include borrowing through a line of credit with a bank or other financial institution. Under the requirements of the 1940 Act, the Fund, immediately after any borrowing, must have an "asset coverage" of at least 300% (*i.e.*, such indebtedness may not exceed 33-1/3% of the value of the Fund's total assets including the amount borrowed). With respect to such borrowing, asset coverage means the ratio which the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of such borrowing represented by senior securities issued by the Fund. Under the 1940 Act, the Fund is also not permitted to issue preferred stock unless immediately after such issuance the total asset value of the Fund's portfolio is at least 200% of the liquidation value of the outstanding preferred stock (*i.e.*, such liquidation value may not exceed 50% of the Fund's total assets).

The use of borrowing by the Fund involves special risk considerations that may not be associated with other funds having similar policies. Because substantially all of the Fund's assets fluctuate in value, whereas the interest obligation resulting from a borrowing may be fixed by the terms of the Fund's agreement with its lender, the net asset value ("NAV") per Common Share of the Fund will tend to increase more when its portfolio securities increase in value and decrease more when its portfolio securities decrease in value than would otherwise be the case if the Fund did not borrow funds. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales. The interest that the Fund must pay on borrowed money, together with any additional fees to establish and maintain a borrowing facility, are additional costs that will reduce or eliminate any net investment income and may also offset any potential capital gains. Unless appreciation and income, if any, on assets acquired with borrowed funds exceed the costs of borrowing, the use of leverage will diminish the investment performance of the Fund compared with what it would have been without leverage. See "Use of Leverage" and "Risks—Leverage Risks" in the Fund's Prospectus.

Closed-End Funds. The Fund may invest in shares of closed-end funds offered in initial or secondary offerings or through purchasing shares in the secondary market. An initial public offering of closed-end fund shares is typically distributed by a group of underwriters who retain a spread or underwriting commission based on the initial public offering price. Such shares are then listed for trading on an exchange and, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end fund, investors seek to buy and sell shares of closed-end funds in the secondary market. The Fund will incur normal brokerage costs on its secondary purchases similar to the expenses the Fund would incur for the purchase of securities of any other type of issuer in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share that is less than the NAV per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined NAV but, rather, are subject to supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their NAV.

The Fund may invest in shares of closed-end funds that are trading at a discount to NAV or at a premium to NAV. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the NAV of the Common Shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and NAV than an investment in shares of investment companies without a leveraged capital structure.

Convertible Securities. The Underlying Funds may invest in convertible securities pursuant to the Tactical Closed-End Fund Income Strategy. Convertible securities are generally bonds, debentures, notes, preferred securities or other securities or investments that may be converted or exchanged into equity securities (and/or cash or cash equivalents) which may be at a stated exchange ratio or predetermined price (the “conversion price”). A convertible security is designed to provide current income and also the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. Accordingly, these equity-linked instruments offer the potential for equity market participation with potential mitigated downside risk in periods of equity market declines.

A convertible security generally entitles the holder to receive interest paid or accrued until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities have characteristics similar to non-convertible debt obligations and are designed to provide for a stable stream of income with generally higher yields than common stocks. However, there can be no assurance of current income because the issuers of the convertible securities may default on their obligations. In addition, the Fund may invest in zero coupon convertible securities. Zero coupon securities are debt securities which are issued at a discount to their value at maturity and do not entitle the holder to any periodic payments of interest prior to maturity. Rather, when a zero coupon security is held to maturity, its entire income return, which consists of accretion of discount, comes from the difference between its purchase price and its maturity value. Zero coupon convertible securities are convertible into a specific number of shares of the issuer’s common stock and may have put features that provide the holder with the opportunity to sell the securities back to the issuer at a stated price before maturity. Generally, the prices of zero coupon convertible securities may be more sensitive to market interest rate fluctuations than conventional convertible securities.

Convertible securities rank senior to common stock in a corporation’s capital structure and, therefore, generally entail less risk than the corporation’s common stock. Convertible debt securities may be subordinate in rank to any senior debt obligations of the issuer and, therefore, such subordinated convertible debt securities entail more risk than its senior debt obligations. Convertible preferred securities also may be subordinated to debt instruments and non-convertible series of preferred securities in a company’s capital structure in terms of having priority to corporate income, claims to corporate assets and liquidation payments, and therefore convertible preferred securities may be subject to greater credit risk than more senior debt instruments. As such, convertible securities are often rated below investment grade or not rated because they fall below debt obligations and just above common stock in order of preference or priority on an issuer’s balance sheet. Below investment grade securities are commonly referred to as “junk bonds.” To the extent that the Fund invests in convertible securities with credit ratings below investment grade, such securities may have a higher likelihood of default.

A convertible security may contain features that limit an investor’s ability to convert the security into common stock unless certain conditions are met. A typical feature may require that a security be convertible only when the sale price of the underlying common stock exceeds the conversion price by a specified percentage (e.g., the sale price of the common stock is greater than or equal to 130% of the conversion price) for a certain specified period of time (e.g., for at least 20 days during a span of 30 consecutive days in a month), or upon the occurrence of certain other specified conditions. In addition, a convertible security may be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock or sell it to a third party, which may have an adverse effect on the Fund’s ability to achieve its investment objective.

Convertible securities have valuation characteristics similar to both debt and equity securities. Convertible securities generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of the potential for capital appreciation. The value of convertible securities is influenced by both the yield of non-convertible securities of comparable issuers and by the value of the underlying common stock. The value of a convertible security viewed without regard to its conversion feature (i.e., strictly on the basis of its yield) is sometimes referred to as its “investment value.” The investment value of the convertible security typically will fluctuate based on the credit quality of the issuer and will fluctuate inversely with changes in prevailing interest rates. However, at the same time, the value of a convertible security will be influenced by its “conversion value,” which is the market value of the underlying common stock that would be obtained if the convertible security were converted. Conversion value fluctuates directly with the price of the underlying common stock, and will therefore be subject to risks relating to the

activities of the issuer of the underlying common stock and general market and economic conditions. Depending upon the relationship of the conversion price to the market value of the underlying security, a convertible security may trade more like an equity security than a debt instrument.

If, because of a low price of the common stock, the conversion value is substantially below the investment value of the convertible security, the price of the convertible security is governed principally by its investment value. Generally, if the conversion value of a convertible security increases to a point that approximates or exceeds its investment value, the value of the security will be principally influenced by its conversion value. A convertible security will sell at a premium over its conversion value to the extent investors place value on the right to acquire the underlying common stock while holding an income-producing security.

Debt and preferred securities with warrants attached to purchase equity securities have economic characteristics similar to convertible securities and their prices may, to some degree, reflect the performance of the underlying stock. A warrant is a right to purchase common stock at a specific price (usually at a premium above the market value of the underlying common stock at the time of issuance) during a specified period of time.

Mandatory Convertible Securities. Mandatory convertible securities are distinguished as a subset of convertible securities because the conversion is not optional and the conversion price at maturity (or redemption) is based solely upon the market price of the underlying common stock, which may be significantly less than par or the price (above or below par) paid. Mandatory convertible securities automatically convert to equity securities at maturity. For these reasons, the risks associated with investing in mandatory convertible securities most closely resemble the risks inherent in equity securities. Mandatory convertible securities customarily pay a higher coupon yield to compensate for the potential risk of additional price volatility and loss upon redemption. Since the correlation of common stock risk increases as the security approaches its redemption date, there can be no assurance that the higher coupon will compensate for the potential loss.

Contingent Convertible Securities. Similar to mandatory convertible securities (and unlike traditional convertible securities), contingent convertible securities generally provide for mandatory conversion into common stock of the issuer under certain circumstances. The mandatory conversion might be automatically triggered, for instance, if a company fails to meet the minimum amount of capital described in the security, the company's regulator makes a determination that the security should convert or the company receives specified levels of extraordinary public support. Since the common stock of the issuer may not pay a dividend, investors in these instruments could experience a reduced income rate, potentially to zero; and conversion would deepen the subordination of the investor, hence worsening standing in a bankruptcy. In addition, some contingent convertible securities have a set stock conversion rate that would cause a reduction in value of the security if the price of the stock is below the conversion price on the conversion date.

Exchangeable Debt Securities. Exchangeable debt securities are convertible debt securities in which the underlying common stock is issued by an entity that is different than the issuer of the convertible securities, often a subsidiary of the issuer. The valuation of an exchangeable debt security is similar to that of a convertible debt security, with the conversion value influenced by the underlying common stock issuer.

Synthetic Convertible Securities. A synthetic convertible security is a derivative position composed of two or more distinct securities whose economic characteristics, when taken together, resemble those of traditional convertible securities, i.e., an income-producing security ("income-producing component") and the right to acquire an equity security ("convertible component"). For example, the income-producing component may be achieved by purchasing non-convertible income-producing securities such as bonds, preferred securities or money market instruments and the convertible component may be achieved through warrants or options to buy common stock at a certain exercise price, or options on a stock index.

Synthetic convertible securities are typically offered by financial institutions in private placement transactions and are typically sold back to the offering institution. Upon conversion, the holder generally receives from the offering institution an amount in cash equal to the difference between the conversion price and the then-current value of the underlying security. Synthetic convertible securities created by other parties generally have the same attributes of a traditional convertible security; however, the issuer of the synthetic convertible security assumes the credit risk associated with the investment, rather than the issuer of the underlying equity security into which the instrument is convertible. Therefore, the Fund is subject to the credit risk associated with the counterparty creating the synthetic convertible instrument. The Fund may also create synthetic convertible securities itself by purchasing the separate component securities.

Synthetic convertible securities may differ from traditional convertible securities in several respects. The value of a synthetic convertible is the sum of the values of its income-producing component and its convertible component. Thus, the values of a synthetic convertible and a traditional convertible security will respond differently to market fluctuations. If the value of the underlying common stock or the level of the index involved in the convertible component falls below the exercise price of the warrant or option, the warrant or option may lose all value.

Purchasing a synthetic convertible security may provide greater flexibility than purchasing a traditional convertible security, including the ability to combine components representing distinct issuers or to combine a fixed income security with a call option on a stock index. In addition, synthetic convertible securities may alter the characteristics common to traditional convertible securities such as by offering enhanced yields in exchange for reduced capital appreciation or less downside protection. The component parts of a synthetic convertible security may be purchased simultaneously or separately.

The holder of a synthetic convertible faces the risk that the price of the stock, or the level of the market index underlying the convertible component, will decline. In addition, in purchasing a synthetic convertible security, a Fund may have counterparty risk with respect to the financial institution that offers the instrument or with respect to the institution that issued the income-producing component of the convertible security when such an institution is not the financial institution creating the synthetic convertible security. Synthetic convertible securities are also subject to the risks associated with derivatives. See “—Derivatives.”

Corporate Debt Securities. Corporate debt securities are debt obligations issued by U.S. and foreign corporations and other business entities to borrow money from investors. Corporate debt securities may be either secured or unsecured. Collateral used for secured debt includes, but is not limited to, real property, machinery, equipment, accounts receivable, stocks, bonds, or notes. If a bond is unsecured, it is known as a debenture. Holders of corporate debt securities, as creditors, have a prior legal claim over common and preferred stockholders as to both income and assets of the corporation for the principal and interest due them and may have a prior claim over other creditors if liens or mortgages are involved. Interest on corporate debt securities may be fixed rate, floating rate, adjustable rate, zero coupon, contingent, deferred, or have payment-in-kind features. Interest on corporate debt securities is typically paid semi-annually and is fully taxable to the holder of such securities. Corporate debt securities contain elements of both interest rate risk and credit risk. The market value of a corporate debt security generally may be expected to rise and fall inversely with interest rates and may also be affected by the credit rating of the corporation, the corporation’s performance, and perceptions of the corporation in the marketplace. Corporate debt securities usually yield more than government or agency securities due to the presence of credit risk. See “Additional Risks of Investing in the Fund—Fixed Income Securities Risk.”

Depository Receipts. The Fund and the Underlying Funds may invest in sponsored and unsponsored American Depository Receipts (“ADRs”). ADRs are receipts issued by an American bank or trust company evidencing ownership of underlying securities issued by a foreign issuer. ADRs, in sponsored form, are designed for use in U.S. securities markets. A sponsoring company provides financial information to the bank and may subsidize administration of the ADR. Unsponsored ADRs may be created by a broker-dealer or depository bank without the participation of the foreign issuer. Holders of these ADRs generally bear all the costs of the ADR facility, whereas foreign issuers typically bear certain costs in a sponsored ADR. The bank or trust company depository of an unsponsored ADR may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Unsponsored ADRs may carry more risk than sponsored ADRs because of the absence of financial information provided by the underlying company. Many of the risks described below regarding foreign securities apply to investments in ADRs.

Derivatives. The Fund intends to utilize various other investment strategies as described below for a variety of purposes, such as hedging various market risks or enhancing return. These strategies may be executed through the use of derivative contracts. The Underlying Funds may also utilize derivative contracts and are thus subject to the same risks described below.

In the course of pursuing these investment strategies, the Fund may purchase and sell exchange-listed and over-the-counter put and call options on securities, equity and fixed-income indices and other instruments, purchase and sell futures contracts and options thereon, enter into various transactions such as swaps, caps, floors, collars, currency forward contracts, currency futures contracts, currency swaps or options on currencies, or currency futures and various other currency transactions (collectively, all the above are called “Derivative Transactions”). In addition, Derivative Transactions may also include new techniques, instruments or strategies that are permitted as regulatory changes

occur. Derivative Transactions may be used without limit (subject to certain limits imposed by the 1940 Act) to attempt to protect against possible changes in the market value of securities held in or to be purchased for the Fund's portfolio resulting from securities markets or currency exchange rate fluctuations, to protect the Fund's unrealized gains in the value of its portfolio securities, to facilitate the sale of such securities for investment purposes, to manage the effective maturity or duration of the Fund's portfolio, or to establish a position in the derivatives markets as a substitute for purchasing or selling particular securities. Some Derivative Transactions may also be used to enhance potential gain. Any or all of these investment techniques may be used at any time and in any combination, and there is no particular strategy that dictates the use of one technique rather than another, as use of any Derivative Transaction is a function of numerous variables including, but not limited to, market conditions. The ability of the Fund to utilize these Derivative Transactions successfully will depend on the Adviser's or Subadviser's ability to predict pertinent market movements, which cannot be assured. The Fund's use of Derivative Transactions may also be limited by the requirements of the Code for qualification as a regulated investment company for U.S. federal income tax purposes. The Fund will comply with applicable regulatory requirements when implementing these strategies, techniques and instruments. Derivative Transactions will not be used to alter fundamental investment purposes and characteristics of the Fund, and the Fund will segregate assets (or as provided by applicable regulations, enter into certain offsetting positions) to cover its obligations under options, futures and swaps to limit leveraging of the Fund.

Derivative Transactions, including derivative contracts, have risks associated with them including, but not limited to, possible default by the other party to the transaction, illiquidity and, to the extent the Adviser's or Subadviser's view as to certain market movements is incorrect, the risk that the use of such Derivative Transactions could result in losses greater than if they had not been used. Use of Derivative Transactions may result in losses to the Fund, force the sale or purchase of portfolio securities at inopportune times or for prices higher than or lower than current market values, limit the amount of appreciation the Fund can realize on its investments or cause the Fund to hold a security it might otherwise sell. The use of currency transactions can result in the Fund incurring losses as a result of a number of factors including the imposition of exchange controls, suspension of settlements or the inability to deliver or receive a specified currency.

The use of options and futures transactions entails certain other risks. In particular, the variable degree of correlation between price movements of futures contracts and price movements in the related portfolio position of the Fund creates the possibility that losses on the hedging instrument may be greater than gains in the value of the Fund's position. In addition, futures and options markets may not be liquid in all circumstances and certain over-the-counter options may have no markets. As a result, in certain markets, the Fund might not be able to close out a transaction without incurring substantial losses, if at all. Although the use of futures and options transactions for hedging should tend to minimize the risk of loss due to a decline in the value of the hedged position, at the same time they tend to limit any potential gain which might result from an increase in value of such position. Finally, the daily variation margin requirements for futures contracts would create a greater ongoing potential financial risk than would purchases of options, where the exposure is limited to the cost of the initial premium. Losses resulting from the use of Derivative Transactions would reduce NAV, and possibly income, and such losses can be greater than if the Derivative Transactions had not been utilized.

General Characteristics of Options. Put options and call options typically have similar structural characteristics and operational mechanics regardless of the underlying instrument on which they are purchased or sold. Thus, the following general discussion relates to each of the particular types of options discussed in greater detail below. In addition, many Derivative Transactions involving options require segregation of Fund assets in special accounts, as described below under "—Segregation and Cover Requirements."

A put option gives the purchaser of the option, upon payment of a premium, the right to sell, and the writer the obligation to buy, the underlying security, commodity, index, currency or other instrument at the exercise price. For instance, the Fund's purchase of a put option on a security might be designed to protect its holdings in the underlying instrument (or, in some cases, a similar instrument) against a substantial decline in the market value by giving the Fund the right to sell such instrument at the option exercise price. A call option, upon payment of a premium, gives the purchaser of the option the right to buy, and the seller the obligation to sell, the underlying instrument at the exercise price. The Fund's purchase of a call option on a security, financial future, index, currency or other instrument might be intended to protect the Fund against an increase in the price of the underlying instrument that it intends to purchase in the future by fixing the price at which it may purchase such instrument. An American style put or call option may be exercised at any time during the option period while a European style put or call option may be exercised only upon expiration or during a fixed period prior thereto. The Fund is authorized to purchase and sell exchange listed options

and over-the-counter options (“OTC options”). Exchange listed options are issued by a regulated intermediary such as the Options Clearing Corporation (“OCC”), which guarantees the performance of the obligations of the parties to such options. The discussion below uses the OCC as an example, but is also applicable to other financial intermediaries.

With certain exceptions, OCC issued and exchange listed options generally settle by physical delivery of the underlying security or currency, although in the future cash settlement may become available. Index options and Eurodollar instruments are cash settled for the net amount, if any, by which the option is “in-the-money” (*i.e.*, where the value of the underlying instrument exceeds, in the case of a call option, or is less than, in the case of a put option, the exercise price of the option) at the time the option is exercised. Frequently, rather than taking or making delivery of the underlying instrument through the process of exercising the option, listed options are closed by entering into offsetting purchase or sale transactions that do not result in ownership of the new option.

The Fund’s ability to close out its position as a purchaser or seller of an OCC or exchange listed put or call option is dependent, in part, upon the liquidity of the option market. Among the possible reasons for the absence of a liquid option market on an exchange are: (i) insufficient trading interest in certain options; (ii) restrictions on transactions imposed by an exchange; (iii) trading halts, suspensions or other restrictions imposed with respect to particular classes or series of options or underlying securities including reaching daily price limits; (iv) interruption of the normal operations of the OCC or an exchange; (v) inadequacy of the facilities of an exchange or OCC to handle current trading volume; or (vi) a decision by one or more exchanges to discontinue the trading of options (or a particular class or series of options), in which event the relevant market for that option on that exchange would cease to exist, although outstanding options on that exchange would generally continue to be exercisable in accordance with their terms.

The hours of trading for listed options may not coincide with the hours during which the underlying financial instruments are traded. To the extent that the option markets close before the markets for the underlying financial instruments, significant price and rate movements can take place in the underlying markets that cannot be reflected in the option markets.

OTC options are purchased from or sold to securities dealers, financial institutions or other parties (“Counterparties”) through direct bilateral agreement with the Counterparty. In contrast to exchange listed options, which generally have standardized terms and performance mechanics, all the terms of an OTC option, including such terms as method of settlement, term, exercise price, premium, guarantees and security, are set by negotiation of the parties. The Fund will only sell OTC options (other than OTC currency options) that are subject to a buy-back provision permitting the Fund to require the Counterparty to sell the option back to the Fund at a formula price within seven days. The Fund expects generally to enter into OTC options that have cash settlement provisions, although it is not required to do so.

Unless the parties provide for it, there is no central clearing or guaranty function in an OTC option. As a result, if the Counterparty fails to make or take delivery of the security, currency or other instrument underlying an OTC option it has entered into with the Fund or fails to make a cash settlement payment due in accordance with the terms of that option, the Fund will lose any premium it paid for the option as well as any anticipated benefit of the transaction. Accordingly, the Adviser or Subadviser, as applicable, must assess the creditworthiness of each such Counterparty or any guarantor or credit enhancement of the Counterparty’s credit to determine the likelihood that the terms of the OTC option will be satisfied. The Fund will engage in OTC option transactions only with U.S. government securities dealers recognized by the Federal Reserve Bank of New York as “primary dealers” or broker/dealers, domestic or foreign banks or other financial institutions which have received (or the guarantors of the obligation of which have received) a short-term credit rating of “A-1” from Standard & Poor’s Ratings Services, a Standard & Poor’s Financial Services LLC business (“S&P”) or “P-1” from Moody’s Investor Services, Inc. (“Moody’s”) or an equivalent rating from any nationally recognized statistical rating organization (“NRSRO”) or, in the case of OTC currency options, are determined to be of equivalent credit quality by the Adviser or Subadviser, as applicable. The staff of the SEC currently takes the position that OTC options purchased by the Fund, and portfolio securities “covering” the amount of the Fund’s obligation pursuant to an OTC option sold by it (the cost of the sell-back plus the in-the-money amount, if any) are illiquid.

If the Fund sells a call option, the premium that it receives may serve as a partial hedge, to the extent of the option premium, against a decrease in the value of the underlying securities or instruments in its portfolio or will increase the Fund’s income. The sale of put options can also provide income.

The Fund may purchase and sell call options on securities including U.S. Treasury and agency securities, mortgage-backed securities, foreign sovereign debt, corporate debt securities, equity securities (including convertible securities) and Eurodollar instruments that are traded on U.S. and foreign securities exchanges and in the over-the-counter

markets, and on securities indices, currencies and futures contracts. All calls sold by the Fund must be “covered” (*i.e.*, the Fund must own the securities or futures contract subject to the call) or must meet the asset segregation requirements described below as long as the call is outstanding. Even though the Fund will receive the option premium to help protect it against loss, a call sold by the Fund exposes the Fund during the term of the option to possible loss of opportunity to realize appreciation in the market price of the underlying security or instrument and may require the Fund to hold a security or instrument which it might otherwise have sold.

The Fund may purchase and sell put options on securities including U.S. Treasury and agency securities, mortgage-backed securities, foreign sovereign debt, corporate debt securities, equity securities (including convertible securities) and Eurodollar instruments (whether or not it holds the above securities in its portfolio), and on securities indices, currencies and futures contracts other than futures on individual corporate debt and individual equity securities. In selling put options, there is a risk that the Fund may be required to buy the underlying security at a disadvantageous price above the market price.

General Characteristics of Futures. The Fund may enter into futures contracts or purchase or sell put and call options on such futures as a hedge against anticipated interest rate, currency or equity market changes or to enhance returns. Futures are generally bought and sold on the commodities exchanges where they are listed with payment of initial and variation margin as described below. The sale of a futures contract creates a firm obligation by the Fund, as seller, to deliver to the buyer the specific type of financial instrument called for in the contract at a specific future time for a specified price (or, with respect to index futures and Eurodollar instruments, the net cash amount). Options on futures contracts are similar to options on securities except that an option on a futures contract gives the purchaser the right in return for the premium paid to assume a position in a futures contract and obligates the seller to deliver such position.

Typically, maintaining a futures contract or selling an option thereon requires the Fund to deposit with a financial intermediary as security for its obligations an amount of cash or other specified assets (initial margin), which initially is typically 1% to 10% of the face amount of the contract (but may be higher in some circumstances). Additional cash or assets (variation margin) may be required to be deposited thereafter on a daily basis as the mark-to-market value of the contract fluctuates. The purchase of an option on financial futures involves payment of a premium for the option without any further obligation on the part of the Fund. If the Fund exercises an option on a futures contract it will be obligated to post initial margin (and potential subsequent variation margin) for the resulting futures position just as it would for any position. Futures contracts and options thereon are generally settled by entering into an offsetting transaction but there can be no assurance that the position can be offset prior to settlement at an advantageous price, nor that delivery will occur.

Options on Securities Indices and Other Financial Indices. The Fund also may purchase and sell call and put options on securities indices and other financial indices and in so doing can achieve many of the same objectives it would achieve through the sale or purchase of options on individual securities or other instruments. Options on securities indices and other financial indices are similar to options on a security or other instrument except that, rather than settling by physical delivery of the underlying instrument, they settle by cash settlement, *i.e.*, an option on an index gives the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the index upon which the option is based exceeds, in the case of a call, or is less than, in the case of a put, the exercise price of the option (except if, in the case of an OTC option, physical delivery is specified). This amount of cash is equal to the excess of the closing price of the index over the exercise price of the option, which also may be multiplied by a formula value. The seller of the option is obligated, in return for the premium received, to make delivery of this amount. The gain or loss on an option on an index depends on price movements in the instruments making up the market, market segment, industry or other composite on which the underlying index is based, rather than price movements in individual securities, as is the case with respect to options on securities.

Eurodollar Instruments. Eurodollar instruments are U.S. dollar-denominated futures contracts or options thereon that are linked to the LIBOR, although foreign currency-denominated instruments are available from time to time. Eurodollar futures contracts enable purchasers to obtain a fixed rate for the lending of funds and sellers to obtain a fixed rate for borrowings. The Fund might use Eurodollar futures contracts and options thereon to hedge against changes in LIBOR, to which many interest rate swaps and fixed income instruments are linked.

Foreign Currencies. Because investments in foreign securities usually will involve currencies of foreign countries, and because the Fund may hold foreign currencies and forward contracts, futures contracts and options on foreign currencies and foreign currency futures contracts, the value of the assets of the Fund as measured in U.S. dollars may

be affected favorably or unfavorably by changes in foreign currency exchange rates and exchange control regulations, and the Fund may incur costs and experience conversion difficulties and uncertainties in connection with conversions between various currencies. Fluctuations in exchange rates may also affect the earning power and asset value of the foreign entity issuing the security.

The strength or weakness of the U.S. dollar against these currencies is responsible for part of the Fund's investment performance. If the dollar falls in value relative to the Japanese yen, for example, the dollar value of a Japanese stock held in the portfolio will rise even though the price of the stock remains unchanged. Conversely, if the dollar rises in value relative to the yen, the dollar value of the Japanese stock will fall. Many foreign currencies have experienced significant devaluation relative to the dollar.

Although the Fund values its assets daily in terms of U.S. dollars, it may not convert its holdings of foreign currencies into U.S. dollars on a daily basis. Investors should be aware of the costs of currency conversion. Although foreign exchange dealers do not charge a fee for conversion, they do realize a profit based on the difference (the "spread") between the prices at which they are buying and selling various currencies. Thus, a dealer may offer to sell a foreign currency to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire to resell that currency to the dealer. The Fund will conduct its foreign currency exchange transactions either on a spot (*i.e.*, cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into options or forward or futures contracts to purchase or sell foreign currencies.

Currency Transactions. The Fund may engage in currency transactions with Counterparties primarily in order to hedge, or manage the risk of the value of portfolio holdings denominated in particular currencies against fluctuations in relative value, or to enhance return. Currency transactions include forward currency contracts, exchange listed currency futures, exchange listed and OTC options on currencies, and currency swaps. A forward currency contract involves a privately negotiated obligation to purchase or sell (with delivery generally required) a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. A currency swap is an agreement to exchange cash flows based on the notional difference among two or more currencies and operates similarly to an interest rate swap, which is described below.

Transaction hedging is entering into a currency transaction with respect to specific assets or liabilities of the Fund, which will generally arise in connection with the purchase or sale of its portfolio securities or the receipt of income therefrom. Position hedging is entering into a currency transaction with respect to portfolio security positions denominated or generally quoted in that currency.

The Fund may also cross-hedge currencies by entering into transactions to purchase or sell one or more currencies that are expected to decline in value relative to other currencies to which the Fund has or in which the Fund expects to have portfolio exposure.

To reduce the effect of currency fluctuations on the value of existing or anticipated holdings of portfolio securities, the Fund may also engage in proxy hedging. Proxy hedging is often used when the currency to which the Fund's portfolio is exposed is difficult to hedge or to hedge against the dollar. Proxy hedging entails entering into a commitment or option to sell a currency whose changes in value are generally considered to be correlated to a currency or currencies in which some or all of the Fund's portfolio securities are or are expected to be denominated, in exchange for U.S. dollars. The amount of the commitment or option would not exceed the value of the Fund's securities denominated in correlated currencies. For example, if the Adviser considers that the Austrian schilling is correlated to the German deutschemark (the "D-mark"), the Fund holds securities denominated in schillings and the Adviser believes that the value of schillings will decline against the U.S. dollar, the Adviser may enter into a commitment or option to sell D-marks and buy dollars. Currency hedging involves some of the same risks and considerations as other transactions with similar instruments. Currency transactions can result in losses to the Fund if the currency being hedged fluctuates in value to a degree or in a direction that is not anticipated. Further, there is the risk that the perceived correlation between various currencies may not be present or may not be present during the particular time that the Fund is engaging in proxy hedging. If the Fund enters into a currency hedging transaction, the Fund will comply with the asset segregation requirements described below.

Risks of Currency Transactions. Currency transactions are subject to risks different from those of other portfolio transactions. Because currency control is of great importance to the issuing governments and influences economic planning and policy, purchases and sales of currency and related instruments can be negatively affected by government exchange controls, blockages, and manipulations or exchange restrictions imposed by governments. These can result in losses to the Fund if it is unable to deliver or receive currency or funds in settlement of obligations and could also cause

hedged it has entered into to be rendered useless, resulting in full currency exposure as well as incurring transaction costs. Buyers and sellers of currency futures are subject to the same risks that apply to the use of futures generally. Further, settlement of a currency futures contract for the purchase of most currencies must occur at a bank based in the issuing nation. Trading options on currency futures is relatively new, and the ability to establish and close out positions on such options is subject to the maintenance of a liquid market which may not always be available. Currency exchange rates may fluctuate based on factors extrinsic to that country's economy.

Risks of Derivative Transactions Outside the United States. When conducted outside the United States, Derivative Transactions may not be regulated as rigorously as in the United States, may not involve a clearing mechanism and related guarantees, and are subject to the risk of governmental actions affecting trading in, or the prices of, foreign securities, currencies and other instruments. The value of such positions also could be adversely affected by: (i) other complex foreign political, legal and economic factors; (ii) lesser availability than in the United States of data on which to make trading decisions; (iii) delays in the Fund's ability to act upon economic events occurring in foreign markets during non-business hours in the United States; (iv) the imposition of different exercise and settlement terms and procedures and margin requirements than in the United States; and (v) lower trading volume and liquidity.

Swaps, Caps, Floors and Collars. Among the Derivative Transactions into which the Fund may enter are interest rate, currency, index and other swaps and the purchase or sale of related caps, floors and collars. The Fund expects to enter into these transactions primarily to preserve a return or spread on a particular investment or portion of its portfolio, to protect against currency fluctuations, as a duration management technique or to protect against any increase in the price of securities the Fund anticipates purchasing at a later date. The Fund will not sell interest rate caps or floors where it does not own securities or other instruments providing the income stream the Fund may be obligated to pay. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed rate payments with respect to a notional amount of principal. A currency swap is an agreement to exchange cash flows on a notional amount of two or more currencies based on the relative value differential among them and an index swap is an agreement to swap cash flows on a notional amount based on changes in the values of the reference indices. The purchase of a cap entitles the purchaser to receive payments on a notional principal amount from the party selling such cap to the extent that a specified index exceeds a predetermined interest rate or amount. The purchase of a floor entitles the purchaser to receive payments on a notional principal amount from the party selling such floor to the extent that a specified index falls below a predetermined interest rate or amount. A collar is a combination of a cap and a floor that preserves a certain return within a predetermined range of interest rates or values.

The Fund will usually enter into swaps on a net basis, i.e., the two payment streams are netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Inasmuch as the Fund will segregate assets (or enter into offsetting positions) to cover its obligations under swaps, the Fund believes such obligations do not constitute senior securities under the 1940 Act and, accordingly, will not treat them as being subject to its borrowing restrictions. If there is a default by the Counterparty, the Fund may have contractual remedies pursuant to the agreements related to the transaction.

Credit Default Swap Agreements. The Fund may enter into credit default swap agreements. The "buyer" in a credit default contract is obligated to pay the "seller" a periodic stream of payments over the term of the contract *provided* that no event of default on an underlying reference obligation has occurred. If an event of default occurs, the seller must pay the buyer the full notional value, or "par value," of the reference obligation. Credit default swap transactions are either "physical delivery" settled or "cash" settled. Physical delivery entails the actual delivery of the reference asset to the seller in exchange for the payment of the full par value of the reference asset. Cash settled entails a net cash payment from the seller to the buyer based on the difference of the par value of the reference asset and the current value of the reference asset that may have, through default, lost some, most or all of its value. The Fund may be either the buyer or seller in a credit default swap transaction. If the Fund is a buyer and no event of default occurs, the Fund will have made a series of periodic payments and recover nothing of monetary value. However, if an event of default occurs, the Fund (if the buyer) will receive the full notional value of the reference obligation either through a cash payment in exchange for the asset or a cash payment in addition to owning the reference assets. As a seller, the Fund receives a fixed rate of income throughout the term of the contract, which typically is between six months and five years, *provided* that there is no event of default. If an event of default occurs, the seller must pay the buyer the full notional value of the reference obligation.

Credit default swap transactions involve greater risks than if the Fund had invested in the reference obligation directly. In addition to general market risks, credit default swaps are subject to liquidity risk, counterparty risk and credit risks, each as further described below. Moreover, if the Fund is a buyer, it will lose its investment and recover nothing should no event of default occur. If an event of default were to occur, the value of the reference obligation received by the seller, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund. When the Fund acts as a seller of a credit default swap agreement it is exposed to the risks of leverage since if an event of default occurs the seller must pay the buyer the full notional value of the reference obligation. Accordingly, when the Fund acts as a seller of a credit default swap agreement, it will segregate assets equal to the full notional amount of the reference obligation.

A credit default index swap is a swap on an index of credit default swaps. Credit default index swaps allow an investor to manage credit risk or to take a position on a basket of credit default swaps (or other instruments) in a more efficient manner than transacting in single name credit default swaps. If a credit event occurs in one of the underlying companies, the protection is paid out via the delivery of the defaulted bond by the buyer of protection in return for payment of the notional value of the defaulted bond by the seller of protection or it may be settled through a cash settlement between the two parties. The underlying company is then removed from the index.

Structured Notes. Structured notes are derivative debt securities, the interest rate or principal of which is determined by reference to changes in value of a specific security, reference rate, or index. Indexed securities, similar to structured notes, are typically, but not always, debt securities whose value at maturity or coupon rate is determined by reference to other securities. The performance of a structured note or indexed security is based upon the performance of the underlying instrument.

The terms of a structured note may provide that, in certain circumstances, no principal is due on maturity and, therefore, may result in loss of investment. Structured notes may be indexed positively or negatively to the performance of the underlying instrument such that the appreciation or depreciation of the underlying instrument will have a similar effect to the value of the structured note at maturity or of any coupon payment. In addition, changes in the interest rate and value of the principal at maturity may be fixed at a specific multiple of the change in value of the underlying instrument, making the value of the structured note more volatile than the underlying instrument. In addition, structured notes may be less liquid and more difficult to price accurately than less complex securities or traditional debt securities.

Commodity-Linked Derivatives. The Fund may invest in instruments with principal and/or coupon payments linked to the value of commodities, commodity futures contracts, or the performance of commodity indices such as “commodity-linked” or “index-linked” notes. These instruments are sometimes referred to as “structured notes” because the terms of the instrument may be structured by the issuer of the note and the purchaser of the note, such as the Fund.

The values of these notes will rise and fall in response to changes in the underlying commodity or related index or investment. These notes expose the Fund economically to movements in commodity prices, but a particular note has many features of a debt obligation. These notes also are subject to credit and interest rate risks that in general affect the value of debt securities. Therefore, at the maturity of the note, the Fund may receive more or less principal than it originally invested. The Fund might receive interest payments on the note that are more or less than the stated coupon interest rate payments.

Structured notes may involve leverage, meaning that the value of the instrument will be calculated as a multiple of the upward or downward price movement of the underlying commodity future or index. The prices of commodity-linked instruments may move in different directions than investments in traditional equity and debt securities in periods of rising inflation. Of course, there can be no guarantee that the Fund’s commodity-linked investments would not be correlated with traditional financial assets under any particular market conditions.

Commodity-linked notes may be issued by U.S. and foreign banks, brokerage firms, insurance companies and other corporations. These notes, in addition to fluctuating in response to changes in the underlying commodity assets, will be subject to credit and interest rate risks that typically affect debt securities.

The commodity-linked instruments may be wholly principal protected, partially principal protected or offer no principal protection. With a wholly principal protected instrument, the Fund will receive at maturity the greater of the par value of the note or the increase in value of the underlying index. Partially protected instruments may suffer some loss of principal up to a specified limit if the underlying index declines in value during the term of the instrument. For instruments without principal protection, there is a risk that the instrument could lose all of its value if the index

declines sufficiently. The Adviser's or Subadviser's decision on whether and to what extent to use principal protection depends in part on the cost of the protection. In addition, the ability of the Fund to take advantage of any protection feature depends on the creditworthiness of the issuer of the instrument.

Commodity-linked derivatives are generally hybrid instruments which are excluded from regulation under the Commodity Exchange Act (the "CEA") and the rules thereunder. Additionally, from time to time the Fund may invest in other hybrid instruments that do not qualify for exemption from regulation under the CEA.

Segregation and Cover Requirements. As an investment company registered with the SEC, the Fund must segregate liquid assets, or engage in other measures to "cover" open positions with respect to certain kinds of derivatives and other transactions. The Fund or the Underlying Funds may incur losses on derivatives and other leveraged investments (including the entire amount of a fund's investment in such investments) even if they are covered. To the extent that a fund does not segregate liquid assets or otherwise cover its obligations under any such transactions (e.g., through offsetting positions), certain types of these transactions will be treated as senior securities representing leverage for purposes of the requirements under the 1940 Act; and, therefore, a fund may not enter into any such transactions if the fund's leverage would thereby exceed the limits of the 1940 Act.

The Fund's derivative transactions are generally subject to earmarking and coverage requirements of either the Commodity Futures Trading Commission (the "CFTC") or the SEC, with the result that, if the Fund does not hold the security or futures contract underlying the instrument, the Fund intends to designate on its books and records on an ongoing basis, cash or liquid securities in an amount at least equal to the Fund's obligations with respect to such instruments. Such amounts may fluctuate as the obligations increase or decrease. The earmarking requirement can result in the Fund maintaining securities positions it would otherwise liquidate, segregating assets at a time when it might be disadvantageous to do so and otherwise restrict portfolio management.

In general, either the full amount of any obligation by the Fund to pay or deliver securities or assets must be covered at all times by the securities or instruments required to be delivered, or, subject to any regulatory restrictions, an amount of liquid assets at least equal to the current amount of the obligation must be segregated with the custodian or sub-custodian of the Fund in accordance with established procedures. The segregated assets cannot be sold or transferred unless equivalent assets are substituted in their place or it is no longer necessary to segregate them. A call option on securities written by the Fund, for example, will require the Fund to hold the securities subject to the call (or securities convertible into the needed securities without additional consideration) or to segregate liquid high grade debt obligations sufficient to purchase and deliver the securities if the call is exercised. A call option sold by the Fund on an index will require the Fund to own portfolio securities that correlate with the index or to segregate liquid high grade debt obligations equal to the excess of the index value over the exercise price on a current basis. A put option on securities written by the Fund will require the Fund to segregate liquid high grade debt obligations equal to the exercise price.

Over-the-counter options entered into by the Fund, including those on securities, financial instruments or indexes, and OCC-issued and exchange-listed index options will generally provide for cash settlement, although the Fund will not be required to do so. As a result, when the Fund sells these instruments it will segregate an amount of assets equal to its obligations under the options. OCC-issued and exchange-listed options sold by the Fund other than those described above generally settle with physical delivery, and the Fund will segregate an amount of assets equal to the full value of the option. OTC options settling with physical delivery or with an election of either physical delivery or cash settlement will be treated the same as other options settling with physical delivery.

In the case of a futures contract or an option on a futures contract, the Fund must deposit the initial margin and, in some instances, the daily variation margin in addition to segregating liquid assets sufficient to meet its obligations to purchase or provide securities or currencies, or to pay the amount owed at the expiration of an index-based futures contract. The Fund will accrue the net amount of the excess, if any, of its obligations relating to swaps over its entitlements with respect to each swap on a daily basis and will segregate with its custodian, or designated sub-custodian, an amount of liquid assets having an aggregate value equal to at least the accrued excess. Caps, floors and collars require segregation of liquid assets with a value equal to the Fund's net obligation, if any.

In the case of forward currency contracts that are not contractually required to cash settle, the Fund must set aside liquid assets equal to such contracts' full notional value while the positions are open. With respect to forward currency contracts that are contractually required to cash settle, however, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (i.e., the Fund's daily net liability) under the contracts, if any, rather than such contracts' full notional value.

In the case of swaps that do not cash settle, for example, the Fund must set aside liquid assets equal to the full notional amount of the swaps while the positions are open. With respect to swaps that cash settle, however, the Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (i.e., the Fund's daily net liability) under the swaps, if any, rather than their full notional amount.

Derivatives may be covered by means other than those described above when consistent with applicable regulatory policies. The Fund may also enter into offsetting transactions so that its combined position, coupled with any segregated assets, equals its net outstanding obligation in related derivatives. Other derivatives may also be offset in combinations. If the offsetting transaction terminates at the time of or after the primary transaction, no segregation is required, but if it terminates prior to that time, assets equal to any remaining obligation would need to be segregated. The Fund reserves the right to modify its asset segregation policies in the future to comply with any changes in the positions from time to time articulated by the SEC or its staff regarding asset segregation.

Combined Transactions. The Fund may enter into multiple transactions, including multiple options transactions, multiple futures transactions, multiple currency transactions (including forward currency contracts) and multiple interest rate transactions and any combination of futures, options, currency and interest rate transactions ("component" transactions), instead of a single Derivative Transaction, as part of a single or combined strategy when, in the opinion of the Adviser or Subadviser, it is in the best interests of the Fund to do so. A combined transaction will usually contain elements of risk that are present in each of its component transactions. Although combined transactions are normally entered into based on the Adviser's or Subadviser's judgment that the combined strategies will reduce risk or otherwise more effectively achieve the desired portfolio management goal, it is possible that the combination will instead increase such risks or hinder achievement of the portfolio management objectives.

Regulation as a "Commodity Pool." The CFTC has adopted amendments to CFTC Rule 4.5 which requires operators of registered investment companies to either limit such investment companies' use of futures, options on futures and swaps or register as a commodity pool operator ("CPO") and submit to dual regulation by the CFTC and the SEC. In order to be able to comply with the exclusion from the CPO definition pursuant to CFTC Rule 4.5 with respect to the Fund, the Adviser must limit the Fund's transactions in commodity futures, commodity option contracts and swaps for non-hedging purposes by either (a) limiting the aggregate initial margin and premiums required to establish non-hedging commodities positions to not more than 5% of the liquidation value of the Fund's portfolio after taking into account unrealized profits and losses on any such contract or (b) limiting the aggregate net notional value of non-hedging commodities positions to not more than 100% of the liquidation value of the Fund's portfolio after taking into account unrealized profits and losses on such positions. In the event that the Fund's investments in such instruments exceed one of these thresholds, the Adviser would no longer be excluded from the CPO definition and may be required to register as a CPO, and the Subadviser may be required to register as a commodity trading advisor ("CTA"). In the event the Adviser or the Subadviser is required to register as a CPO or CTA, as applicable, it will become subject to additional recordkeeping and reporting requirements with respect to the Fund. The Adviser has claimed an exclusion from the definition of a CPO with respect to the Fund under the amended rules. The Fund reserves the right to engage in transactions involving futures, options thereon and swaps in accordance with the Fund's policies. The Fund does not anticipate that it will invest in commodity futures, commodity options contracts and swaps to an extent or in a manner that would require the Adviser and the Subadviser to register as a CPO or CTA (as applicable) in connection with their management of the Fund.

Exchange-Traded Funds. The Fund may invest in a range of exchange-traded funds ("ETFs"). When the Fund invests in sector ETFs, there is a risk that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a particular sector, the value of its Common Shares may be especially sensitive to factors and economic risks that specifically affect that sector. As a result, the Fund's Common Share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of industries. Additionally, some sectors could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those sectors may have a material effect on the value of securities issued by companies in those sectors. The sectors in which the Fund may be more heavily invested will vary.

The shares of an ETF may be assembled in a block (typically 25,000 or 50,000 shares) known as a creation unit and redeemed in-kind for a portfolio of the underlying securities (based on the ETF's net asset value) together with a cash payment generally equal to accumulated dividends as of the date of redemption. Conversely, a creation unit may be purchased from the ETF by depositing a specified portfolio of the ETF's underlying securities, as well as a cash payment generally equal to accumulated dividends of the securities (net of expenses) up to the time of deposit. The Fund may redeem creation units for the underlying securities (and any applicable cash), and may assemble a portfolio

of the underlying securities and use it (and any required cash) to purchase creation units, if the Adviser or Subadviser believes it is in the Fund's interest to do so. The Fund's ability to redeem creation units may be limited by the 1940 Act, which provides that the ETFs will not be obligated to redeem shares held by the Fund in an amount exceeding one percent of their total outstanding securities during any period of less than 30 days.

There is a risk that the underlying ETFs in which the Fund invests may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Fund intends to invest may be granted licenses by agreement to use the indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may terminate if such license agreements are terminated. In addition, an ETF may terminate if its entire net asset value falls below a certain amount. Although the Fund believes that, in the event of the termination of an underlying ETF they will be able to invest instead in shares of an alternate ETF tracking the same market index or another market index with the same general market, there is no guarantee that shares of an alternate ETF would be available for investment at that time. To the extent the Fund invests in a sector product, the Fund will be subject to the risks associated with that sector. See "Additional Risks of Investing in the Fund—ETFs Risk."

Exchange-Traded Notes. The Fund and the Underlying Funds may invest in exchange-traded notes ("ETNs"), which are a type of unsecured, unsubordinated debt security. ETNs combine certain aspects of bonds and ETFs. Similar to ETFs, ETNs are traded on a major exchange (e.g., the New York Stock Exchange (the "NYSE")) during normal trading hours, although trading volume can be limited. However, investors can also hold the ETN until maturity. At maturity, the issuer pays to the investor a cash amount equal to the principal amount, subject to the day's index factor. ETN returns are based upon the performance of a market index minus applicable fees. ETNs do not make periodic coupon payments and provide no principal protection. The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, changes in the applicable interest rates, changes in the issuer's credit rating and economic, legal, political or geographic events that affect the referenced index. The value of the ETN may drop due to a downgrade in the issuer's credit rating, despite the underlying index remaining unchanged. See "Additional Risks of Investing in the Fund—ETNs Risk."

Foreign Investments. The Fund and the Underlying Funds may invest in foreign securities. When foreign securities are denominated and traded in foreign currencies, the value of the Fund's foreign investments and the value of its Common Shares may be affected favorably or unfavorably by changes in currency exchange rates relative to the U.S. dollar. There may be less information publicly available about a foreign issuer than about a U.S. issuer, and foreign issuers may not be subject to accounting, auditing and financial reporting standards and practices comparable to those in the U.S. The securities of some foreign issuers are less liquid and at times more volatile than securities of comparable U.S. issuers. Foreign brokerage commissions and other fees are also generally higher than in the U.S. Foreign settlement procedures and trade regulations may involve certain risks (such as delay in payment or delivery of securities or in the recovery of the Fund's assets held abroad) and expenses not present in the settlement of investments in U.S. markets. Payment for securities without delivery may be required in certain foreign markets.

In addition, foreign securities may be subject to the risk of nationalization or expropriation of assets, imposition of currency exchange controls or restrictions on the repatriation of foreign currency, confiscatory taxation, political or financial instability and diplomatic developments which could affect the value of the Fund's investments in certain foreign countries. Governments of many countries have exercised and continue to exercise substantial influence over many aspects of the private sector through the ownership or control of many companies, including some of the largest in these countries. As a result, government actions in the future could have a significant effect on economic conditions which may adversely affect prices of certain portfolio securities. There is also generally less government supervision and regulation of stock exchanges, brokers and listed companies than in the U.S. Dividends or interest on, or proceeds from the sale of, foreign securities may be subject to foreign withholding taxes, and special U.S. tax considerations may apply. Moreover, foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position.

Legal remedies available to investors in certain foreign countries may be more limited than those available with respect to investments in the U.S. or in other foreign countries. The laws of some foreign countries may limit the Fund's ability to invest in securities of certain issuers organized under the laws of those foreign countries.

Many foreign countries are heavily dependent upon exports, particularly to developed countries, and, accordingly, have been and may continue to be adversely affected by trade barriers, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the U.S. and other countries with which they trade. These economies also have been and may continue to be negatively impacted by economic conditions in the U.S. and other trading partners, which can lower the demand for goods produced in those countries.

Certain of the foregoing risks may also apply to some extent to securities of U.S. issuers that are denominated in foreign currencies or that are traded in foreign markets, or securities of U.S. issuers having significant foreign operations.

High Yield Securities. The Fund and the Underlying Funds may invest in high yield securities. High yield, high risk bonds are securities that are generally rated below investment grade by the primary rating agencies (BB+ or lower by S&P and Ba1 or lower by Moody's). Other terms used to describe such securities include "lower rated bonds," "non-investment grade bonds," "below investment grade bonds," and "junk bonds." These securities are considered to be high-risk investments.

Illiquid Securities and Restricted Securities. Certain securities may be subject to legal or contractual restrictions on resale ("restricted securities"). Generally speaking, restricted securities may be sold: (i) only to qualified institutional buyers; (ii) in a privately negotiated transaction to a limited number of purchasers; (iii) in limited quantities after they have been held for a specified period of time and other conditions are met pursuant to an exemption from registration; or (iv) in a public offering for which a registration statement is in effect under the Securities Act of 1933, as amended ("1933 Act"). Issuers of restricted securities may not be subject to the disclosure and other investor protection requirements that would be applicable if their securities were publicly traded.

Restricted securities are often illiquid, but they may also be liquid. For example, restricted securities that are eligible for resale under Rule 144A are often deemed to be liquid. The Fund and Underlying Funds may also purchase securities that are not subject to legal or contractual restrictions on resale, but that are deemed illiquid. Such securities may be illiquid, for example, because there is a limited trading market for them.

The Fund or an Underlying Fund may be unable to sell a restricted or illiquid security. In addition, it may be more difficult to determine a market value for restricted or illiquid securities. Moreover, if adverse market conditions were to develop during the period between the Fund's or an Underlying Fund's decision to sell a restricted or illiquid security and the point at which the Fund or an Underlying Fund is permitted or able to sell such security, the Fund or an Underlying Fund might obtain a price less favorable than the price that prevailed when it decided to sell.

Initial Public Offerings. The Fund and the Underlying Funds may invest in securities issued as part of initial public offerings ("IPOs"). Shares purchased in IPOs frequently are volatile in price and the fund may hold IPO shares for a very short period of time. This may increase the turnover of the fund's portfolio and may lead to increased expenses to the fund, such as commissions and transaction costs. By selling shares, the fund may realize taxable capital gains that they will subsequently distribute to shareholders. Investing in IPOs has added risks because their shares are frequently volatile in price. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the fund's portfolio.

Investment Company Securities. The Fund and the Underlying Funds may invest in the securities of other investment companies, including closed-end funds, open-end funds, ETFs, unit investment trusts and BDCs registered under the 1940 Act (collectively, the "Investment Companies"), to the extent permitted under applicable law and subject to certain restrictions.

Under sections 12(d)(1)(A) and 12(d)(1)(B) of the 1940 Act, the Fund and the Underlying Funds may hold securities of Investment Companies in amounts which (i) do not exceed 3% of the total outstanding voting stock of an Investment Company, (ii) do not exceed 5% of the value of the Fund's total assets and (iii) when added to all other Investment Company securities held by the Fund or an Underlying Fund, do not exceed 10% of the value of the Fund's or Underlying Fund's total assets. These limits may be exceeded when permitted by SEC order or other applicable law or regulatory guidance.

In addition, to comply with provisions of the 1940 Act, in any matter upon which Investment Company stockholders are solicited to vote, the Adviser or Subadviser, as applicable, may be required to vote Investment Company shares in the same proportion as shares held by other stockholders of the Investment Company.

Acquired funds typically incur fees that are separate from those fees incurred directly by the Fund or an Underlying Fund. The Fund's or an Underlying Fund's purchase of Investment Company securities results in the layering of expenses as shareholders would indirectly bear a proportionate share of the operating expenses of such

Investment Companies, including advisory fees, in addition to paying Fund or Underlying Fund expenses. In addition, the securities of Investment Companies may also be leveraged and will therefore will be subject to certain leverage risks. The NAV and market value of leveraged securities will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment Companies may also have investment policies that differ from those of the Fund or an Underlying Fund.

Under certain circumstances an open-end investment company in which the Fund or an Underlying Fund invests may determine to make a payment of a redemption by the Fund or an Underlying Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, the Fund or an Underlying Fund may hold such securities until the Adviser, Subadviser or manager of the Underlying Fund, as applicable, determines it is appropriate to dispose of them. Such disposition will impose additional costs on the Fund or an Underlying Fund.

Investment decisions by the investment advisers to the registered investment companies in which the Fund invests are made independently of the Fund. At any particular time, an Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances the Fund indirectly would incur certain transactional costs without accomplishing any investment purpose. See also “—Exchange Traded Funds” and “—Business Development Companies.”

Investment Grade Debt Securities. Investment grade securities are those rated “Baa” or higher by Moody’s or “BBB” or higher by S&P or rated similarly by another NRSRO or, if unrated, judged to be of equivalent quality as determined by the Adviser or Subadviser, as applicable. Moody’s considers bonds it rates “Baa” to have speculative elements as well as investment-grade characteristics. To the extent that the Fund invests in higher-grade securities, the Fund will not be able to avail itself of opportunities for higher income which may be available at lower grades.

Master Limited Partnerships. The Underlying Funds may invest in master limited partnerships (“MLPs”). Investments in publicly traded MLPs, which are limited partnerships or limited liability companies taxable as partnerships, involve some risks that differ from an investment in the common stock of a corporation, including risks related to limited control and limited rights to vote on matters affecting MLPs, risks related to potential conflicts of interest between an MLP and the MLP’s general partner, cash flow risks, dilution risks and risks related to the general partner’s right to require unit-holders to sell their common units at an undesirable time or price. MLPs may derive income and gains from the exploration, development, mining or production, processing, refining, transportation (including pipelines transporting gas, oil, or products thereof), or the marketing of any mineral or natural resources. MLPs may be subject to legal and other restrictions on resale or will otherwise be less liquid than publicly traded securities. Certain MLP securities may trade in lower volumes due to their smaller capitalizations. Accordingly, those MLPs may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity to enable an Underlying Fund to effect sales at an advantageous time or without a substantial drop in price. As a result, these investments may be difficult to dispose of at a fair price at the times when an Underlying Fund believes it is desirable to do so. MLPs are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns, which may adversely impact the overall performance of the Fund or an Underlying Fund. The benefit an Underlying Fund will derive from its investment in MLPs will be largely dependent on the MLPs being treated as partnerships and not as corporations for federal income tax purposes. Therefore, treatment of an MLP as a corporation for federal income tax purposes would result in a reduction in the after-tax return to an Underlying Fund, likely causing a reduction in the value of the Common Shares.

Mortgage-Backed Securities. The Fund may invest in mortgage-backed securities. Mortgage-backed securities represent participation interests in pools of one-to-four family residential mortgage loans originated by private mortgage originators. Traditionally, residential mortgage-backed securities have been issued by governmental agencies such as the Ginnie Mae, Fannie Mae and Freddie Mac. The Fund may invest in commercial mortgage-backed securities. Non-governmental entities that have issued or sponsored residential mortgage-backed securities offerings include savings and loan associations, mortgage banks, insurance companies, investment banks and special purpose subsidiaries of the foregoing. While residential loans do not typically have prepayment penalties or restrictions, they are often structured so that subordinated classes may be locked out of prepayments for a period of time. However, in a period of extremely rapid prepayments, during which senior classes may be retired faster than expected, the subordinated classes may receive unscheduled payments of principal and would have average lives that, while longer than the average lives of the senior classes, would be shorter than originally expected. The types of residential mortgage-backed securities in which the Fund may invest may include the following:

Guaranteed Mortgage Pass-Through Securities. The Fund may invest in mortgage pass-through securities representing participation interests in pools of residential mortgage loans originated by the U.S. government and guaranteed, to the extent provided in such securities, by the U.S. government or one of its agencies or instrumentalities. Such securities, which are ownership interests in the underlying mortgage loans, differ from conventional debt securities, which provide for periodic payment of interest in fixed amounts (usually semi-annually) and principal payments at maturity or on specified call dates. Mortgage pass-through securities provide for monthly payments that are a “pass-through” of the monthly interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans, net of any fees paid to the guarantor of such securities and the servicer of the underlying mortgage loans. The guaranteed mortgage pass-through securities in which the Fund will invest are those issued or guaranteed by Ginnie Mae, Fannie Mae and Freddie Mac.

Private Mortgage Pass-Through Securities. Private mortgage pass-through securities (“Private Pass-Throughs”) are structured similarly to the Ginnie Mae, Fannie Mae and Freddie Mac mortgage pass-through securities described above and are issued by originators of and investors in mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose subsidiaries of the foregoing. Private Pass-Throughs are usually backed by a pool of conventional fixed rate or adjustable rate mortgage loans.

Collateralized Mortgage Obligations (“CMOs”). CMOs are debt obligations collateralized by mortgage loans or mortgage pass-through securities. Typically, CMOs are collateralized by Ginnie Mae, Fannie Mae or Freddie Mac Certificates, but also may be collateralized by whole loans or Private Pass-Throughs (such collateral collectively hereinafter referred to as “Mortgage Assets”).

Multi-class pass-through securities are equity interests in a pool of Mortgage Assets. Unless the context indicates otherwise, all references herein to CMOs include multi-class pass-through securities. Payments of principal of and interest on the Mortgage Assets, and any reinvestment income thereon, allow the Fund to pay debt service on the CMOs or make scheduled distributions on the multi-class pass-through securities. CMOs may be sponsored by agencies or instrumentalities of the U.S. government, or by private originators of, or investors in, mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose subsidiaries of the foregoing. Under current law, every newly created CMO issuer must elect to be treated for federal income tax purposes as a Real Estate Mortgage Investment Conduit (a “REMIC”).

In a CMO, a series of bonds or certificates is issued in multiple classes. Each class of CMOs, often referred to as a “tranche,” is issued at a specific fixed or floating coupon rate and has a stated maturity or final distribution date. Principal prepayments on the Mortgage Assets may cause the CMOs to be retired substantially earlier than their stated maturities or final distribution dates. Interest is paid or accrues on all classes of the CMOs on a monthly, quarterly or semi-annual basis. The principal of and interest on the Mortgage Assets may be allocated among the several classes of a series of a CMO in innumerable ways. In one structure, payments of principal, including any principal prepayments, on the Mortgage Assets are applied to the classes of a CMO in the order of their respective stated maturities or final distribution dates, so that no payment of principal will be made on any class of CMOs until all other classes having an earlier stated maturity or final distribution date have been paid in full.

The Fund may also invest in, among others, parallel pay CMOs and Planned Amortization Class CMOs (PAC Bonds). Parallel pay CMOs are structured to provide payments of principal on each payment date to more than one class. These simultaneous payments are taken into account in calculating the stated maturity date or final distribution date of each class, which, as with other CMO structures, must be retired by its payments of a specified amount of principal on each payment date.

Ginnie Mae Certificates. Ginnie Mae is a wholly-owned corporate instrumentality of the U.S. government within the Department of Housing and Urban Development. The National Housing Act of 1934, as amended (the “Housing Act”), authorizes Ginnie Mae to guarantee the timely payment of the principal of and interest on certificates that are based on and backed by a pool of mortgage loans insured by the Federal Housing Administration under the Housing Act, or Title V of the Housing Act of 1949 (“FHA Loans”), or guaranteed by the Veterans Administration under the Servicemen’s Readjustment Act of 1944, as amended (“VA Loans”), or by pools of other eligible mortgage loans. The Housing Act provides that the full faith and credit of the U.S. government is pledged to the payment of all amounts that may be required to be paid under any guarantee.

The Ginnie Mae Certificates will represent a pro rata interest in one or more pools of the following types of mortgage loans: (i) fixed rate level payment mortgage loans; (ii) fixed rate graduated payment mortgage loans; (iii) fixed rate growing equity mortgage loans; (iv) fixed rate mortgage loans secured by manufactured (mobile) homes;

(v) mortgage loans on multifamily residential properties under construction; (vi) mortgage loans on completed multifamily projects; (vii) fixed rate mortgage loans as to which escrowed funds are used to reduce the borrower's monthly payments during the early years of the mortgage loans ("buydown" mortgage loans); (viii) mortgage loans that provide for adjustments in payments based on periodic changes in interest rates or in other payment terms of the mortgage loans; and (ix) mortgage-backed serial notes. All of these mortgage loans will be FHA Loans or VA Loans and, except as otherwise specified above, will be fully-amortizing loans secured by first liens on one-to-four family housing units.

Fannie Mae Certificates. Fannie Mae is a federally chartered and privately owned corporation organized and existing under the Federal National Mortgage Association Charter Act. Fannie Mae was originally established in 1938 as a U.S. government agency to provide supplemental liquidity to the mortgage market and was transformed into a stockholder owned and privately-managed corporation by legislation enacted in 1968. Fannie Mae provides funds to the mortgage market primarily by purchasing home mortgage loans from local lenders, thereby replenishing their funds for additional lending. Fannie Mae acquires funds to purchase home mortgage loans from many capital market investors that may not ordinarily invest in mortgage loans directly, thereby expanding the total amount of funds available for housing.

Each Fannie Mae Certificate entitles the registered holder thereof to receive amounts representing such holder's pro rata interest in scheduled principal payments and interest payments (at such Fannie Mae Certificate's pass-through rate, which is net of any servicing and guarantee fees on the underlying mortgage loans), and any principal prepayments on the mortgage loans in the pool represented by such Fannie Mae Certificate and such holder's proportionate interest in the full principal amount of any foreclosed or otherwise finally liquidated mortgage loan. The full and timely payment of principal of and interest on each Fannie Mae Certificate will be guaranteed by Fannie Mae, which guarantee is not backed by the full faith and credit of the U.S. government. In order to meet its obligations under such guarantee, Ginnie Mae is authorized to borrow from the U.S. Treasury with no limitations as to amount.

Each Fannie Mae Certificate will represent a pro rata interest in one or more pools of FHA Loans, VA Loans or conventional mortgage loans (*i.e.*, mortgage loans that are not insured or guaranteed by any governmental agency) of the following types: (i) fixed rate level payment mortgage loans; (ii) fixed rate growing equity mortgage loans; (iii) fixed rate graduated payment mortgage loans; (iv) variable rate California mortgage loans; (v) other adjustable rate mortgage loans; and (vi) fixed rate mortgage loans secured by multifamily projects.

Freddie Mac Certificates. Freddie Mac is a corporate instrumentality of the U.S. government created pursuant to the Emergency Home Finance Act of 1970, as amended (the "FHLMC Act"). Freddie Mac was established primarily for the purpose of increasing the availability of mortgage credit for the financing of needed housing. The principal activity of Freddie Mac currently consists of the purchase of first lien, conventional, residential mortgage loans and participation interests in such mortgage loans and the resale of the mortgage loans so purchased in the form of mortgage securities, primarily Freddie Mac Certificates.

Freddie Mac guarantees to each registered holder of a Freddie Mac Certificate the timely payment of interest at the rate provided for by such Freddie Mac Certificate, whether or not received. Freddie Mac also guarantees to each registered holder of a Freddie Mac Certificate ultimate collection of all principal of the related mortgage loans, without any offset or deduction, but does not generally guarantee the timely payment of scheduled principal. Freddie Mac may remit the amount due on account of its guarantee of collection of principal at any time after default on an underlying mortgage loan, but not later than 30 days following (i) foreclosure sale, (ii) payment of a claim by any mortgage insurer, or (iii) the expiration of any right of redemption, whichever occurs later, but in any event no later than one year after demand has been made upon the mortgagor for acceleration of payment of principal. The obligations of Freddie Mac under its guarantee are obligations solely of Freddie Mac and are not backed by the full faith and credit of the U.S. government.

Freddie Mac Certificates represent a pro rata interest in a group of mortgage loans (a "Freddie Mac Certificate group") purchased by Freddie Mac. The mortgage loans underlying the Freddie Mac Certificates will consist of fixed rate or adjustable rate mortgage loans with original terms to maturity of between ten and thirty years, substantially all of which are secured by first liens on one-to-four family residential properties or multifamily projects. Each mortgage loan must meet the applicable standards set forth in the FHLMC Act. A Freddie Mac Certificate group may include whole loans, participation interests in whole loans and undivided interests in whole loans and participations comprising another Freddie Mac Certificate group.

Federal Home Loan Bank Securities. The Federal Home Loan Bank system (“FHLB”) was created in 1932 pursuant to the Federal Home Loan Bank Act (the “FHLB Act”). The FHLB was created to support residential mortgage lending and community investment. The FHLB consists of 12 member banks which are owned by over 8,000 member community financial institutions. The FHLB provides liquidity for housing finance and community development by making direct loans to these community financial institutions, and through two FHLB mortgage programs, which help expand home ownership by giving lenders an alternative option for mortgage funding. Each member financial institution (typically a bank or savings and loan) is a shareholder in one or more of 12 regional FHLB banks, which are privately capitalized, separate corporate entities.

Federal oversight, in conjunction with normal bank regulation and shareholder vigilance, assures that the 12 regional FHLB banks will remain conservatively managed and well capitalized. The FHLB banks are among the largest providers of mortgage credit in the U.S.

The FHLB is also one of the world’s largest private issuers of fixed-income debt securities, and the Office of Finance serves as the FHLB’s central debt issuance facility. Debt is issued in the global capital markets and the Fund is channeled to member financial institutions to fund mortgages, community development, and affordable housing.

Securities issued by the FHLB are not obligations of the U.S. government and are not guaranteed by the U.S. government. The FHLB may issue either bonds or discount notes. The securities, issued pursuant to the FHLB Act, are joint and several unsecured general obligations of the FHLB banks. The bonds or discount notes will not limit other indebtedness that the FHLB banks may incur and they will not contain any financial or similar restrictions on the FHLB banks or any restrictions on their ability to secure other indebtedness. Under the FHLB Act, the FHLB banks may incur other indebtedness such as secured joint and several obligations of the FHLB banks and unsecured joint and several obligations of the FHLB banks, as well as obligations of individual FHLB banks (although current Federal Housing Finance Board rules prohibit their issuance).

Municipal Securities. The Fund and the Underlying Funds may invest in municipal securities, which are securities that share the attributes of fixed income securities in general but are issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. Although the interest earned on many municipal securities is exempt from federal income tax, the Fund and the Underlying Funds may invest in taxable municipal securities as well.

The municipal securities in which the Fund and the Underlying Funds may purchase include general obligation bonds and limited obligation bonds (or revenue bonds), including industrial development bonds issued pursuant to former federal tax law. General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from such issuer’s general revenues and not from any particular source. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. Tax-exempt private activity bonds and industrial development bonds generally are also revenue bonds and thus are not payable from the issuer’s general revenues. The credit and quality of private activity bonds and industrial development bonds are usually related to the credit of the corporate user of the facilities. Payment of interest on and repayment of principal of such bonds is the responsibility of the corporate user (and/or any guarantor).

Under the Code, certain limited obligation bonds are considered “private activity bonds” and interest paid on such bonds is treated as an item of tax preference for purposes of calculating federal alternative minimum tax liability.

Preferred Securities. Preferred securities represent an equity ownership interest in the issuer and has a preference over common stock in liquidation (and generally as to dividends as well), but is subordinated to the liabilities of the issuer in all respects. Some preferred securities also entitle their holders to receive additional liquidation proceeds on the same basis as holders of a company’s common stock. As a general rule, the market value of preferred securities with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred securities generally also reflects some element of conversion value. Because preferred securities are junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of preferred securities than in a more senior debt security with similarly stated yield characteristics. The market value of preferred securities will also generally reflect whether (and, if so, when) the issuer may force holders to sell their preferred securities back to the issuer and whether (and, if so, when) the holders may force the issuer to buy back their preferred securities. Generally, the right of the issuer to repurchase the preferred securities tends to reduce any premium that the preferred securities might otherwise trade at due to interest rate or credit factors, while the right of the holders to require the issuer to repurchase the preferred

securities tends to reduce any discount that the preferred securities might otherwise trade at due to interest rate or credit factors. In addition, some preferred securities are non-cumulative, meaning that the dividends do not accumulate and need not ever be paid. A portion of the Fund's or an Underlying Fund's portfolio may include investments in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any arrearages to its shareholders. There is no assurance that dividends or distributions on non-cumulative preferred securities in which the Fund or an Underlying Fund invests will be declared or otherwise paid. Preferred securities of certain companies offer the opportunity for capital appreciation as well as periodic income. This may be particularly true in the case of companies that have performed below expectations. If a company's performance has been poor enough, its preferred securities may trade more like common stock than like other fixed income securities, which may result in above average appreciation if the company's performance improves.

Real Estate Investment Trusts. Real estate investment trusts ("REITs") are typically publicly-traded corporations or trusts that invest in residential or commercial real estate. REITs generally can be divided into the following three types: (i) equity REITs, which invest the majority of their assets directly in real property and derive their income primarily from rents and capital gains or real estate appreciation; (ii) mortgage REITs, which invest the majority of their assets in real estate mortgage loans and derive their income primarily from interest payments; and (iii) hybrid REITs which combine the characteristics of equity REITs and mortgage REITs. Generally, dividends received by the Fund from REIT shares and distributed to the Fund's shareholders are not likely to constitute "qualified dividend income" eligible for the reduced tax rate applicable to qualified dividend income; therefore, the portion of the dividend income attributable to REIT shares held by the Fund that shareholders of the Fund receive will likely be treated as ordinary income and taxed at a higher rate than dividends eligible for the reduced tax rate applicable to qualified dividend income. The Fund will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests in addition to expenses paid by the Fund.

Investment in REITs may subject the Fund to risks associated with the direct ownership of real estate, such as decreases in real estate values, overbuilding, increased competition and other risks related to local or general economic conditions, increases in operating costs and property taxes, changes in zoning laws, casualty or condemnation losses, possible environmental liabilities, regulatory limitations on rent and fluctuations in rental income. Equity REITs generally experience these risks directly through fee or leasehold interests, whereas mortgage REITs generally experience these risks indirectly through mortgage interests, unless the mortgage REIT forecloses on the underlying real estate. Changes in interest rates may also affect the value of the Fund's investment in REITs. For instance, during periods of declining interest rates, certain mortgage REITs may hold mortgages that the mortgagors elect to prepay, which prepayment may diminish the yield on securities issued by those REITs.

Certain REITs have relatively small market capitalizations, which may tend to increase the volatility of the market price of their securities. Furthermore, REITs are dependent upon specialized management skills and have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. REITs are also subject to heavy cash flow dependency, defaults by borrowers and the possibility of failing to qualify for tax-free pass-through of income under the Code and to maintain exemption from the registration requirements of the 1940 Act. By investing in REITs indirectly through the Fund, a shareholder will bear not only his or her proportionate share of the expenses of the Fund, but also, indirectly, similar expenses of the REITs. In addition, REITs depend generally on their ability to generate cash flow to make distributions to shareholders.

Senior Loans. Senior floating rate loans ("Senior Loans") may be made to or issued by U.S. or non-U.S. banks or other corporations. Senior Loans include senior floating rate loans and institutionally-traded senior floating rate debt obligations issued by asset-backed pools and other issues, and interests therein. Senior Loan interests may be acquired from U.S. or foreign commercial banks, insurance companies, finance companies or other financial institutions that have made loans or are members of a lending syndicate or from other holders of loan interests. Senior Loans typically pay interest at rates which are re-determined periodically on the basis of a floating base lending rate (such as the London Inter-Bank Offered Rate, "LIBOR") plus a premium. Senior Loans are typically of below investment grade quality. Senior Loans generally (but not always) hold the most senior position in the capital structure of a borrower and are often secured with collateral.

Such banks may also act as agents for Senior Loans held by the Fund. To the extent that the collateral, if any, securing a Senior Loan consists of the stock of the borrower's subsidiaries or other affiliates, the Fund will be subject to the risk that this stock will decline in value. Such a decline, whether as a result of bankruptcy proceedings or otherwise, could cause the Senior Loan to be undercollateralized or unsecured. In most credit agreements there is no formal requirement to pledge additional collateral. In addition, a Senior Loan may be guaranteed by, or fully secured by assets

of, shareholders or owners, even if the Senior Loans are not otherwise collateralized by assets of the borrower. There may be temporary periods when the principal asset held by a borrower is the stock of a related company, which may not legally be pledged to secure a secured Senior Loan. On occasions when such stock cannot be pledged, the secured Senior Loan will be temporarily unsecured until the stock can be pledged or is exchanged for or replaced by other assets, which will be pledged as security for such Senior Loan.

If a borrower becomes involved in bankruptcy proceedings, a court potentially could invalidate the Fund's security interest in any loan collateral or subordinate the Fund's rights under a secured Senior Loan to the interests of the borrower's unsecured creditors. Such action by a court could be based, for example, on a "fraudulent conveyance" claim to the effect that the borrower did not receive fair consideration for granting the security interest in the loan collateral to the Fund. For secured Senior Loans made in connection with a highly leveraged transaction, consideration for granting a security interest may be deemed inadequate if the proceeds of such loan were not received or retained by the borrower, but were instead paid to other persons, such as shareholders of the borrower, in an amount which left the borrower insolvent or without sufficient working capital. There are also other events, such as the failure to perfect a security interest due to faulty documentation or faulty official filings, which could lead to the invalidation of the Fund's security interest in any loan collateral. If the Fund's security interest in loan collateral is invalidated or a secured Senior Loan is subordinated to other debt of a borrower in bankruptcy or other proceedings, it is unlikely that the Fund would be able to recover the full amount of the principal and interest due on the secured Senior Loan.

Temporary Investments and Defensive Position. During the period where the net proceeds of this offering of Common Shares are being invested or during periods in which the Adviser or Subadviser determines that it is temporarily unable to follow the Fund's investment strategy or that it is impractical to do so, the Fund may deviate from its investment strategy and invest all or any portion of its net assets in cash, cash equivalents or other securities. The Adviser's or Subadviser's determination that it is temporarily unable to follow the Fund's investment strategy or that it is impracticable to do so generally will occur only in situations in which a market disruption event has occurred and where trading in the securities selected through application of the Fund's investment strategy is extremely limited or absent. In such a case, the Fund may not pursue or achieve its investment objective.

Cash and cash equivalents are defined to include, without limitation, the following:

(1) U.S. Government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. Government agencies or instrumentalities. U.S. Government agency securities include securities issued by: (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. Government provides financial support to such U.S. Government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. Government, its agencies, and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate.

(2) Certificates of deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current Federal Deposit Insurance Corporation ("FDIC") regulations, the maximum insurance payable as to any one certificate of deposit is \$250,000, therefore, certificates of deposit purchased by the Fund may not be fully insured.

(3) Repurchase agreements, which involve purchases of debt securities. At the time the Fund purchases securities pursuant to a repurchase agreement, it simultaneously agrees to resell and redeliver such securities to the seller, who also simultaneously agrees to buy back the securities at a fixed price and time. This assures a predetermined yield for the Fund during its holding period, since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest temporarily available cash. Pursuant to the Fund's policies and procedures, the Fund may enter into repurchase agreements only with respect to obligations of the U.S. Government, its agencies or instrumentalities; certificates of deposit; or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered

loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The Adviser or Subadviser, as applicable, monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The Adviser or Subadviser does so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. The Adviser or Subadviser, as applicable, will consider the financial condition of the corporation (e.g., earning power, cash flow, and other liquidity measures) and will continuously monitor the corporation's ability to meet all its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. Investments in commercial paper will be limited to commercial paper rated in the highest categories by a NRSRO and which mature within one year of the date of purchase or carry a variable or floating rate of interest.

(5) The Fund may invest in bankers' acceptances which are short-term credit instruments used to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an asset or it may be sold in the secondary market at the going rate of interest for a specific maturity.

(6) The Fund may invest in bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest. There may be penalties for the early withdrawal of such time deposits, in which case the yields of these investments will be reduced.

(7) The Fund may invest in shares of money market funds in accordance with the provisions of the 1940 Act.

Additional Risks of Investing in the Fund

Below Investment Grade Securities Risk. The Fund or the Underlying Funds may invest in below investment grade securities, which are commonly referred to as "junk" or "high yield" securities. These securities are considered to be high-risk investments. The risks include the following:

These securities are regarded as predominately speculative. There is a greater risk that issuers of lower-rated securities will default than issuers of higher-rated securities. Issuers of lower-rated securities generally are less creditworthy and may be highly indebted, financially distressed or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, below investment grade securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, the Fund would experience a decrease in income and a decline in the market value of its investments. The Fund or the Underlying Funds also may incur additional expenses in seeking recovery from the issuer.

The income and market value of lower-rated securities may fluctuate more than higher-rated securities. Although certain below investment grade securities may be less sensitive to interest rate changes than investment grade securities, below investment grade securities generally are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn.

It is often more difficult to value lower-rated securities than higher-rated securities. If an issuer's financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower-rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower-rated securities, valuation of such investments is much more dependent on judgment than is the case with higher-rated securities.

There may be no established secondary or public market for investments in lower-rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher-rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, lower-rated securities may be required to be sold at substantial losses or retained indefinitely even where an issuer's financial condition is deteriorating.

Credit quality of below investment grade securities can change suddenly and unexpectedly, and even recently-issued credit ratings may not fully reflect the actual risks posed by a particular below investment grade security.

Future legislation may have a possible negative impact on the market for below investment grade securities.

Currency Risk. The value of securities denominated or quoted in foreign currencies may be adversely affected by fluctuations in the relative currency exchange rates and by exchange control regulations. The Fund's or an Underlying Fund's investment performance may be negatively affected by a devaluation of a currency in which the Fund's or an Underlying Fund's investments are denominated or quoted. Further, the Fund's or an Underlying Fund's investment performance may be significantly affected, either positively or negatively, by currency exchange rates because the U.S. dollar value of securities denominated or quoted in another currency will increase or decrease in response to changes in the value of such currency in relation to the U.S. dollar.

Deflation Risk. Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

ETFs Risk. To the extent the Fund invests a portion of its Managed Assets in ETFs, those assets will be subject to the risks of the purchased funds' portfolio securities, and a shareholder in the Fund will bear not only his or her proportionate share of the Fund's expenses, but also indirectly the expenses of the purchased funds. Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other funds. The Fund's investments in other funds also are subject to the ability of the managers of those funds to achieve the funds' investment objective(s).

Risks associated with investments in ETFs may generally include the risks described in the Prospectus associated with the Fund's structure as a closed-end fund, including market risk. Most ETFs are investment companies that aim to track or replicate a desired index, such as a sector, market or global segment. Most ETFs are passively managed and their shares are traded on a national exchange. ETFs do not sell individual shares directly to investors and only issue their shares in large blocks known as "creation units." The investor purchasing a creation unit may sell the individual shares on a secondary market. Therefore, the liquidity of ETFs depends on the adequacy of the secondary market. There can be no assurance that an ETF's investment objective(s) will be achieved, as ETFs based on an index may not replicate and maintain exactly the composition and relative weightings of securities in the index. ETFs are subject to the risks of investing in the underlying securities. ETF shares may trade at a premium or discount to their NAV. As ETFs trade on an exchange, they are subject to the risks of any exchange-traded instrument, including: (i) an active trading market for its shares may not develop or be maintained, (ii) trading of its shares may be halted by the exchange, and (iii) its shares may be delisted from the exchange. Some ETFs are highly leveraged and therefore will expose the Fund to risks posed by leverage, including the risk that the use of leverage by an ETF can magnify the effect of any of its losses.

ETNs Risk. The Fund may invest in ETNs, which are notes representing unsecured debt of the issuer. ETNs are typically linked to the performance of an index plus a specified rate of interest that could be earned on cash collateral. The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, changes in the applicable interest rates, changes in the issuer's credit rating and economic, legal, political or geographic events that affect the referenced index. ETNs typically mature 30 years from the date of issue. There may be restrictions on the Fund's right to liquidate its investment in an ETN prior to maturity (for example, the Fund may only be able to offer its ETN for repurchase by the issuer on a weekly basis), and there may be limited availability of a secondary market.

Fixed Income Securities Risk. In addition to the risks described elsewhere in this SAI, such as below investment grade securities risk, fixed income securities in which the Fund may invest are subject to certain other risks, including the following. These risks may also pertain to the loans in which the Fund may invest.

- *Issuer Risk.* The value of fixed income securities may decline for a number of reasons which directly relate to the issuer, such as management performance, leverage and reduced demand for the issuer's goods and services, historical and projected earnings, and the value of its assets. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer.
- *Interest Rate Risk.* Interest rate risk is the risk that fixed income securities will decline in value because of changes in market interest rates. When market interest rates rise, the market value of fixed income securities generally will fall. These risks may be greater in the current market environment because interest rates are near historically low levels. Market value generally falls further for fixed rate securities with longer duration. During periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected prepayments. This may lock in a below-market yield, increase the security's duration and further reduce the value of the security. Investments in fixed income securities with long-term maturities may experience significant price declines if long-term interest rates increase. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's NAV. Since the magnitude of these fluctuations will generally be greater at times when the Fund's average maturity is longer, under certain market conditions the Fund may, for temporary defensive purposes, accept lower current income from short-term investments rather than investing in higher yielding long-term securities.
- *Liquidity Risk.* Certain fixed income securities may be substantially less liquid than many other securities, such as common stocks traded on an exchange. Illiquid securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.
- *Prepayment Risk.* During periods of declining interest rates, the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing the Fund to reinvest the proceeds from such prepayment in lower yielding securities, which may result in a decline in the Fund's income and distributions to shareholders. This is known as call or prepayment risk. Certain fixed income securities frequently have call features that allow the issuer to redeem the security prior to its stated maturity. An issuer may redeem an obligation if the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. If the Fund bought a security at a premium, the premium could be lost in the event of a prepayment.
- *Reinvestment Risk.* Reinvestment risk is the risk that income from the Fund's portfolio will decline if the Fund invests the proceeds from matured, traded or called securities at market interest rates that are below the Fund portfolio's current earnings rate. A decline in income could affect the Common Shares' market price or the overall return of the Fund.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline.

Interest Rate Risk. Interest rate risk is the risk that the value of the debt securities held by the Fund will decline because of rising market interest rates. Interest rate risk is generally lower for shorter-term investments and higher for longer-term investments. Duration is a common measure of interest rate risk, which measures a bond's expected life on a present value basis, taking into account the bond's yield, interest payments and final maturity. Duration is a reasonably accurate measure of a bond's price sensitivity to changes in interest rates. The longer the duration of a bond, the greater the bond's price sensitivity is to changes in interest rates.

Non-U.S. Securities Risk. The Fund may invest a portion of its assets in securities of non-U.S. issuers. Investing in such instruments, which are generally denominated in non-U.S. currencies, may involve certain risks not typically associated with investing in securities of U.S. issuers. These risks include: (i) there may be less publicly available information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) non-U.S. markets may be smaller, less liquid and more volatile than the U.S. market; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies

of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) certain non-U.S. countries may impose restrictions on the ability of non-U.S. issuers to make payments of principal and interest to investors located in the United States due to blockage of non-U.S. currency exchanges or otherwise; and (vii) withholding and other non-U.S. taxes may decrease the Fund's return. Foreign companies are generally not subject to the same accounting, auditing and financial reporting standards as are U.S. companies. In addition, there may be difficulty in obtaining or enforcing a court judgment abroad. These risks may be more pronounced to the extent that the Fund invests a significant amount of its assets in companies or borrowers located in one region or in emerging markets.

Payment-In-Kind Securities Risk. As part of a non-principal portfolio emphasis of the Fund, the Fund may invest in payment-in-kind ("PIK") securities. A PIK security generally is able pay any scheduled interest payment in additional securities, rather than cash. The higher yield and interest rates on PIK securities reflects a payment deferral and increased credit risk associated with such instruments and that such investments may represent a significantly higher credit risk than coupon loans. PIK securities may have unreliable valuations because their continuing accruals require continuing judgments about the collectability of the deferred payments and the value of any associated collateral.

Preferred Stock Risk. Preferred stocks are unique securities that combine some of the characteristics of both common stocks and bonds. See "Investment Policies and Techniques—Preferred Securities" and "—Fixed Income Securities Risk" above. In addition to the risks described elsewhere in this section, such as those described for common stock and fixed income securities, including interest rate risk, preferred stocks are subject to certain other risks, including:

- *Deferral and Omission Risk.* Preferred stocks may include provisions that permit the issuer, at its discretion, to defer or omit distributions for a stated period without any adverse consequences to the issuer.
- *Subordination Risk.* Preferred stocks are generally subordinated to bonds and other debt instruments in a company's capital structure in terms of having priority to corporate income, claims to corporate assets and liquidation payments, and therefore will be subject to greater credit risk than more senior debt instruments.
- *Floating Rate and Fixed-to-Floating Rate Securities Risk.* The market value of floating rate securities is a reflection of discounted expected cash flows based on expectations for future interest rate resets. The market value of such securities may fall in a declining interest rate environment and may also fall in a rising interest rate environment if there is a lag between the rise in interest rates and the reset. This risk may also be present with respect to fixed-to-floating rate securities in which the Fund may invest. A secondary risk associated with declining interest rates is the risk that income earned by the Fund on floating rate and fixed-to-floating rate securities may decline due to lower coupon payments on floating-rate securities.
- *Call and Reinvestment Risk.* During periods of declining interest rates or certain varying circumstances, an issuer may be able to exercise an option to redeem its issue at par earlier than scheduled, which is generally known as call risk. If this occurs, the Fund may be forced to reinvest in lower yielding securities.
- *Limited Voting Rights Risk.* Generally, traditional preferred stock offers no voting rights with respect to the issuer unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred stockholders may have the ability to elect a director or directors to the issuer's board. Generally, once all the arrearages have been paid, the preferred stockholders no longer have voting rights.
- *Special Redemption Rights.* In certain varying circumstances, an issuer of preferred stock may redeem the securities prior to their scheduled call or maturity date. As with call provisions, a redemption by the issuer may negatively impact the return of the security held by the Fund.

MANAGEMENT OF THE FUND

Investment Adviser

RiverNorth Capital Management, LLC is the investment adviser for the Fund pursuant to an Investment Advisory Agreement. RiverNorth is headquartered at 325 North LaSalle Street, Suite 645, Chicago, Illinois 60654. Under the oversight of the Board of Directors, the Adviser will be responsible for the day-to-day management of the Fund's portfolio, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services. The Adviser will also be responsible for determining the Fund's overall investment strategy and overseeing its implementation. Subject to the ranges noted above, the Adviser will determine the portion of the Fund's Managed Assets to allocate to each strategy and may, from time to time, adjust the allocations. Founded in 2000, RiverNorth is

registered with the SEC and as of June 30, 2016 managed approximately \$3.34 billion for four series of a registered open-end management investment company, one registered closed-end management investment company and four private investment vehicles. Patrick W. Galley, a portfolio manager of the Fund, and Brian H. Schmucker, each own, directly or indirectly, more than 25% of RiverNorth Holding Co., the indirect parent company of the Adviser and is deemed to control the Adviser.

Investment Subadviser

DoubleLine® Capital LP is the Fund's subadviser and will be responsible for the day-to-day management of the Fund's Managed Assets allocated to the Opportunistic Income Strategy. Founded in 2009, the Subadviser is located at 333 South Grand Avenue, 18th Floor, Los Angeles, California 90071. The Subadviser is registered with the SEC and as of June 30, 2016, manages approximately \$103 billion for individuals and institutions.

Investment Advisory Agreement and Subadvisory Agreement

For its services under the Investment Advisory Agreement, the Fund pays the Adviser a monthly management fee computed at the annual rate of 1.00% of the average daily Managed Assets. Pursuant to a Subadvisory Agreement, the Adviser has delegated daily management of the Fund's Opportunistic Income Strategy to the Subadviser, who is paid by the Adviser and not the Fund. The Adviser (and not the Fund) has agreed to pay the Subadviser a subadvisory fee payable on a monthly basis at the annual rate of 0.50% of the Fund's average daily Managed Assets for the service it provides. "Managed Assets" means the total assets of the Fund, including assets attributable to leverage, minus liabilities (other than debt representing leverage and any preferred stock that may be outstanding). In addition to the monthly advisory fee, the Fund pays all other costs and expenses of its operations, including, but not limited to, compensation of its directors (other than those affiliated with the Adviser, who are not compensated), custodial expenses, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses of any leverage, expenses of preparing, printing and distributing prospectuses, shareholder reports, notices, proxy statements and reports to governmental agencies, and taxes, if any.

If the Fund determines to use leverage, the fees paid to the Adviser and Subadviser for investment management services will be higher than if the Fund did not use leverage because the fees paid will be calculated based on Managed Assets, which would include assets attributable to leverage. Because the fees paid to the Adviser and Subadviser are determined on the basis of Managed Assets, this creates a conflict of interest for the Adviser and Subadviser. The Board of Directors monitors the Fund's use of leverage and in doing so monitors this potential conflict.

The Investment Advisory Agreement provides that the Adviser shall not be liable for any act or omission connected with or arising out of any services to be rendered under such agreement, except by reason of willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties or from reckless disregard by the Adviser of its obligations and duties under such agreement.

The Adviser will make available, without additional expense to the Fund, the services of such of its officers, directors and employees as may be duly elected as officers or directors of the Fund, subject to the individual consent of such persons to serve and to any limitations imposed by law. The Adviser will pay all expenses incurred in performing its services under the Investment Advisory Agreement, including compensation of and office space for directors, officers and employees of the Adviser connected with management of the Fund. The Fund will be required to pay brokerage and other expenses of executing the Fund's portfolio transactions; taxes or governmental fees; interest charges and other costs of borrowing funds; litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The Investment Advisory Agreement and the Subadvisory Agreement will remain in effect for an initial term ending two years from the effective date of that agreement (unless sooner terminated). The Investment Advisory Agreement shall remain in effect from year to year thereafter if approved annually (i) by a majority of the outstanding voting securities of the Fund or by a vote of the Fund's Board of Directors, cast in person at a meeting called for the purpose of voting on such approval, and (ii) by vote of a majority of the Board of Directors who are not parties to the Investment Advisory Agreement, or "interested persons" of any party to the Investment Advisory Agreement, cast in person at a meeting called for the purpose of voting on such approval. The Subadvisory Agreement shall remain in effect from year to year after its initial two year term if approved annually by the Fund's Board of Directors or a vote of the lesser of (x) 67% of the shares of the Fund represented at a meeting if shareholders of more than 50% of the outstanding shares of the Fund are present in person or by proxy or (y) more than 50% of the outstanding shares of the Fund; provided that

in either event its continuance is also approved by a majority of the Fund's directors who are not "interested persons" of any party to the Subadvisory Agreement, by vote cast in person at a meeting called for the purpose of voting on such approval. In addition, the Fund's Charter requires the favorable vote of two-thirds of the entire Board of Directors to advise, approve, adopt or authorize entering into, terminating or amending the Investment Advisory Agreement and the Subadvisory Agreement, which supermajority voting requirement is greater than the minimum voting requirement under the 1940 Act. Information regarding the Board of Directors' approval of the Investment Advisory Agreement will be available in the Fund's semi-annual report to shareholders for the period ended December 31, 2016. The Investment Advisory Agreement will terminate upon assignment by any party and is terminable, without penalty, on 60 days' written notice by the Board of Directors or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund or upon 60 days' written notice by the Adviser.

Portfolio Managers

Patrick W. Galley and Stephen O'Neill are co-portfolio managers for the Fund for the Tactical Closed-End Fund Income Strategy.

Patrick W. Galley, CFA is a portfolio manager of the Fund. Mr. Galley is the Chief Investment Officer for the Adviser. Mr. Galley heads the Adviser's research and investment team and oversees all portfolio management activities at the Adviser. Mr. Galley also serves as the President and Chairman of the RiverNorth Funds. Prior to joining the Adviser in 2004, he was most recently a Vice President at Bank of America in the Global Investment Bank's Portfolio Management group, where he specialized in analyzing and structuring corporate transactions for investment management firms in addition to closed-end and open-end funds, hedge funds, funds of funds, structured investment vehicles and insurance/reinsurance companies. Mr. Galley graduated with honors from Rochester Institute of Technology with a B.S. in Finance. He has received the Chartered Financial Analyst (CFA) designation, is a member of the CFA Institute and is a member of the CFA Society of Chicago.

Stephen O'Neill, CFA is the Fund's co-portfolio manager. Mr. O'Neill conducts qualitative and quantitative analysis of closed-end funds and their respective asset classes. Prior to joining RiverNorth Capital, Mr. O'Neill was most recently an Assistant Vice President at Bank of America in the Global Investment Bank's Portfolio Management group. At Bank of America, he specialized in the corporate real estate, asset management and structured finance industries. Mr. O'Neill graduated magna cum laude from Miami University in Oxford, Ohio with a B.S. in Finance. Mr. O'Neill has received the Chartered Financial Analyst (CFA®) designation, is a member of the CFA Institute and is a member of the CFA Society of Chicago.

Jeffrey E. Gundlach and Jeffrey J. Sherman are co-portfolio managers for the Fund for the Opportunistic Income Strategy.

Mr. Gundlach is the founder, Chief Executive Officer and Chief Investment Officer of the Subadviser. He is also the Chairman of the Subadviser's Fixed Income Asset Allocation Committee. Mr. Gundlach is a graduate of Dartmouth College, summa cum laude, with degrees in Mathematics and Philosophy. He attended Yale University as a Ph.D. candidate in Mathematics.

Mr. Sherman joined the Subadviser in December 2009. He is the Deputy Chief Investment Officer, participates on the Fixed Income Asset Allocation Committee and is a portfolio manager for derivative-based and multi-asset strategies. Mr. Sherman was previously a statistics and mathematics instructor at both the University of the Pacific and Florida State University. Mr. Sherman holds a B.S. in Applied Mathematics from the University of the Pacific and a M.S. in Financial Engineering from the Claremont Graduate University. He is a CFA charterholder.

Compensation of Portfolio Managers

RiverNorth Capital Management, LLC

Mr. Galley's and Mr. O'Neill's total compensation includes a base salary fixed from year to year and a variable performance bonus consisting of cash incentives, which may include mandatory notional investments in the Fund. The amounts paid to Mr. Galley and Mr. O'Neill are based on a percentage of the fees earned by the Adviser from managing the Fund and other investment accounts. The performance bonus reflects individual performance of the funds managed by the portfolio managers and the performance of the Adviser's business as a whole. Mr. Galley and Mr. O'Neill also participate in a 401K program on the same basis as other officers of the Adviser.

Mr. Gundlach's and Mr. Sherman's total compensation is determined by the Subadviser. The overall objective of the compensation program for portfolio managers employed by the Subadviser is for the Subadviser to attract competent and expert investment professionals and to retain them over the long term. Compensation is comprised of several components which, in the aggregate, are designed to achieve these objectives and to reward the Subadviser's portfolio managers for their contribution to the success of their clients and the Subadviser. The Subadviser portfolio managers are compensated through a combination of base salary, discretionary bonus and equity participation in the Subadviser. Bonuses and equity generally represent most of the portfolio managers' compensation. However, in some cases, portfolio managers may have a profit sharing interest in the revenue or income related to the areas for which the portfolio managers are responsible. Such profit sharing arrangements can comprise a significant portion of the portfolio managers' overall compensation.

Salary. Salary is agreed to with managers at time of employment and is reviewed from time to time. It does not change significantly and often does not constitute a significant part of the portfolio managers' compensation.

Discretionary Bonus/Guaranteed Minimums. Portfolio managers receive discretionary bonuses. However, in some cases, pursuant to contractual arrangements, some portfolio managers may be entitled to a mandatory minimum bonus if the sum of their salary and profit sharing does not reach certain levels.

Equity Incentives. Portfolio managers participate in equity incentives based on overall firm performance of the Subadviser, through direct ownership interests in the Subadviser or participation in stock option or stock appreciation plans of Subadviser. These ownership interests or participation interests provide eligible portfolio managers the opportunity to participate in the financial performance of the Subadviser as a whole. Participation is generally determined in the discretion of the Subadviser, taking into account factors relevant to the portfolio manager's contribution to the success of Subadviser.

Other Plans and Compensation Vehicles. Portfolio managers may elect to participate in the Subadviser's 401(k) plan, to which they may contribute a portion of their pre-and post-tax compensation to the plan for investment on a tax-deferred basis. The Subadviser may also choose, from time to time to offer certain other compensation plans and vehicles, such as a deferred compensation plan, to portfolio managers.

Summary. As described above, an investment professional's total compensation is determined through a subjective process that evaluates numerous quantitative and qualitative factors, including the contribution made to the overall investment process. Not all factors apply to each investment professional and there is no particular weighting or formula for considering certain factors. Among the factors considered are: relative investment performance of portfolios (although there are no specific benchmarks or periods of time used in measuring performance); complexity of investment strategies; participation in the investment team's dialogue; contribution to business results and overall business strategy; success of marketing/business development efforts and client servicing; seniority/length of service with the firm; management and supervisory responsibilities; and fulfillment of the Subadviser's leadership criteria.

Portfolio Manager Ownership of Fund Shares

As of the date of the SAI, none of the portfolio managers beneficially owns any equity securities of the Fund.

Conflicts of Interest

Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other accounts. More specifically, portfolio managers who manage multiple funds are presented with the following potential conflicts, among others:

The management of multiple accounts may result in a portfolio manager devoting unequal time and attention to the management of each account. The management of multiple funds and accounts also may give rise to potential conflicts of interest if the funds and accounts have different objectives, benchmarks, time horizons and fees as the portfolio manager must allocate his time and investment ideas across multiple funds and accounts. Another potential conflict of interest may arise where another account has the same or similar investment objective as the Fund, whereby the portfolio manager could favor one account over another.

With respect to securities transactions for the Fund, the Adviser or Subadviser determines which broker to use to execute each order, consistent with the duty to seek best execution of the transaction. A portfolio manager may execute transactions for another fund or account that may adversely impact the value of securities held by the Fund. Securities selected for funds or accounts other than the Fund may outperform the securities selected for the Fund. Further, a potential conflict could include a portfolio manager's knowledge about the size, timing and possible market impact of Fund trades, whereby they could use this information to the advantage of other accounts and to the disadvantage of the Fund. These potential conflicts of interest could create the appearance that a portfolio manager is favoring one investment vehicle over another.

The management of personal accounts also may give rise to potential conflicts of interest. Although the portfolio manager generally does not trade securities in his or her own personal account, the Adviser, the Subadviser and the Fund have each adopted a code of ethics that, among other things, permits personal trading by employees (including trading in securities that can be purchased, sold or held by the Fund) under conditions where it has been determined that such trades would not adversely impact client accounts. Nevertheless, the management of personal accounts may give rise to potential conflicts of interest, and there is no assurance that these codes of ethics will adequately address such conflicts.

Conflicts potentially limiting the Fund's investment opportunities may also arise when the Fund and other clients of the Adviser or Subadviser invest in, or even conduct research relating to, different parts of an issuer's capital structure, such as when the Fund owns senior debt obligations of an issuer and other clients own junior tranches of the same issuer. In such circumstances, decisions over whether to trigger an event of default, over the terms of any workout, or how to exit an investment may result in conflicts of interest. In order to minimize such conflicts, a portfolio manager may avoid certain investment opportunities that would potentially give rise to conflicts with other clients of the Adviser or Subadviser or result in the Adviser or Subadviser receiving material, non-public information, or the Adviser or Subadviser may enact internal procedures designed to minimize such conflicts, which could have the effect of limiting the Fund's investment opportunities. Additionally, if the Adviser or Subadviser acquires material non-public confidential information in connection with its business activities for other clients, a portfolio manager or other investment personnel may be restricted from purchasing securities or selling certain securities for the Fund or other clients. When making investment decisions where a conflict of interest may arise, the Adviser and Subadviser will endeavor to act in a fair and equitable manner between the Fund and other clients; however, in certain instances the resolution of the conflict may result in the Adviser or Subadviser acting on behalf of another client in a manner that may not be in the best interest, or may be opposed to the best interest, of the Fund.

The Adviser and Subadviser have adopted certain compliance procedures which are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

The Underlying Funds in which the Fund invests will not include those that are advised or subadvised by the Adviser, the Subadviser or their affiliates.

Other Accounts Managed

As of July 31, 2016, the portfolio managers of the Fund were responsible for the management of the following other accounts (in addition to the Fund):

NUMBER OF OTHER ACCOUNTS MANAGED AND ASSETS BY ACCOUNT TYPE AS OF JULY 31, 2016

PORTFOLIO MANAGER	REGISTERED INVESTMENT COMPANIES (OTHER THAN THE FUND)	REGISTERED INVESTMENT COMPANIES SUBJECT TO PERFORMANCE- BASED ADVISORY FEES	OTHER POOLED INVESTMENT VEHICLES	OTHER POOLED INVESTMENT VEHICLES SUBJECT TO PERFORMANCE- BASED ADVISORY FEES	OTHER ACCOUNTS	OTHER ACCOUNTS SUBJECT TO PERFORMANCE- BASED ADVISORY FEES

Administrator

Under a Master Services Agreement (the “Master Services Agreement”), subject to the supervision of the Board of Directors, U.S. Bancorp Fund Services, LLC (“USBFS”) is responsible for calculating NAVs, providing additional fund accounting and tax services, and providing fund administration and compliance-related services. USBFS will bear all expenses in connection with the performance of its services under the Master Services Agreement, except for certain out-of-pocket expenses described therein. USBFS will not bear any expenses incurred by the Fund, including but not limited to initial organization and offering expenses; litigation expenses; costs of preferred stock (if any); expenses of conducting repurchase offers pursuant to the Fund’s repurchase policy; transfer agency and custodial expenses; taxes; interest; Fund directors’ fees; compensation and expenses of Fund officers who are not associated with USBFS or its affiliates; brokerage fees and commissions; state and federal registration fees; advisory fees; insurance premiums; fidelity bond premiums; Fund legal and audit fees and expenses; costs of maintenance of Fund existence; printing and delivery of materials in connection with meetings of the Fund’s directors; printing and mailing shareholder reports, offering documents, and proxy materials; securities pricing and data services; and expenses in connection with electronic filings with the SEC. Pursuant to the Master Services Agreement, USBFS also acts as dividend disbursing agent for the Fund.

Codes of Ethics

The Fund, Adviser and Subadviser have each adopted a code of ethics under Rule 17j-1 under the 1940 Act. These codes permit personnel subject to the code to invest in securities, including securities that may be purchased or held by the Fund. These codes can be reviewed and copied at the SEC’s Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling the SEC at (202) 942-8090. The codes of ethics are available on the EDGAR Database on the SEC’s website (<http://www.sec.gov>), and copies of these codes may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov, or by writing the SEC Public Reference Section, Washington, D.C. 20549-0102.

FUND SERVICE PROVIDERS

Independent Registered Public Accounting Firm

Cohen & Company, Ltd. (formerly Cohen Fund Audit Services, Ltd.) (“Cohen”) has been appointed as the independent registered public accounting firm for the Fund. Cohen audits the financial statements of the Fund and provides other audit, tax and related services. The Statement of Assets and Liabilities of the Fund as of August 23, 2016 appearing in this SAI has been audited by Cohen, as set forth in its report thereon appearing elsewhere herein, and is included in reliance upon such report given upon the authority of such firm as experts in accounting and auditing.

Legal Counsel

Chapman and Cutler LLP serves as legal counsel to the Fund in connection with the offering of Common Shares contemplated by the Prospectus, and Drinker Biddle & Reath LLP serves as legal counsel to the independent directors of the Fund.

Custodian and Transfer Agent

US Bank, NA, located at 1555 North Rivercenter Drive, Milwaukee, Wisconsin 53212, will serve as the Fund's custodian and will maintain custody of the securities and cash of the Fund pursuant to a Custody Agreement. Under the Custody Agreement, the custodian holds the Fund's assets in compliance with the 1940 Act. For its services, the custodian will receive a monthly fee based upon, among other things, the average daily market value of all long securities and cash held in the Fund's portfolio, plus certain charges for securities transactions.

USBFS will serve as the transfer agent, dividend disbursing agent, fund accountant and administrator for the Fund.

PORTFOLIO TRANSACTIONS

Subject to policies established by the Board of Directors of the Fund, the Adviser or Subadviser is responsible for the Fund's portfolio decisions and the placing of the Fund's portfolio transactions. In placing portfolio transactions, the Adviser or Subadviser seeks the best qualitative execution for the Fund, taking into account such factors as price (including the applicable brokerage commission or dealer spread), the execution capability, financial responsibility and responsiveness of the broker or dealer and the brokerage and research services provided by the broker or dealer. The Adviser or Subadviser generally seeks favorable prices and commission rates that are reasonable in relation to the benefits received under the circumstances under which that particular trade is placed.

The Adviser or Subadviser is specifically authorized to select brokers or dealers who also provide brokerage and research services to the Fund and/or the other accounts over which the Adviser or Subadviser exercises investment discretion, and to pay such brokers or dealers a commission in excess of the commission another broker or dealer would charge if the Adviser or Subadviser determines in good faith that the commission is reasonable in relation to the value of the brokerage and research services provided. The determination may be viewed in terms of a particular transaction or the Adviser's or Subadviser's overall responsibilities with respect to the Fund and to other accounts over which it exercises investment discretion. The Adviser or Subadviser may not give consideration to sales of Common Shares of the Fund as a factor in the selection of brokers and dealers to execute portfolio transactions. However, the Adviser or Subadviser may place portfolio transactions with brokers or dealers that promote or sell the Fund's Common Shares so long as such placements are made pursuant to policies approved by the Board of Directors that are designed to ensure that the selection is based on the quality of the broker's execution and not on its sales efforts.

Research services include supplemental research, securities and economic analyses, statistical services and information with respect to the availability of securities or purchasers or sellers of securities and analyses of reports concerning performance of accounts. (Much, if not all, of this information is the usual and customary research provided to the Adviser and Subadviser irrespective of any trading activity effected with that broker). The research services and other information furnished by brokers through whom the Fund effects securities transactions may also be used by the Adviser or Subadviser in servicing other accounts. Similarly, research and information provided by brokers or dealers when serving other clients may be useful to the Adviser or Subadviser in connection with its services to the Fund. Although research services and other information are useful to the Fund and the Adviser or Subadviser, it is not possible to place a dollar value on the research and other information received. It is the opinion of the Board of Directors and the Adviser or Subadviser that the review and study of the research and other information will not increase or reduce the overall cost to the Adviser or Subadviser of performing its duties to the Fund under the Agreement.

Over-the-counter transactions will be placed either directly with principal market makers or with broker-dealers, if the same or a better price, including commissions and executions, is available. Fixed income securities are normally purchased directly from the issuer, an underwriter or a market maker. Purchases include a concession paid by the issuer to the underwriter and the purchase price paid to a market maker may include the spread between the bid and asked prices.

When the Fund and another of the Adviser's or Subadviser's clients seek to purchase or sell the same security at or about the same time, the Adviser or Subadviser may execute the transaction on a combined ("blocked") basis. Blocked transactions can produce better execution for the Fund because of the increased volume of the transaction. If the entire blocked order is not filled, the Fund may not be able to acquire as large a position in such security as it desires or it may have to pay a higher price for the security. Similarly, the Fund may not be able to obtain as large an execution of an order to sell or as high a price for any particular portfolio security if the other client desires to sell the same portfolio security at the same time. In the event that the entire blocked order is not filled, the purchase or sale will normally be allocated on a pro rata basis. The Adviser or Subadviser may adjust the allocation when, taking into account such factors as the size of the individual orders and transaction costs, the Adviser or Subadviser believes an adjustment is reasonable.

U.S. FEDERAL INCOME TAX MATTERS

The following is a summary discussion of certain U.S. federal income tax consequences that may be relevant to a shareholder that acquires, holds and/or disposes of Common Shares of the Fund. This discussion only addresses U.S. federal income tax consequences to U.S. shareholders who hold their Common Shares as capital assets and does not address all of the U.S. federal income tax consequences that may be relevant to particular shareholders in light of their individual circumstances. This discussion also does not address the tax consequences to shareholders who are subject to special rules, including, without limitation, banks and other financial institutions, insurance companies, dealers in securities or foreign currencies, traders in securities that have elected to mark-to-market their securities holdings, foreign holders, persons who hold their Common Shares as or in a hedge against currency risk, or as part of a constructive sale, straddle or conversion transaction, or tax-exempt or tax-deferred plans, accounts, or entities. In addition, the discussion does not address any state, local, or foreign tax consequences. The discussion reflects applicable income tax laws of the United States as of the date hereof, which tax laws may be changed or subject to new interpretations by the courts or the Internal Revenue Service ("IRS") retroactively or prospectively, which could affect the continued validity of this summary. No attempt is made to present a detailed explanation of all U.S. federal income tax concerns affecting the Fund and its shareholders, and the discussion set forth herein does not constitute tax advice. **Investors are urged to consult their own tax advisors before making an investment in the Fund to determine the specific tax consequences to them of investing in the Fund, including the applicable federal, state, local and foreign tax consequences as well as the effect of possible changes in tax laws.**

Fund Taxation

The Fund intends to elect to be treated, and to qualify each year, as a "regulated investment company" under Subchapter M of the Code, so that it will generally not pay U.S. federal income tax on income and capital gains timely distributed (or treated as being distributed, as described below) to shareholders. If the Fund qualifies as a regulated investment company and distributes to its shareholders at least 90% of the sum of (i) its "investment company taxable income" as that term is defined in the Code (which includes, among other things, dividends, taxable interest, the excess of any net short-term capital gains over net long-term capital losses and certain net foreign exchange gains as reduced by certain deductible expenses) without regard to the deduction for dividends paid, and (ii) the excess of its gross tax-exempt interest, if any, over certain disallowed deductions, the Fund will be relieved of U.S. federal income tax on any income of the Fund, including long-term capital gains, distributed to shareholders. However, if the Fund retains any investment company taxable income or "net capital gain" (*i.e.*, the excess of net long-term capital gain over net short-term capital loss), it will be subject to U.S. federal income tax at regular corporate federal income tax rates (currently at a maximum rate of 35%) on the amount retained. The Fund intends to distribute at least annually all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), net tax-exempt interest, if any, and net capital gain. Under the Code, the Fund will generally be subject to a nondeductible 4% federal excise tax on the portion of its undistributed ordinary income and capital gains if it fails to meet certain distribution requirements with respect to each calendar year. In order to avoid the 4% federal excise tax, the required minimum distribution is generally equal to the sum of 98% of the Fund's ordinary income (computed on a calendar year basis, and taking into account certain deferrals and elections), plus 98.2% of the Fund's capital gain net income (generally computed for the one-year period ending on October 31) plus undistributed amounts from prior years on which the Fund paid no federal income tax. The Fund generally intends to make distributions in a timely manner in an amount at least equal to the required minimum distribution and therefore, under normal circumstances, does not expect to be subject to this excise tax. However, the Fund may also decide to distribute less and pay the federal excise taxes.

If, for any taxable year, the Fund did not qualify as a regulated investment company for U.S. federal income tax purposes, it would be treated as a U.S. corporation subject to U.S. federal income tax, and possibly state and local income tax, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In such event, the Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, would generally constitute ordinary dividends, which would generally be eligible for the dividends received deduction available to corporate shareholders, and non-corporate shareholders would generally be able to treat such distributions as "qualified dividend income" eligible for reduced rates of U.S. federal income taxation, provided in each case that certain holding period and other requirements are satisfied.

If for any taxable year the Fund does not qualify as a regulated investment company for U.S. federal income tax purposes, it would be treated as a U.S. corporation subject to U.S. federal income tax, and possibly state and local income tax, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In such event, the Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, would generally constitute ordinary dividends, which generally would be eligible for the dividends received deduction available to corporate shareholders under Section 243 of the Code, discussed below, and non-corporate shareholders of the Fund generally would be able to treat such distributions as qualified dividend income eligible for reduced rates of U.S. federal income taxation, as discussed below, provided in each case that certain holding period and other requirements are satisfied.

If the Fund or an Underlying Fund invests in certain positions such as pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if the Fund or Underlying Fund elects to include market discount in income currently), the Fund or Underlying Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, the Fund must distribute, at least annually, all or substantially all of its net investment income, including such accrued income, to shareholders to avoid U.S. federal income and excise taxes. Therefore, the Fund may have to dispose of its portfolio securities under disadvantageous circumstances to generate cash, or may have to leverage itself by borrowing the cash, to satisfy distribution requirements.

The Fund or an Underlying Fund may also acquire market discount bonds. A market discount bond is a security acquired in the secondary market at a price below its stated redemption price at maturity (or its adjusted issue price if it is also an original issue discount bond). If the Fund or an Underlying Fund invests in a market discount bond, it will be required for federal income tax purposes to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount unless the Fund or Underlying Fund elects to include the market discount in income as it accrues.

The Fund or an Underlying Fund may invest in debt obligations that are in the lowest rating categories or are unrated, including debt obligations of issuers not currently paying interest or who are in default. Investments in debt obligations that are at risk of or in default present special tax issues. Tax rules are not entirely clear about issues such as when the Fund or an Underlying Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other related issues will be addressed by the Fund when, as and if it invests in such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a regulated investment company and does not become subject to U.S. federal income or excise taxes.

The Fund will not be able to offset gains distributed by one Underlying Fund in which it invests against losses realized by another Underlying Fund in which the Fund invests. Redemptions of shares in an Underlying Fund, including those resulting from changes in the allocation among Underlying Funds, could also cause additional distributable gains to shareholders of the Fund. A portion of any such gains may be short-term capital gains that would be distributable as ordinary income to shareholders of the Fund. Further, a portion of losses on redemptions of shares in the Underlying Funds may be deferred under the wash sale rules. Additionally, the Fund's investment in an Underlying Fund may result in the Fund's receipt of cash in excess of the Underlying Fund's earnings; if the Fund distributes these amounts, the distributions could constitute a return of capital to Fund shareholders for federal income tax purposes. As a result of these factors, the use of the fund of funds structure by the Fund could therefore affect the amount, timing and character of distributions to shareholders.

The Fund or an Underlying Fund may engage in various transactions utilizing options, futures contracts, forward contracts, hedge instruments, straddles, and other similar transactions. Such transactions may be subject to special provisions of the Code that, among other things, affect the character of any income realized by the Fund from such investments, accelerate recognition of income to the Fund, defer Fund losses and affect the determination of whether capital gain or loss is characterized as long-term or short-term capital gain or loss. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions may also require the Fund to mark-to-market certain positions in its portfolio (*i.e.*, treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for avoiding U.S. federal income and excise taxes. In addition, certain Fund investments may produce income that will not be qualifying income for purposes of the 90% income test. The Fund will monitor its investments and transactions, will make the appropriate tax elections, and will make the appropriate entries in its books and records when it acquires an option, futures contract, forward contract, hedge instrument or other similar investment in order to mitigate the effect of these rules, prevent disqualification of the Fund as a regulated investment company and minimize the imposition of U.S. federal income and excise taxes, if possible.

The Fund's transactions in broad based equity index futures contracts, exchange-traded options on such indices and certain other futures contracts (if any) are generally considered "Section 1256 contracts" for federal income tax purposes. Any unrealized gains or losses on such Section 1256 contracts are treated as though they were realized at the end of each taxable year. The resulting gain or loss is treated as sixty percent long-term capital gain or loss and forty percent short-term capital gain or loss. Gain or loss recognized on actual sales of Section 1256 contracts is treated in the same manner. As noted below, distributions of net short-term capital gain are taxable to shareholders as ordinary income while distributions of net long-term capital gain are generally taxable to shareholders as long-term capital gain, regardless of how long the shareholder has held Common Shares of the Fund.

The Fund's entry into a short sale transaction, an option or certain other contracts (if any) could be treated as the constructive sale of an appreciated financial position, causing the Fund to realize gain, but not loss, on the position.

Foreign exchange gains and losses realized by the Fund in connection with certain transactions involving foreign currency-denominated debt securities, certain options and futures contracts relating to foreign currency, foreign currency forward contracts, foreign currencies, or payables or receivables denominated in a foreign currency (if any) are subject to Section 988 of the Code, which generally causes such gain and loss to be treated as ordinary income or loss and may affect the amount, timing and character of distributions to shareholders.

If the Fund acquires any equity interest (generally including not only stock but also an option to acquire stock such as is inherent in a convertible bond) in certain foreign corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties, or capital gains) or that hold at least 50% of their assets in investments producing such passive income ("passive foreign investment companies"), the Fund could be subject to U.S. federal income tax and additional interest charges on "excess distributions" received from such companies or on gain from the sale of equity interests in such companies, even if all income or gain actually received by the Fund is timely distributed to its shareholders. The Fund would not be able to pass through to its shareholders any credit or deduction for such tax. Any gain on the sale of these investments will generally be treated as ordinary income. Elections may be available that would ameliorate some or all of these adverse federal income tax consequences, but any such election could require the Fund to recognize taxable income or gain (which would be subject to the distribution requirements described above) without the concurrent receipt of cash. The Fund may limit and/or manage its holdings in passive foreign investment companies to limit its tax liability or maximize its return from these investments.

The Fund or an Underlying Fund may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to its investments in those countries (if any), which would, if imposed, reduce the yield on or return from those investments. Tax treaties between certain countries and the U.S. may reduce or eliminate such taxes in some cases. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of stock or securities of foreign corporations, or if at least 50% of the value of the Fund's total assets at the close of each quarter of its taxable year is represented by interests in other regulated investment companies, the Fund may elect to "pass through" to its shareholders the amount of foreign taxes paid or deemed paid by the Fund. If the Fund so elects, each of its shareholders would be required to include in gross income, even though not actually received, its pro rata share of the foreign taxes paid or deemed paid by the Fund, but would be treated as having paid its pro rata share of such foreign taxes and would therefore be allowed to either deduct such amount in computing taxable income or use such amount (subject to various limitations) as a foreign tax credit against federal income tax (but not both).

If the Fund utilizes leverage through borrowing, asset coverage limitations imposed by the 1940 Act as well as additional restrictions that may be imposed by certain lenders on the payment of dividends or distributions could potentially limit or eliminate the Fund's ability to make distributions on its common stock until the asset coverage is restored. These limitations could prevent the Fund from distributing at least 90% of its investment company taxable income as is required under the Code and therefore might jeopardize the Fund's qualification as a regulated investment company and/or might subject the Fund to the nondeductible 4% federal excise tax discussed above. Upon any failure to meet the asset coverage requirements imposed by the 1940 Act, the Fund may, in its sole discretion and to the extent permitted under the 1940 Act, purchase or redeem shares of preferred stock, if any, in order to maintain or restore the requisite asset coverage and avoid the adverse consequences to the Fund and its shareholders of failing to meet the distribution requirements. There can be no assurance, however, that any such action would achieve these objectives. The Fund generally will endeavor to avoid restrictions on its ability to distribute dividends.

Shareholder Taxation

Distributions of investment company taxable income are generally taxable as ordinary income to the extent of the Fund's current and accumulated earnings and profits. Distributions of net investment income designated by the Fund as derived from qualified dividend income will be taxed in the hands of individuals and other non-corporate taxpayers at the rates applicable to long-term capital gain, provided certain holding period and other requirements are met at both the shareholder and Fund levels. A dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (i) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning on the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before such date), (ii) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (iii) if the recipient elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest, or (iv) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the U.S. which the IRS has approved for these purposes (with the exception of dividends paid on stock of such a foreign corporation that is readily tradable on an established securities market in the U.S.) or (b) treated as a passive foreign investment company. If the Fund received dividends from an Underlying Fund that qualifies as a regulated investment company, and the Underlying Fund designates such dividends as qualified dividend income, then the Fund is permitted in turn to designate a portion of its distributions as qualified dividend income, provided the Fund meets holding period and other requirements with respect to shares of the Underlying Fund. Qualified dividend income does not include interest from fixed income securities and generally does not include income from REITs. If the Fund lends portfolio securities, amounts received by the Fund that is the equivalent of the dividends paid by the issuer on the securities loaned will not be eligible for qualified dividend income treatment. The Fund can provide no assurance regarding the portion of its dividends that will qualify for qualified dividend income treatment.

Distributions of net capital gain, if any, that are properly reported by the Fund are taxable at long-term capital gain rates for U.S. federal income tax purposes without regard to the length of time the shareholder has held Common Shares of the Fund. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits, if any, will be treated by a shareholder as a tax-free return of capital, which is applied against and reduces the shareholder's basis in his, her or its Common Shares. To the extent that the amount of any such distribution exceeds the shareholder's basis in his, her or its Common Shares, the excess will be treated by the shareholder as gain from the sale or exchange of such Common Shares. The U.S. federal income tax status of all distributions will be designated by the Fund and reported to shareholders annually.

Certain distributions by the Fund may qualify for the dividends received deduction available to corporate shareholders under Section 243 of the Code, subject to certain holding period and other requirements, but generally only to the extent the Fund earned dividend income from stock investments in U.S. domestic corporations (but not including real estate investment trusts). Additionally, if the Fund received dividends from an Underlying Fund that qualifies as a regulated investment company, and the Underlying Fund designates such dividends as eligible for the dividends received deduction, then the Fund is permitted in turn to designate a portion of its distributions as eligible for the dividends received deduction, provided the Fund meets holding period and other requirements with respect to shares of the Underlying Fund. The Fund can provide no assurance regarding the portion of its dividends that will qualify for the dividends received deduction.

A shareholder may elect to have all dividends and distributions automatically reinvested in Common Shares of the Fund. For U.S. federal income tax purposes, all dividends are generally taxable regardless of whether a shareholder takes them in cash or they are reinvested in additional Common Shares of the Fund.

If a shareholder's distributions are automatically reinvested in additional Common Shares, for U.S. federal income tax purposes, the shareholder will be treated as having received a taxable distribution in the amount of the cash dividend that the shareholder would have received if the shareholder had elected to receive cash, unless the distribution is in newly issued Common Shares of the Fund that are trading at or above net asset value, in which case the shareholder will be treated as receiving a taxable distribution equal to the fair market value of the stock the shareholder receives.

The Fund intends to distribute all realized net capital gains, if any, at least annually. If, however, the Fund were to retain any net capital gain, the Fund may designate the retained amount as undistributed capital gains in a notice to shareholders who, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income, as long-term capital gain, their proportionate share of such undistributed amount, and (ii) will be entitled to credit their proportionate share of the federal income tax paid by the Fund on the undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For U.S. federal income tax purposes, the tax basis of Common Shares owned by a shareholder of the Fund will be increased by the difference between the amount of undistributed net capital gain included in the shareholder's gross income and the federal income tax deemed paid by the shareholder.

Any dividend declared by the Fund in October, November or December with a record date in such a month and paid during the following January will be treated for U.S. federal income tax purposes as paid by the Fund and received by shareholders on December 31 of the calendar year in which it is declared.

At the time of an investor's purchase of the Fund's Common Shares, a portion of the purchase price may be attributable to realized or unrealized appreciation in the Fund's portfolio or undistributed taxable income of the Fund. Consequently, subsequent distributions by the Fund with respect to these Common Shares from such appreciation or income may be taxable to such investor even if the net asset value of the investor's Common Shares is, as a result of the distributions, reduced below the investor's cost for such Common Shares and the distributions economically represent a return of a portion of the investment. Investors should consider the tax implications of purchasing Common Shares just prior to a distribution.

The IRS has taken the position that if a regulated investment company has two or more classes of shares, it must designate distributions made to each class in any year as consisting of no more than such class' proportionate share of particular types of income (e.g., ordinary income and net capital gains). Consequently, if both common stock and preferred stock are outstanding, the Fund intends to designate distributions made to each class of particular types of income in accordance with each class' proportionate share of such income. Thus, the Fund will designate to the extent applicable, dividends qualifying for the corporate dividends received deduction (if any), income not qualifying for the dividends received deduction, qualified dividend income, ordinary income and net capital gain in a manner that allocates such income between the holders of common stock and preferred stock in proportion to the total dividends paid to each class during or for the taxable year, or otherwise as required by applicable law. However, for purposes of determining whether distributions are out of the Fund's current or accumulated earnings and profits, the Fund's earnings and profits will be allocated first to the Fund's preferred stock, if any, and then to the Fund's common stock. In such a case, since the Fund's current and accumulated earnings and profits will first be used to pay dividends on the preferred stock, distributions in excess of such earnings and profits, if any, will be made disproportionately to holders of common stock.

In addition, solely for the purpose of satisfying the 90% distribution requirement and the distribution requirement for avoiding federal income taxes, certain distributions made after the close of a taxable year of the Fund may be "spilled back" and treated as paid during such taxable year. In such case, shareholders will be treated as having received such dividends in the taxable year in which the distribution was actually made.

Sales, exchanges and other dispositions of the Fund's Common Shares generally are taxable events for shareholders that are subject to federal income tax. Shareholders should consult their own tax advisors regarding their individual circumstances to determine whether any particular transaction in the Fund's Common Shares is properly treated as a sale or exchange for federal income tax purposes (as the following discussion assumes) and the tax treatment of any gains or losses recognized in such transactions. Generally, gain or loss will be equal to the difference between the amount of cash and the fair market value of other property received (including securities distributed by the Fund) and the shareholder's adjusted tax basis in the Common Shares sold or exchanged. In general, any gain or loss realized upon

a taxable disposition of Common Shares will be treated as long-term capital gain or loss if the Common Shares have been held for more than one year. Otherwise, the gain or loss on the taxable disposition of the Fund's Common Shares will be treated as short-term capital gain or loss. However, any loss realized by a shareholder upon the sale or other disposition of Common Shares with a tax holding period of six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gain with respect to such Common Shares. For the purposes of calculating the six-month period, the holding period is suspended for any periods during which the shareholder's risk of loss is diminished as a result of holding one or more other positions in substantially similar or related property or through certain options, short sales or contractual obligations to sell. The maximum individual rate applicable to long-term capital gains is generally either 15% or 20%, depending on whether the individual's income exceeds certain threshold amounts. The ability to deduct capital losses may be subject to limitations. In addition, losses on sales or other dispositions of Common Shares may be disallowed under the "wash sale" rules in the event a shareholder acquires substantially identical stock or securities (including those made pursuant to reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after a sale or other disposition of Common Shares. In such a case, the disallowed portion of any loss generally would be included in the U.S. federal income tax basis of the Common Shares acquired.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Common Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts. Because the Fund does not expect to distribute dividends that would give rise to an adjustment to an individual's alternative minimum taxable income, an investment in the Common Shares should not, by itself, cause the holders of Common Shares to become subject to alternative minimum tax.

From time to time, the Fund may repurchase its Common Shares. Shareholders who tender all Common Shares held, and those considered to be held (through attribution rules contained in the Code), by them will be treated as having sold their Common Shares and generally will realize a capital gain or loss. If a shareholder tenders fewer than all of his, her or its Common Shares (including those considered held through attribution), such shareholder may be treated as having received a taxable dividend upon the tender of its Common Shares. If a tender offer is made, there is a risk that non-tendering shareholders will be treated as having received taxable distributions from the Fund. To the extent that the Fund recognizes net gains on the liquidation of portfolio securities to meet such tenders of Common Shares, the Fund will be required to make additional distributions to its shareholders. If the Board of Directors determines that a tender offer will be made by the Fund, the federal income tax consequences of such offer will be discussed in materials that will be available at such time in connection with the specific tender offer, if any.

The Code requires that the Fund withhold, as "backup withholding," 28% of reportable payments, including dividends, capital gain distributions and the proceeds of sales or other dispositions of the Fund's stock paid to shareholders who have not complied with IRS regulations. In order to avoid this withholding requirement, shareholders must certify on their account applications, or on a separate IRS Form W-9, that the social security number or other taxpayer identification number they provide is their correct number and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. The Fund may nevertheless be required to withhold if it receives notice from the IRS or a broker that the number provided is incorrect or backup withholding is applicable. Backup withholding is not an additional tax. Any amount withheld may be allowed as a refund or a credit against the shareholder's U.S. federal income tax liability if the appropriate information (such as the timely filing of the appropriate federal income tax return) is provided to the IRS.

Under Treasury regulations, if a shareholder recognizes a loss with respect to Common Shares of \$2 million or more in a single taxable year (or \$4 million or more in any combination of taxable years) for an individual shareholder, S corporation or trust or \$10 million or more in a single taxable year (or \$20 million or more in any combination of years) for a shareholder who is a C corporation, such shareholder will generally be required to file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are generally excepted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all regulated investment companies. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Other Taxes

The description of certain U.S. federal income tax provisions above relates only to U.S. federal income tax consequences for shareholders who are U.S. persons (*i.e.*, U.S. citizens or residents or U.S. corporations, partnerships, trusts or estates). Non-U.S. shareholders should consult their tax advisors concerning the tax consequences of ownership of Common Shares of the Fund, including the possibility that distributions may be subject to a 30% U.S. withholding tax (or a reduced rate of withholding provided by an applicable treaty if the investor provides proper certification of its non-U.S. status).

Shareholders should consult their own tax advisors on these matters and on any specific question of U.S. federal, state, local, foreign and other applicable tax laws before making an investment in the Fund.

BOARD MEMBERS AND OFFICERS

The following table presents certain information regarding the members of the Board of Directors (each, a “Board Member”). Each Board Member’s year of birth is set forth in parentheses after his or her name. The Board of Directors is divided into three classes of directors serving staggered three-year terms. The initial terms of the first, second and third classes of directors will expire at the first, second and third annual meetings of shareholders, respectively, and, in each case, until their successors are duly elected and qualify, or until a director sooner dies, retires, resigns or is removed as provided in the governing documents of the Fund. Upon expiration of their initial terms, directors of each class will be elected to serve for three-year terms and until their successors are duly elected and qualify, and at each annual meeting one class of directors will be elected by the shareholders.

Except as otherwise noted, the address for all directors and officers is 325 North LaSalle Street, Suite 645, Chicago, Illinois 60654. The “independent directors” consist of those directors who are not “interested persons” of the Fund, as that term is defined under the 1940 Act (each, an “Independent Director” and collectively, the “Independent Directors”).

<u>Name, Address and Year of Birth</u>	<u>Position(s) Held with Registrant</u>	<u>Term of Office and Length of Time Served</u>	<u>Principal Occupation(s) During Past 5 Years</u>	<u>Number of Portfolios in Fund Complex(1) Overseen by Director</u>	<u>Other Directorships(2) Held by Director During Past 5 Years</u>

(2010 to present).
Marcus L. Collins (1968)	Chief Compliance Officer and Secretary	Has served since 2016.	General Counsel, RiverNorth Capital Management, LLC (2012 to present); Chief Compliance Officer, RiverNorth Capital Management, LLC (2012 to present); Counsel, Thompson Hine, LLP (2007 to 2012)	N/A	N/A

(1) The term "Fund Complex" means two or more registered investment companies that:

- (a) hold themselves out to investors as related companies for purposes of investment and investor services; or
- (b) have a common investment adviser or that have an investment adviser that is an affiliated person of the investment adviser of any of the other registered investment companies.

- (2) The numbers enclosed in the parentheticals represent the number of funds overseen in each respective directorship held by the director.
- (3) Mr. Galley is deemed an “interested person” of the Fund due to his position as Chief Investment Officer of RiverNorth Capital Management, LLC, investment adviser to the Fund.

Board Leadership Structure. The Board of Directors, which has overall responsibility for the oversight of the Fund’s investment programs and business affairs, believes that it has structured itself in a manner that allows it to effectively perform its oversight obligations. Mr. Patrick W. Galley, the Chairman of the Board (“Chairman”), is not an Independent Director. The Board believes that the use of an interested director as Chairman is the appropriate leadership structure for the Fund given (i) Mr. Patrick Galley’s role in the day to day operations of the Adviser, (ii) the extent to which the work of the Board of Directors is conducted through the Audit Committee of the Board of Directors (the “Audit Committee”) and the Nominating and Corporate Governance Committee of the Board of Directors (the “Nominating and Corporate Governance Committee”), each of whose meetings is chaired by an Independent Director, (iii) the frequency that Independent Directors meet with their independent legal counsel and auditors in the absence of members of the Board of Directors who are interested directors of the Fund and management, and (iv) the overall sophistication of the Independent Directors, both individually and collectively. The members of the Board of Directors will also complete an annual self-assessment during which the directors review their overall structure and consider where and how its structure remains appropriate in light of the Fund’s current circumstances. The Chairman’s role is to preside at all meetings of the Board of Directors and in between meetings of the Board of Directors to generally act as the liaison between the Board of Directors and the Fund’s officers, attorneys and various other service providers, including but not limited to the Adviser and other such third parties servicing the Fund. The Board of Directors believes that having an interested person serve as Chairman of the Board of Directors enables Mr. Patrick Galley to more effectively carry out these liaison activities. The Board of Directors also believes that it benefits during its meetings from having a person intimately familiar with the operation of the Fund to set the agenda for meetings of the Board of Directors to ensure that important matters are brought to the attention of and considered by the Board of Directors.

The Fund has two standing committees, each of which enhances the leadership structure of the Board of Directors: the Audit Committee and the Nominating and Corporate Governance Committee. The Audit Committee and Nominating and Corporate Governance Committee are each chaired by, and composed of, members who are Independent Directors.

The Audit Committee is comprised of Messrs. Carter, Kelley, Oakes and Steingraber, all of whom are “independent” as defined in the listing standard of the NYSE. Mr. Kelley is the Chair of the Audit Committee and has been determined to qualify as an “Audit Committee Financial Expert” as such term is defined in Form N-CSR. The role of the Audit Committee is to assist the Board of Directors in its oversight of (i) the quality and integrity of the Fund’s financial statements, reporting process and the independent registered public accounting firm (the “independent accountants”) and reviews thereof, (ii) the Fund’s accounting and financial reporting policies and practices, its internal controls and, as appropriate, the internal controls of certain service providers, (iii) the Fund’s compliance with legal and regulatory requirements, and (iv) the independent accountants’ qualifications, independence and performance. The Audit Committee is also required to prepare an audit committee report pursuant to the rules of the SEC for inclusion in the Fund’s annual proxy statement. The Audit Committee operates pursuant to the Audit Committee Charter that was most recently reviewed and approved by the Board of Directors on August 17, 2016. The Audit Committee Charter is available at the Fund’s website, www.rivernorth.com. As set forth in the Audit Committee Charter, management is responsible for maintaining appropriate systems for accounting and internal control, and the Fund’s independent accountants are responsible for planning and carrying out proper audits and reviews. The independent accountants are ultimately accountable to the Board of Directors and to the Audit Committee, as representatives of the shareholders. The independent accountants for the Fund report directly to the Audit Committee.

The Nominating and Corporate Governance Committee is comprised of Messrs. Carter, Kelley, Oakes and Steingraber. Mr. Carter is the Chair of the Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee is responsible for identifying and recommending to the Board of Directors individuals believed to be qualified to become members of the Board of Directors in the event that a position is vacated or created. The Nominating and Corporate Governance Committee will consider director candidates recommended by shareholders. In considering candidates submitted by shareholders, the Nominating and Corporate Governance Committee will take into consideration the needs of the Board of Directors, the qualifications of the candidate and the interests of shareholders. Shareholders wishing to recommend candidates to the Nominating and Corporate Governance Committee should submit such recommendations in accordance with the Bylaws to the Secretary of the Fund, who

will forward the recommendations to the committee for consideration. Each eligible shareholder or shareholder group may submit no more than one Independent Director nominee each calendar year. The Nominating and Corporate Governance Committee has not determined any minimum qualifications necessary to serve as a director of the Fund.

Director Qualifications.

In addition to the description of each Director's Principal Occupation(s) and Other Directorships set forth above, the following provides further information about each Director's specific experience, qualifications, attributes or skills that led to the conclusion that he should serve as a director for the Fund. There are no specific required qualifications for membership on the Board of Directors.

Interested Director

Mr. Patrick Galley is the Chief Investment Officer for the Fund's investment adviser. He is also the President and a portfolio manager of the Fund. His knowledge regarding the investment strategy of the Fund, more specifically the closed-end mutual fund industry, makes him uniquely qualified to serve as the Fund's President.

Independent Directors

Mr. John K. Carter possesses extensive mutual fund industry experience. Mr. Carter was previously President and Chief Executive Officer at Transamerica Asset Management, a subsidiary of Aegon, N.V. Mr. Carter oversaw the mutual fund servicing, operations and advisory services for Transamerica's approximately 120 mutual funds. He also served as a compliance officer. Mr. Carter brings experience managing a large mutual fund complex, including experience overseeing multiple sub-advisers. Mr. Carter was previously an investment management attorney with experience as in-house counsel, serving with the SEC and in private practice with a large law firm. The Board of Directors feels Mr. Carter's industry-specific experience, including as a chairman of another fund complex, as a compliance officer and as an experienced investment management attorney will be valuable to the Board of Directors as the Fund continues to grow and deal with legally complex issues.

Mr. James G. Kelley is currently an Executive and Business Coach at JGK & Associates, a consulting firm, and was formerly the Vice President Finance & Operation with Paymaster Technologies, Inc. and Executive Vice President and Chief Operating Officer of The Hedman Company, a manufacturing company. Mr. Kelley has not only executive experience but is knowledgeable in both finance and accounting. His experience in these areas benefits the Board of Directors in its review of the Fund's financial statements.

Mr. John S. Oakes has many years of experience in the securities industry. Additionally he had served on the board of directors of another registered investment company, including serving as its chairman. The Board of Directors feels Mr. Oakes' industry and board experience adds an operational perspective to the Board of Directors and his experience in marketing can assist the Fund in its efforts to expand into different distribution channels.

Mr. Fred G. Steingraber currently serves as Chairman of Board Advisors LLC, a consulting and advisory firm which assists organizations and corporate boards in assessing corporate governance, strategy and organization issues and executive compensation. Prior to his experience with Board Advisors LLC, Mr. Steingraber was Chief Executive Officer and Chairman of the Board of Directors of A.T. Kearney, a global business consulting firm. Mr. Steingraber has extensive experience serving on advisory boards, corporate boards (of both publically-traded and privately-held companies) and not-for-profit boards, including boards of foundations, universities and hospitals. He also currently serves as the President and Chairman of the Board of Trustees of the Village of Kenilworth, Illinois and a director at Terrence Labs. The Board believes Mr. Steingraber's experience and expertise as a business consultant, including his expertise in corporate governance issues, adds depth and understanding to its consideration of the Board of Directors' obligations to the Fund and shareholders.

Risk Oversight. The Fund is confronted with a multitude of risks, such as investment risk, counterparty risk, valuation risk, political risk, risk of operational failures, business continuity risk, regulatory risk, legal risk and other risks not listed here. The Board of Directors recognizes that not all risk that may affect the Fund can be known, eliminated or even mitigated. In addition, there are some risks that may not be cost effective or an efficient use of the Fund's limited resources to moderate. As a result of these realities, the Board of Directors, through its oversight and leadership, has and will continue to deem it necessary for shareholders to bear certain and undeniable risks, such as investment risk, in order for the Fund to operate in accordance with its Prospectus, SAI and other related documents.

However, as required under the 1940 Act, the Board of Directors has adopted on the Fund's behalf a vigorous risk program that mandates the Fund's various service providers, including the Adviser and Subadviser, to adopt a variety of processes, procedures and controls to identify various risks, mitigate the likelihood of adverse events from occurring and/or attempt to limit the effects of such adverse events on the Fund. The Board of Directors fulfills its leadership role by receiving a variety of quarterly written reports prepared by the Fund's Chief Compliance Officer ("CCO") that (i) evaluate the operation, policies and procedures of the Fund's service providers, (ii) make known any material changes to the policies and procedures adopted by the Fund or its service providers since the CCO's last report, and (iii) disclose any material compliance matters that occurred since the date of the last CCO report. In addition, the Independent Directors meet quarterly in executive sessions without the presence of any interested directors, the Adviser or Subadviser, or any of their affiliates. This configuration permits the Independent Directors to effectively receive the information and have private discussions necessary to perform their risk oversight role, exercise independent judgment and allocate areas of responsibility between the full Board of Directors, its committees and certain officers of the Fund. Furthermore, the Independent Directors have engaged independent legal counsel and auditors to assist the Independent Directors in performing their oversight responsibilities. As discussed above and in consideration of other factors not referenced herein, the Board of Directors has determined its leadership role concerning risk management as one of oversight and not active management of the Fund's day-to-day risk management operations.

As of the date of this SAI, the non-interested members of the boards of the funds in the Fund Complex have had one meeting, and the audit committee and nominating and corporate governance committee of such boards have each had one meeting.

Compensation. The Fund pays no salaries or compensation to any of its interested directors or its officers. For their services, the Independent Directors of the Fund receive an annual retainer in the amount of \$16,500, and an additional \$1,500 for attending each meeting of the Board of Directors. In addition, the lead Independent Director receives \$250 annually, the Chair of the Audit Committee receives \$500 annually and the Chair of the Nominating and Corporate Governance Committee receives \$250 annually. The Independent Directors are also reimbursed for all reasonable out-of-pocket expenses relating to attendance at meetings of the Board of Directors. The following tables show compensation from the Fund. Patrick W. Galley is an interested persons of the Fund and has not received any compensation from the Fund.

<u>Name of Board Member</u>	<u>Estimated Compensation from the Fund (1)</u>	<u>Estimated Total Compensation from the Fund and Fund Complex (2)</u>
Independent Directors:		
John Carter	\$22,750	\$112,500
John Oakes	\$22,750	\$112,500
James Kelley	\$23,000	\$89,000
Fred Steingraber	\$22,500	\$87,000

(1) The compensation estimated to be paid by the Fund for the first full fiscal year for services to the Fund.

(2) The total estimated compensation estimated to be paid to the Independent Directors from the Fund and the Fund Complex for a full calendar year.

Director Ownership in the Fund

The following table shows the dollar range of equity securities beneficially owned by each director in the Fund and Fund Complex as of December 31, 2015.

<u>Director</u>	<u>Dollar Range of Equity Securities in Fund</u>	<u>Aggregate Dollar Range of Ownership in all Funds Overseen by Director in the Fund Complex (1)</u>
Independent Director:		
John Carter	None	None
John Oakes	None	Over \$100,000
James Kelley	None	\$10,001 - \$50,000
Fred G. Steingraber	None	None
Interested Director:		
Patrick W. Galley	None	Over \$100,000

(1) The Fund Complex consists of (1) one closed-end management investment company: RiverNorth Opportunities Fund, Inc. and (2) four open-end management investment companies: RiverNorth Core Opportunity Fund, RiverNorth/DoubleLine Strategic Income Fund, RiverNorth Equity Opportunity Fund, RiverNorth/Oaktree High Income Fund.

As of the date of this SAI, the Independent Directors of the Fund and immediate family members do not own beneficially or of record any class of securities of the investment adviser or principal underwriter of the Fund or any person directly or indirectly controlling, controlled by, or under common control with an investment adviser or principal underwriter of the Fund.

As of the date of this SAI, the directors and officers of the Fund owned, as a group, less than 1% of the outstanding Common Shares of the Fund.

Securities Beneficially Owned

The Adviser has provided the initial capitalization of the Fund and therefore is deemed to be a control person because it was the sole shareholder of the Fund at that time. However, it is anticipated that the Adviser will no longer be a control person of the Fund once this offering of Common Shares is completed.

PROXY VOTING GUIDELINES

The Board of Directors of the Fund has delegated responsibilities for decisions regarding proxy voting for securities held by the Fund to the Adviser or Subadviser. The Adviser or Subadviser will vote such proxies in accordance with its proxy policies and procedures. In some instances, the Adviser or Subadviser may be asked to cast a proxy vote that presents a conflict between the interests of the Fund's shareholders, and those of the Adviser or Subadviser or an affiliated person of the Adviser or Subadviser. In such a case, the Adviser or Subadviser will abstain from making a voting decision and will forward all necessary proxy voting materials to the Fund to enable the Board of Directors to make a voting decision. The Adviser or Subadviser shall make a written recommendation of the voting decision to the Board of Directors, which shall include: (i) an explanation of why it has a conflict of interest; (ii) the reasons for its recommendation; and (iii) an explanation of why the recommendation is consistent with the Adviser's (or Subadviser's) proxy voting policies. The Board of Directors shall make the proxy voting decision that in its judgment, after reviewing the recommendation of the Adviser or Subadviser, is most consistent with the Adviser's or Subadviser's proxy voting policies and in the best interests of Fund shareholders. When the Board of Directors of the Fund is required to make a proxy voting decision, only the directors without a conflict of interest with regard to the security in question or the matter to be voted upon shall be permitted to participate in the decision of how the Fund's vote will be cast. The Adviser and Subadviser vote proxies pursuant to the proxy voting policies and guidelines set forth in Appendix A and B, respectively, to this SAI.

You may also obtain information about how the Fund voted proxies related to its portfolio securities during the 12-month period ended June 30 by visiting the SEC's website at www.sec.gov or by visiting the Fund's website at www.rivernorth.com (this reference to the Fund's website does not incorporate the contents of the website into this SAI).

ADDITIONAL INFORMATION

A Registration Statement on Form N-2, including amendments thereto, relating to the Common Shares offered hereby, has been filed by the Fund with the SEC, Washington, D.C. The Fund's Prospectus and this SAI do not contain all of the information set forth in the Registration Statement, including any exhibits and schedules thereto. For further information with respect to the Fund and the Common Shares offered hereby, reference is made to the Fund's Registration Statement. Statements contained in the Fund's Prospectus and this SAI as to the contents of any contract or other document referred to are not necessarily complete and in each instance reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by such reference.

The Registration Statement may be viewed and copied at the SEC's Public Reference Room in Washington, D.C. Information about the SEC's Public Reference Room may be obtained by calling the SEC at (202) 551-8090. The Registration Statement also may be available on the Edgar Database on the SEC's website, <http://www.sec.gov>, or be obtained, after paying a duplicating fee, by electronic request to publicinfo@sec.gov, or by writing to: Securities and Exchange Commission's Public Reference Section, 100 F Street, NE, Washington, D.C. 20549.

FINANCIAL STATEMENTS AND REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholder and Board of Directors of
RiverNorth/DoubleLine Strategic Opportunity Fund, Inc.

We have audited the accompanying statement of assets and liabilities of RiverNorth/DoubleLine Strategic Opportunity Fund, Inc. (the "Fund") as of August 23, 2016. This financial statement is the responsibility of the Fund's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement. Our procedures included confirmation of cash as of August 23, 2016, by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statement referred to above presents fairly, in all material respects, the financial position of RiverNorth/DoubleLine Strategic Opportunity Fund, Inc. as of August 23, 2016, in conformity with accounting principles generally accepted in the United States of America.

RiverNorth/DoubleLine Strategic Opportunity Fund, Inc.

Notes to Financial Statement August 23, 2016

(1) ORGANIZATION

RiverNorth/DoubleLine Strategic Opportunity Fund, Inc. (the “Fund”) is a closed-end management investment company that was organized as a Maryland corporation on June 22, 2016. The Fund is a diversified investment company with an investment objective to seek current income and overall total return. The Fund has not had any operations other than the sale and issuance of 5,102,041 common shares of beneficial interest at an aggregate purchase price of \$100,000 to RiverNorth Capital Management, LLC (“RiverNorth” or the “Adviser”), the Fund’s investment adviser at a net asset value of \$19.60 per share. Shares issued by the Fund are subject to a sales load of 2.00%. The Fund’s sub-adviser is DoubleLine Capital, LP (“DoubleLine”).

(2) SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed by the Fund in preparation of its financial statement. The policies are in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The Fund is an investment company and, accordingly, follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board Accounting Standards Codification Topic 946, *Investment Companies*.

Use of Estimates

The preparation of the financial statement in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statement. The Fund believes that these estimates utilized in preparing the financial statement are reasonable and prudent; however, actual results could differ from these estimates.

Indemnifications

In the normal course of business, the Fund enters into contracts that contain a variety of representations which provide general indemnifications. The Fund’s maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote.

Federal Income Taxes

The Fund intends to qualify as a regulated investment company and comply in its initial fiscal year and thereafter with the provisions available to certain investment companies as defined in Subchapter M of the Internal Revenue Code of 1986, as amended, and to make distributions from net investment income and from net realized capital gains sufficient to relieve it from all, or substantially all, federal income taxes.

(3) ORGANIZATIONAL AND OFFERING COSTS

Organizational Expenses

RiverNorth has agreed to pay all of the Fund’s organizational expenses. As a result, organizational expenses of the Fund are not reflected in the Fund’s financial statement. Total organizational expenses incurred through August 23, 2016, are \$61,441.

Offering Costs

Offering costs are paid directly by the Fund. RiverNorth has agreed to pay the amount, if any, by which the Fund’s offering costs (other than the sales load) exceed \$0.04/share (0.20% of the offering price). Offering costs incurred through August 23, 2016 are \$164,480 and management estimates an additional \$858,890 of costs expected to be incurred resulting in total offering costs of \$1,023,370 of which the Fund will incur an additional \$235,520 based on a \$200 million capital raise. RiverNorth will pay the \$623,370 of expenses in excess of the offering price cap based

on a \$200 million capital raise. The Statement of Assets and Liabilities reflects the current costs of \$164,480 as deferred offering costs. These offering costs, as well as offering costs incurred subsequent to August 23, 2016, will be charged to paid-in-capital upon sale of the shares to the public or reimbursed by RiverNorth.

(4) INVESTMENT ADVISORY SERVICES AND OTHER AGREEMENTS

The Adviser serves as the investment adviser to the Fund. Under the terms of the management agreement (the “Agreement”), the Adviser, subject to the supervision of the Board of Directors (the “Board”), provides or arranges to be provided to the Fund such investment advice as it deems advisable and will furnish or arrange to be furnished a continuous investment program for the Fund consistent with the Fund’s investment objectives and policies. As compensation for its management services, the Fund is obligated to pay the Adviser a fee computed and accrued daily and paid monthly, at an annual rate equal to 1.00% of the Fund’s average daily Managed Assets (the total assets of the Fund, including assets attributable to leverage, minus liabilities (other than debt representing leverage and any preferred stock that may be outstanding)).

DoubleLine is the investment sub-adviser to the Fund. Under the terms of the sub-advisory agreement, DoubleLine, subject to the supervision of the Adviser and the Board, provides or arranges to be provided such investment advice as deemed advisable and will furnish or arrange to be furnished a continuous investment program for the portion of assets managed in the Fund consistent with the Fund’s investment objective and policies. As compensation for its sub-advisory services, the Adviser is obligated to pay DoubleLine a fee computed and accrued daily and paid monthly, at an annual rate equal to 0.50% of the Fund’s average daily Managed Assets.

The Fund may use leverage through borrowings or the issuance of preferred stock, in an aggregate amount of up to 33 1/3% of the Fund’s total assets immediately after such borrowings or issuance. Leverage, if used, is expected to take the form of bank borrowing or other similar term loans and reverse repurchase agreements.

The Fund’s Board of Directors approved the Investment Advisory Agreement and the Investment Sub-Advisory Agreement at its August 17, 2016, meeting.

A Director and certain Officers of the Fund are also employees of the Adviser.

APPENDIX A

PROXY VOTING POLICY OF THE ADVISER

Proxy Voting RiverNorth Capital Management, LLC

PROXY VOTING POLICIES AND PROCEDURES

Pursuant to the recent adoption by the Securities and Exchange Commission (the “Commission”) of Rule 206(4)-6 (17 CFR 275.206(4)-6) and amendments to Rule 204-2 (17 CFR 275.204-2) under the Investment Advisers Act of 1940 (the “Act”), it is a fraudulent, deceptive, or manipulative act, practice or course of business, within the meaning of Section 206(4) of the Act, for an investment adviser to exercise voting authority with respect to client securities, unless (i) the adviser has adopted and implemented written policies and procedures that are reasonably designed to ensure that the adviser votes proxies in the best interests of its clients, (ii) the adviser describes its proxy voting procedures to its clients and provides copies on request, and (iii) the adviser discloses to clients how they may obtain information on how the adviser voted their proxies.

In its standard investment advisory agreement, RiverNorth Capital Management, LLC (RiverNorth Capital) specifically states that it does not vote proxies and the client, including clients governed by ERISA, is responsible for voting proxies. Therefore, RiverNorth Capital will not vote proxies for these clients. However, RiverNorth Capital will vote proxies on behalf of investment company clients (“Funds”). RiverNorth Capital has instructed all custodians, other than Fund custodians, to forward proxies directly to its clients, and if RiverNorth Capital accidentally receives a proxy for any non-Fund client, current or former, the Chief Compliance Officer will promptly forward the proxy to the client. In order to fulfill its responsibilities to Funds, RiverNorth Capital Management, LLC (hereinafter “we” or “our”) has adopted the following policies and procedures for proxy voting with regard to companies in any Fund’s investment portfolios.

KEY OBJECTIVES

The key objectives of these policies and procedures recognize that a company’s management is entrusted with the day-to-day operations and longer term strategic planning of the company, subject to the oversight of the company’s board of directors. While “ordinary business matters” are primarily the responsibility of management and should be approved solely by the corporation’s board of directors, these objectives also recognize that the company’s shareholders must have final say over how management and directors are performing, and how shareholders’ rights and ownership interests are handled, especially when matters could have substantial economic implications to the shareholders.

Therefore, we will pay particular attention to the following matters in exercising our proxy voting responsibilities as a fiduciary for our clients:

Accountability. Each company should have effective means in place to hold those entrusted with running a company’s business accountable for their actions. Management of a company should be accountable to its board of directors and the board should be accountable to shareholders.

Alignment of Management and Shareholder Interests. Each company should endeavor to align the interests of management and the board of directors with the interests of the company’s shareholders. For example, we generally believe that compensation should be designed to reward management for doing a good job of creating value for the shareholders of the company.

Transparency. Promotion of timely disclosure of important information about a company’s business operations and financial performance enables investors to evaluate the performance of a company and to make informed decisions about the purchase and sale of a company’s securities.

DECISION METHODS

We generally believe that the individual portfolio managers that invest in and track particular companies are the most knowledgeable and best suited to make decisions with regard to proxy votes. Therefore, we rely on those individuals to make the final decisions on how to cast proxy votes.

No set of proxy voting guidelines can anticipate all situations that may arise. In special cases, we may seek insight from our managers and analysts on how a particular proxy proposal will impact the financial prospects of a company, and vote accordingly.

In some instances, a proxy vote may present a conflict between the interests of a client, on the one hand, and our interests or the interests of a person affiliated with us, on the other. In such a case, we will abstain from making a voting decision and will forward all of the necessary proxy voting materials to the client to enable the client to cast the votes.

Notwithstanding the forgoing, the following policies will apply to investment company shares owned by a Fund. Under Section 12(d)(1) of the Investment Company Act of 1940, as amended, (the “1940 Act”), a fund may only invest up to 5% of its total assets in the securities of any one investment company, but may not own more than 3% of the outstanding voting stock of any one investment company or invest more than 10% of its total assets in the securities of other investment companies. However, Section 12(d)(1)(F) of the 1940 Act provides that the provisions of paragraph 12(d)(1) shall not apply to securities purchased or otherwise acquired by a fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the fund and all affiliated persons of the fund; and (ii) the fund is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price which includes a sales load of more than 1½% percent. Therefore, each Fund (or the Adviser acting on behalf of the Fund) must comply with the following voting restrictions unless it is determined that the Fund is not relying on Section 12(d)(1)(F):

- when the Fund exercises voting rights, by proxy or otherwise, with respect to any investment company owned by the Fund, the Fund will either
 - seek instruction from the Fund’s shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or
 - vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

PROXY VOTING GUIDELINES

Election of the Board of Directors

We believe that good corporate governance generally starts with a board composed primarily of independent directors, unfettered by significant ties to management, all of whose members are elected annually. We also believe that turnover in board composition promotes independent board action, fresh approaches to governance, and generally has a positive impact on shareholder value. We will generally vote in favor of non-incumbent independent directors.

The election of a company’s board of directors is one of the most fundamental rights held by shareholders. Because a classified board structure prevents shareholders from electing a full slate of directors annually, we will generally support efforts to declassify boards or other measures that permit shareholders to remove a majority of directors at any time, and will generally oppose efforts to adopt classified board structures.

Approval of Independent Auditors

We believe that the relationship between a company and its auditors should be limited primarily to the audit engagement, although it may include certain closely related activities that do not raise an appearance of impaired independence.

We will evaluate on a case-by-case basis instances in which the audit firm has a substantial non-audit relationship with a company to determine whether we believe independence has been, or could be, compromised.

Equity-based compensation plans

We believe that appropriately designed equity-based compensation plans, approved by shareholders, can be an effective way to align the interests of shareholders and the interests of directors, management, and employees by providing incentives to increase shareholder value. Conversely, we are opposed to plans that substantially dilute ownership interests in the company, provide participants with excessive awards, or have inherently objectionable structural features.

We will generally support measures intended to increase stock ownership by executives and the use of employee stock purchase plans to increase company stock ownership by employees. These may include:

1. Requiring senior executives to hold stock in a company.
2. Requiring stock acquired through option exercise to be held for a certain period of time.

These are guidelines, and we consider other factors, such as the nature of the industry and size of the company, when assessing a plan's impact on ownership interests.

Corporate Structure

We view the exercise of shareholders' rights, including the rights to act by written consent, to call special meetings and to remove directors, to be fundamental to good corporate governance.

Because classes of common stock with unequal voting rights limit the rights of certain shareholders, we generally believe that shareholders should have voting power equal to their equity interest in the company and should be able to approve or reject changes to a company's by-laws by a simple majority vote.

We will generally support the ability of shareholders to cumulate their votes for the election of directors.

Shareholder Rights Plans

While we recognize that there are arguments both in favor of and against shareholder rights plans, also known as poison pills, such measures may tend to entrench current management, which we generally consider to have a negative impact on shareholder value. Therefore, while we will evaluate such plans on a case by case basis, we will generally oppose such plans.

CLIENT INFORMATION

A copy of these Proxy Voting Policies and Procedures is available to our clients, without charge, upon request, by calling 1-800-646-0148. We will send a copy of these Proxy Voting Policies and Procedures within three business days of receipt of a request, by first-class mail or other means designed to ensure equally prompt delivery.

In addition, we will provide each client, without charge, upon request, information regarding the proxy votes cast by us with regard to the client's securities.

APPENDIX B

DOUBLELINE FUNDS TRUST
DOUBLELINE EQUITY FUNDS
DOUBLELINE CAPITAL LP
DOUBLELINE COMMODITY LP
DOUBLELINE EQUITY LP
DOUBLELINE PRIVATE FUNDS
DOUBLELINE OPPORTUNISTIC CREDIT FUND
DOUBLELINE INCOME SOLUTIONS FUND

Proxy Voting, Corporate Actions and Class Actions

August 2015

I. Background

This Proxy Voting, Corporate Actions and Class Actions Policy (“Policy”) is adopted by DoubleLine Capital LP, DoubleLine Commodity LP and DoubleLine Equity LP (each, as applicable, “DoubleLine”, the “Adviser” or the “Firm”), DoubleLine Funds Trust and DoubleLine Equity Funds (each, as applicable, the “Trust”) and each series of the Trusts (each an “Open-End Fund”), the DoubleLine Opportunistic Credit Fund (“DBL”) and DoubleLine Income Solutions Fund (“DSL” and, together with DBL and all of the Open-End Funds collectively, the “Funds”) to govern the voting of proxies related to securities held by the Funds and actions taken with respect to corporate actions and class actions affecting such securities, and to provide a method of reporting the actions taken and overseeing compliance with regulatory requirements.

Each private investment fund (such as, but not limited to, the DoubleLine Opportunistic Income Master Fund LP (and its related entities) and the DoubleLine Leverage Fund LP (and its related entities), each of which is a “Private Fund” and, collectively, the “Private Funds”) managed by DoubleLine also adopts this Policy.

DoubleLine generally will exercise voting authority on behalf of its separate account clients (“Separate Account Clients” and together with the Funds and Private Funds, the “Clients”) only where a Client has expressly delegated authority in writing to DoubleLine and DoubleLine has accepted that responsibility. Separate Account Clients that do not provide written authorization for DoubleLine to exercise voting authority are responsible for their own proxy voting, corporate actions and class actions and this Policy does not apply to them.

To the extent that voting a proxy or taking action with respect to a class action or corporate action (in each case, a “proposal”) is desirable, DoubleLine (or its designee) will seek to take action on such proposal in a manner that it believes is most likely to enhance the economic value of the underlying securities held in Client accounts and, with respect to proposals not otherwise covered by the Guidelines herein, DoubleLine (or its designee) will seek to consider each proposal on a case-by-case basis taking into consideration any relevant contractual obligations as well as other relevant facts and circumstances at the time of the vote. DoubleLine will not respond to proxy solicitor requests unless DoubleLine determines that it is in the best interest of a Client to do so.

II. Issue

Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended (the “Rule”), requires every investment adviser who exercises voting authority with respect to client securities to adopt and implement written policies and procedures reasonably designed to ensure that the adviser votes proxies in the best interest of its clients. The procedures must address material conflicts that may arise between DoubleLine and a Client in connection with proxy voting. The Rule further requires the adviser to provide a concise summary of the adviser’s proxy voting policies and procedures and to provide copies of the complete proxy voting policy and procedures to clients upon request. Lastly, the Rule requires that the adviser disclose to clients how they may obtain information on how the adviser voted their proxies.

III. Policy – Proxies and Corporate Actions; Role of Third-Party Proxy Agent

To assist DoubleLine in carrying out its proxy voting obligations, DoubleLine has retained a third-party proxy voting service provider, currently Glass, Lewis & Co. (“Glass Lewis”), as its proxy voting agent. Pursuant to an agreement with DoubleLine, Glass Lewis obtains proxy ballots with respect to securities held by one or more Client accounts advised by DoubleLine, evaluates the individual facts and circumstances relating to any proposal, and, except as otherwise provided below, votes on any such proposal in accordance with the Guidelines set forth in Attachment A hereto (the “Guidelines”).

In the event that a proposal is not adequately addressed by the Guidelines, Glass Lewis will make a recommendation to DoubleLine as to how to vote on such proposal. The portfolio manager or other authorized person of the relevant Client will review the recommendation made by Glass Lewis and will instruct Glass Lewis to vote the Client’s securities against Glass Lewis’ recommendation when DoubleLine believes doing so is in the best interests of the Client. The portfolio manager or authorized person shall record the reasons for any such instruction and shall provide that written record to the Chief Compliance Officer or his/her designee. In the absence of a timely instruction from DoubleLine to the contrary, Glass Lewis will vote in accordance with its recommendation. In the event that Glass Lewis does not provide a recommendation with respect to a proposal, DoubleLine may vote on any such proposal in its discretion and in a manner consistent with this Policy.

In the event that DoubleLine determines that a recommendation of Glass Lewis (or of any other third-party proxy voting service retained by DoubleLine) was based on a material factual error, DoubleLine will investigate the error, taking into account, among other things, the nature of the error and the related recommendation, and seek to determine whether Glass Lewis (or any other third-party proxy voting service retained by DoubleLine) is taking reasonable steps to reduce similar errors in the future.

The Guidelines provide a basis for making decisions in the voting of proxies and taking action with respect to class actions or corporate actions for Clients. When voting proxies or taking action with respect to class actions or corporate actions, DoubleLine’s utmost concern in exercising its duties of loyalty and care is that all decisions be made in the best interests of the Client and with the goal of maximizing the value of the Client’s investments. With this goal in mind, the Guidelines cover various categories of voting decisions and generally specify whether DoubleLine (or its designee) will vote (assuming it votes at all) for or against a particular type of proposal. The applicable portfolio managers who are primarily responsible for evaluating the individual holdings of the relevant Client are responsible in the first instance for overseeing the voting of proxies and taking action with respect to class actions or corporate actions for such Client (though they are not expected to review each such vote or action). Such portfolio managers may, in their discretion, vote proxies or take action with respect to class actions or corporate actions in a manner that is inconsistent with the Guidelines (or instruct Glass Lewis to do so) when they determine that doing so is in the best interests of the Client. In making any such determination, the portfolio managers may, in their discretion, take into account the recommendations of appropriate members of DoubleLine’s executive and senior management, other investment personnel and, if desired, an outside service.

Limitations of this Policy. This Policy applies to voting and/or consent rights of securities held by Clients. DoubleLine (or its designee) will, on behalf of each Client (including the Funds or the Private Funds) vote in circumstances such as, but not limited to, plans of reorganization, and waivers and consents under applicable indentures. This Policy does not apply, however, to consent rights that primarily represent decisions to buy or sell investments, such as tender or exchange offers, conversions, put options, redemption and Dutch auctions. Such decisions, while considered not to be covered within this Policy, shall be made with the Client’s best interests in mind. In certain limited circumstances, particularly in the area of structured finance, DoubleLine may, on behalf of Clients, enter into voting agreements or other contractual obligations that govern the voting of shares. In the event of a conflict between any such contractual requirements and the Guidelines, DoubleLine (or its designee) will vote in accordance with its contractual obligations.

In addition, where DoubleLine determines that there are unusual costs and/or difficulties associated with voting on a proposal, which more typically might be the case with respect to proposals relating to non-U.S. issuers, DoubleLine reserves the right to not vote on a proposal unless DoubleLine determines that the expected benefits of voting on such proposal exceed the expected cost to the Client, such as in situations where a jurisdiction imposes share blocking restrictions which may affect the ability of the portfolio managers to effect trades in the related security. DoubleLine will seek to consult with its Clients in such circumstances unless the investment management agreement or other written arrangement with the applicable Client gives DoubleLine authority to act in its discretion.

All proxies, class actions or corporate actions received shall be retained by the Chief Risk Officer or designee. Such records shall include whether DoubleLine voted such proxy or corporate actions and, if so, how the proxy was voted. The records also shall be transcribed into a format such that any Client's overall proxy and corporate actions voting record can be provided upon request.

DoubleLine provides no assurance to former clients that applicable proxy, class actions or corporate actions information will be delivered to them.

IV. Proofs of Claim

DoubleLine does not complete proofs-of-claim on behalf of Clients for current or historical holdings other than for the Funds; however, DoubleLine will provide reasonable assistance to Clients with collecting information relevant to filing proofs-of-claim when such information is in the possession of DoubleLine. DoubleLine does not undertake to complete or provide proofs-of-claim for securities that had been held by any former client. DoubleLine will complete proofs-of-claim for the Funds and Private Funds, or provide reasonable access to the applicable Fund's or Private Fund's administrator to file such proofs-of-claim when appropriate.

V. Class Actions Policy

In the event that Client securities become the subject of a class action lawsuit, the applicable portfolio manager(s) will assess the value to Clients in participating in such legal action. If the portfolio manager decides that participating in the class action is in the Client's best interest, DoubleLine will recommend that the Client or its custodian submit appropriate documentation on the Client's behalf, subject to contractual or other authority. DoubleLine may consider any relevant information in determining whether participation in a class action lawsuit is in a Client's best interest, including the costs that would be incurred by the Client and the resources that would be expended in participating in the class action, including in comparison to the Client pursuing other legal recourse against the issuer. DoubleLine also may choose to notify Clients (other than the Funds and the Private Funds) of the class action without making a recommendation as to participation, which would allow Clients to decide how or if to proceed. DoubleLine provides no assurance to former clients that applicable class action information will be delivered to them.

VI. Procedures for Lent Securities and Issuers in Share-blocking Countries

At times, DoubleLine may not be able to take action in respect of a proposal on behalf of a Client when the Client's relevant securities are on loan in accordance with the Client's securities lending program and/or are controlled by a securities lending agent or custodian acting independently of DoubleLine. Notwithstanding this fact, in the event that DoubleLine becomes aware of a proposal on which a Client's securities may be voted and with respect to which the outcome of such proposal could reasonably be expected to enhance the economic value of the Client's position and some or a portion of that position is lent out, DoubleLine will make reasonable efforts to inform the Client that DoubleLine is not able to take action with respect to such proposal until and unless the Client recalls the lent security. When such situations relate to the Funds or the Private Funds, DoubleLine will take reasonable measures to recall the lent security in order to take action timely. There can be no assurance that any lent security will be returned timely.

In certain markets where share blocking occurs, shares must be frozen for trading purposes at the custodian or sub-custodian in order to vote. During the time that shares are blocked, any pending trades will not settle. Depending on the market, this period can last from one day to three weeks. Any sales that must be executed will settle late and potentially be subject to interest charges or other punitive fees. For this reason, in blocking markets, DoubleLine retains the right to vote or not, based on the determination of DoubleLine's investment personnel as to whether voting would be in the Client's best interest.

VII. Proxy Voting Committee; Oversight

DoubleLine has established a proxy voting committee (the "Committee") with a primary responsibility of overseeing compliance with the Policy. The Committee, made up of non-investment executive officers, the Chief Risk Officer, and the Chief Compliance Officer (or his/her designee), meets on an as needed basis. The Committee will (1) monitor compliance with the Policy, including by periodically sampling proxy votes for review, (2) review, no less frequently than annually, the adequacy of this Policy to ensure that such Policy has been effectively implemented and that the Policy continues to be designed to ensure that proxies are voted in the best interests of Clients, and (3) review potential

conflicts of interest that may arise under this Policy, including changes to the businesses of DoubleLine, Glass Lewis or other third-party proxy voting services retained by DoubleLine to determine whether those changes present new or additional conflicts of interest that should be addressed by this Policy.

The Committee shall have primary responsibility for managing DoubleLine's relationship with Glass Lewis and/or any other third-party proxy voting service provider, including overseeing their compliance with this Policy generally as well as reviewing periodically instances in which (i) DoubleLine overrides a recommendation made by Glass Lewis or (ii) Glass Lewis does not provide a recommendation with respect to a proposal. The Committee shall also periodically review DoubleLine's relationships with such entities more generally, including for potential conflicts of interest relevant to such entities and whether DoubleLine's relationships with such entities should continue.

VIII. Procedures for Material Conflicts of Interest

The portfolio managers will seek to monitor for conflicts of interest arising between DoubleLine and a Client and shall report any such conflict identified by the portfolio managers to the Committee. Should material conflicts of interest arise between DoubleLine and a Client as to a proposal, the proposal shall be brought to the attention of the Committee, who shall involve other executive managers, legal counsel (which may be DoubleLine's in-house counsel or outside counsel) or the Chief Compliance Officer as may be deemed necessary or appropriate by the Committee to attempt to resolve such conflicts. The Committee shall determine the materiality of such conflict if the conflict cannot be resolved. (An example of a specific conflict of interest that should be brought to the Committee is a situation where a proxy contest involves securities issued by a Client. When in doubt as to a potential conflict, portfolio managers shall bring the proxy to the attention of the Committee.)

If, after appropriate review, a material conflict between DoubleLine and a Client is deemed to exist, DoubleLine will seek to resolve any such conflict in the best interest of the Client whose assets it is voting by pursuing any one of the following courses of action: (i) voting (or not voting) in accordance with the Guidelines; (ii) convening a Committee meeting to assess available measures to address the conflict and implementing those measures; (iii) voting in accordance with the recommendation of an independent third-party service provider chosen by the Committee; (iv) voting (or not voting) in accordance with the instructions of such Client; (v) or not voting with respect to the proposal if consistent with DoubleLine's fiduciary obligations.

Investments in the DoubleLine Funds. In the event that DoubleLine has discretionary authority to vote shares of a Fund owned by all Clients (including the Funds), DoubleLine will vote the shares of such Fund in the same proportion as the votes of the other beneficial shareholders of such Fund. Under this "echo voting" approach, DoubleLine's voting of a Fund's shares would merely amplify the votes already received from such Fund's other shareholders. DoubleLine's potential conflict is therefore mitigated by replicating the voting preferences expressed by the Fund's other shareholders.

IX. Procedures for Proxy Solicitation

In the event that any employee of DoubleLine receives a request to reveal or disclose DoubleLine's voting intention on a specific proxy event to a third party, the employee must forward the solicitation request to the Chief Compliance Officer or designee. Such requests shall be reviewed with the Committee or appropriate executive and senior management. Any written requests shall be retained with the proxy files maintained by the Chief Operating Officer or designee.

X. Additional Procedures for the Funds

A. Filing Form N-PX

Rule 30b1-4 under the Investment Company Act of 1940 requires mutual funds to file an annual record of proxies voted by a Fund on Form N-PX. Form N-PX must be filed each year no later than August 31 and must contain the Funds' proxy voting record for the most recent twelve-month period ending June 30.

The Funds rely upon their respective fund administrator to prepare and make their filings on Form N-PX. DoubleLine shall assist the fund administrator by providing information (including by causing such information to be provided by any third party proxy voting service for record comparison purposes as deemed necessary) regarding any proxy votes made for the Funds within the most recent twelve-month period ending June 30. DoubleLine shall retain records of any such votes with sufficient information to make accurate annual Form N-PX filings.

B. Providing Policies and Procedures

Mutual funds (including the Funds) that invest in voting securities are required to describe in their Statements of Additional Information (“SAIs”) the policies and procedures that they use to determine how to vote proxies relating to securities held in their portfolios. The Funds also may chose to include these policies and procedures as part of their registration statement. Closed-end funds (such as DBL and DSL) must disclose their proxy voting policies and procedures annually on Form N-CSR.

Funds are required to disclose in shareholder reports that a description of the fund’s proxy voting policies and procedures is available (i) without charge, upon request, by calling a specified toll-free (or collect) telephone number; (ii) on the fund’s website, if applicable; and (iii) on the Commission’s website at <http://www.sec.gov>. The fund administrator shall ensure that such disclosures are included when preparing shareholder reports on the Funds’ behalf. The Funds currently do not provide the proxy policies and procedures on their website.

A Fund is required to send the description of the fund’s proxy voting policies and procedures within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery. The Funds rely upon the fund administrator to provide this service.

XI. Recordkeeping

- A. DoubleLine must maintain the documentation described in this Policy for a period of not less than five (5) years from the end of the fiscal year during which the last entry was made on such record, the first two (2) years at its principal place of business. DoubleLine will be responsible for the following procedures and for ensuring that the required documentation is retained, including with respect to class action claims or corporate actions other than proxy voting. DoubleLine has engaged Glass Lewis to retain the aforementioned proxy voting records on behalf of DoubleLine (and its Clients).

B. Client request to review proxy votes:

Any written request from a Client related to actions taken with respect to a proposal received by any employee of DoubleLine must be retained. Only written responses to oral requests need to be maintained.

The Client Service group will record the identity of the Client, the date of the request, and the disposition (*e.g.*, provided a written or oral response to Client’s request, referred to third party, not a proxy voting client, other dispositions, etc.).

In order to facilitate the management of proxy voting record keeping process, and to facilitate dissemination of such proxy voting records to Clients, the Client Service group will distribute to any Client requesting proxy voting information DoubleLine’s complete proxy voting record for the Client for the period requested. If deemed operationally more efficient, DoubleLine may choose to release its entire proxy voting record for the requested period, with any information identifying a particular Client redacted. The Client Service group shall furnish the information requested, free of charge, to the Client within a reasonable time period (within 10 business days) and maintain a copy of the written record provided in response to Client’s written (including e-mail) or oral request. A copy of the written response should be attached and maintained with the Client’s written request, if applicable, and stored in an appropriate file.

Clients can require the delivery of the proxy voting record relevant to their accounts for the five year period prior to their request.

C. Examples of proxy voting records:

- Documents prepared or created by DoubleLine that were material to making a decision on how to vote, or that memorialized the basis for the decision. Documentation or notes or any communications received from third parties, other industry analysts, third party service providers, company’s management discussions, etc. that were material in the basis for the decision.

XII. Disclosure

The Chief Compliance Officer or designee will ensure that Form ADV Part 2A is updated as necessary to reflect: (i) all material changes to this Policy; and (ii) regulatory requirements related to proxy voting disclosure.

Attachment A to Proxy Voting, Corporate Action and Class Action Policy

Guidelines

The proxy voting decisions set forth below refer to proposals by company management except for the categories of “Shareholder Proposals” and “Social Issue Proposals.” The voting decisions in these latter two categories refer to proposals by outside shareholders.

Governance

- For trustee nominees in uncontested elections
- For management nominees in contested elections
- For ratifying auditors, except against if the previous auditor was dismissed because of a disagreement with the company or if the fees for non-audit services exceed 51% of total fees
- For changing the company name
- For approving other business
- For adjourning the meeting
- For technical amendments to the charter and/or bylaws
- For approving financial statements

Capital Structure

- For increasing authorized common stock
- For decreasing authorized common stock
- For amending authorized common stock
- For the issuance of common stock, except against if the issued common stock has superior voting rights
- For approving the issuance or exercise of stock warrants
- For authorizing preferred stock, except against if the board has unlimited rights to set the terms and conditions of the shares
- For increasing authorized preferred stock, except against if the board has unlimited rights to set the terms and conditions of the shares
- For decreasing authorized preferred stock
- For canceling a class or series of preferred stock
- For amending preferred stock
- For issuing or converting preferred stock, except against if the shares have voting rights superior to those of other shareholders
- For eliminating preemptive rights
- For creating or restoring preemptive rights
- Against authorizing dual or multiple classes of common stock
- For eliminating authorized dual or multiple classes of common stock
- For amending authorized dual or multiple classes of common stock
- For increasing authorized shares of one or more classes of dual or multiple classes of common stock, except against if it will allow the company to issue additional shares with superior voting rights
- For a stock repurchase program
- For a stock split
- For a reverse stock split, except against if the company does not intend to proportionally reduce the number of authorized shares

Mergers and Restructuring

- For merging with or acquiring another company
- For recapitalization
- For restructuring the company
- For bankruptcy restructurings
- For liquidations
- For reincorporating in a different state
- For spinning off certain company operations or divisions

- For the sale of assets
- Against eliminating cumulative voting
- For adopting cumulative voting

Board of Trustees

- For limiting the liability of trustees
- For setting the board size
- For allowing the trustees to fill vacancies on the board without shareholder approval
- Against giving the board the authority to set the size of the board as needed without shareholder approval
- For a proposal regarding the removal of trustees, except against if the proposal limits the removal of trustees to cases where there is legal cause
- For non-technical amendments to the company's certificate of incorporation, except against if an amendment would have the effect of reducing shareholders' rights
- For non-technical amendments to the company's bylaws, except against if an amendment would have the effect of reducing shareholder's rights

Anti-Takeover Provisions

- Against a classified board
- Against amending a classified board
- For repealing a classified board
- Against ratifying or adopting a shareholder rights plan (poison pill)
- Against redeeming a shareholder rights plan (poison pill)
- Against eliminating shareholders' right to call a special meeting
- Against limiting shareholders' right to call a special meeting
- For restoring shareholders' right to call a special meeting
- Against eliminating shareholders' right to act by written consent
- Against limiting shareholders' right to act by written consent
- For restoring shareholders' right to act by written consent
- Against establishing a supermajority vote provision to approve a merger or other business combination
- For amending a supermajority vote provision to approve a merger or other business combination, except against if the amendment would increase the vote required to approve the transaction
- For eliminating a supermajority vote provision to approve a merger or other business combination
- Against adopting supermajority vote requirements (lock-ins) to change certain bylaw or charter provisions
- Against amending supermajority vote requirements (lock-ins) to change certain bylaw or charter provisions
- For eliminating supermajority vote requirements (lock-ins) to change certain bylaw or charter provisions
- Against expanding or clarifying the authority of the board of trustees to consider factors other than the interests of shareholders in assessing a takeover bid
- Against establishing a fair price provision
- Against amending a fair price provision
- For repealing a fair price provision
- For limiting the payment of greenmail
- Against adopting advance notice requirements
- For opting out of a state takeover statutory provision
- Against opt into a state takeover statutory provision

Compensation

- For adopting a stock incentive plan for employees, except decide on a case-by-case basis if the plan dilution is more than 5% of outstanding common stock or if the potential dilution from all company plans, including the one proposed, is more than 10% of outstanding common stock
- For amending a stock incentive plan for employees, except decide on a case-by-case basis if the minimum potential dilution from all company plans, including the one proposed, is more than 10% of outstanding common stock
- For adding shares to a stock incentive plan for employees, except decide on a case-by-case basis if the plan dilution is more than 5% of outstanding common stock or if the potential dilution from all company plans, including the one proposed, is more than 10% of outstanding common stock

- For limiting per-employee option awards
- For extending the term of a stock incentive plan for employees
- Case-by-case on assuming stock incentive plans
- For adopting a stock incentive plan for non-employee trustees, except decide on a case-by-case basis if the plan dilution is more than 5% of outstanding common equity or if the minimum potential dilution from all plans, including the one proposed, is more than 10% of outstanding common equity
- For amending a stock incentive plan for non-employee trustees, except decide on a case-by-case basis if the minimum potential dilution from all plans, including the one proposed, is more than 10% of outstanding common equity
- For adding shares to a stock incentive plan for non-employee trustees, except decide on a case-by-case basis if the plan dilution is more than 5% of outstanding common equity or if the minimum potential dilution from all plans, including the one proposed, is more than 10% of the outstanding common equity
- For adopting an employee stock purchase plan, except against if the proposed plan allows employees to purchase stock at prices of less than 85% of the stock's fair market value
- For amending an employee stock purchase plan, except against if the proposal allows employees to purchase stock at prices of less than 85% of the stock's fair market value
- For adding shares to an employee stock purchase plan, except against if the proposed plan allows employees to purchase stock at prices of less than 85% of the stock's fair market value
- For adopting a stock award plan, except decide on a case-by-case basis if the plan dilution is more than 5% of the outstanding common equity or if the minimum potential dilution from all plans, including the one proposed, is more than 10% of the outstanding common equity
- For amending a stock award plan, except against if the amendment shortens the vesting requirements or lessens the performance requirements
- For adding shares to a stock award plan, except decide on a case-by-case basis if the plan dilution is more than 5% of the outstanding common equity or if the minimum potential dilution from all plans, including the one proposed, is more than 10% of the outstanding common equity
- For adopting a stock award plan for non-employee trustees, except decide on a case-by-case basis if the plan dilution is more than 5% of the outstanding common equity or if the minimum potential dilution from all plans, including the one proposed, is more than 10% of the outstanding common equity
- For amending a stock award plan for non-employee trustees, except decide on a case-by-case basis if the minimum potential dilution from all plans is more than 10% of the outstanding common equity
- For adding shares to a stock award plan for non-employee trustees, except decide on a case-by-case basis if the plan dilution is more than 5% of the outstanding common equity or if the minimum potential dilution from all plans, including the one proposed, is more than 10% of the outstanding common equity
- For approving an annual bonus plan
- For adopting a savings plan
- For granting a one-time stock option or stock award, except decide on a case-by-case basis if the plan dilution is more than 5% of the outstanding common equity
- For adopting a deferred compensation plan
- For approving a long-term bonus plan
- For approving an employment agreement or contract
- For amending a deferred compensation plan
- For amending an annual bonus plan
- For reapproving a stock option plan or bonus plan for purposes of OBRA
- For amending a long-term bonus plan

Shareholder Proposals

- For requiring shareholder ratification of auditors
- Against requiring the auditors to attend the annual meeting
- Against limiting consulting by auditors
- Against requiring the rotation of auditors
- Against restoring preemptive rights
- For asking the company to study sales, spin-offs, or other strategic alternatives
- For asking the board to adopt confidential voting and independent tabulation of the proxy ballots
- Against asking the company to refrain from counting abstentions and broker non-votes in vote tabulations

- Against eliminating the company's discretion to vote unmarked proxy ballots
- For providing equal access to the proxy materials for shareholders
- Against requiring a majority vote to elect trustees
- Against requiring the improvement of annual meeting reports
- Against changing the annual meeting location
- Against changing the annual meeting date
- Against asking the board to include more women and minorities as trustees
- Against seeking to increase board independence
- Against limiting the period of time a trustee can serve by establishing a retirement or tenure policy
- Against requiring minimum stock ownership by trustees
- Against providing for union or employee representatives on the board of trustees
- For increasing disclosure regarding the board's role in the development and monitoring of the company's long-term strategic plan
- For creating a nominating committee of the board
- Against urging the creation of a shareholder committee
- Against asking that the chairman of the board of trustees be chosen from among the ranks of the non-employee trustees
- Against asking that a lead trustee be chosen from among the ranks of the non-employee trustees
- For adopting cumulative voting
- Against requiring trustees to place a statement of candidacy in the proxy statement
- Against requiring the nomination of two trustee candidates for each open board seat
- Against making trustees liable for acts or omissions that constitute a breach of fiduciary care resulting from a trustee's gross negligence and/or reckless or willful neglect
- For repealing a classified board
- Against asking the board to redeem or to allow shareholders to vote on a poison pill shareholder rights plan
- Against repealing fair price provisions
- For restoring shareholders' right to call a special meeting
- For restoring shareholders' right to act by written consent
- For limiting the board's discretion to issue targeted share placements or requiring shareholder approval before such block placements can be made
- For seeking to force the company to opt out of a state takeover statutory provision
- Against reincorporating the company in another state
- For limiting greenmail payments
- Against advisory vote on compensation
- Against restricting executive compensation
- For enhancing the disclosure of executive compensation
- Against restricting trustee compensation
- Against capping executive pay
- Against calling for trustees to be paid with company stock
- Against calling for shareholder votes on executive pay
- Against calling for the termination of trustee retirement plans
- Against asking management to review, report on, and/or link executive compensation to non-financial criteria, particularly social criteria
- Against seeking shareholder approval to reprice or replace underwater stock options
- For banning or calling for a shareholder vote on future golden parachutes
- Against seeking to award performance-based stock options
- Against establishing a policy of expensing the costs of all future stock options issued by the company in the company's annual income statement
- Against requesting that future executive compensation be determined without regard to any pension fund income
- Against approving extra benefits under Supplemental Executive Retirement Plans (SERPs)
- Against requiring option shares to be held
- For creating a compensation committee
- Against requiring that the compensation committee hire its own independent compensation consultants-separate from the compensation consultants working with corporate management-to assist with executive compensation issues

- For increasing the independence of the compensation committee
- For increasing the independence of the audit committee
- For increasing the independence of key committees

Social Issue Proposals

- Against asking the company to develop or report on human rights policies
- Against asking the company to limit or end operations in Burma
- For asking management to review operations in Burma
- For asking management to certify that company operations are free of forced labor
- Against asking management to implement and/or increase activity on each of the principles of the U.S. Business Principles for Human Rights of Workers in China.
- Against asking management to develop social, economic, and ethical criteria that the company could use to determine the acceptability of military contracts and to govern the execution of the contracts
- Against asking management to create a plan of converting the company's facilities that are dependent on defense contracts toward production for commercial markets
- Against asking management to report on the company's government contracts for the development of ballistic missile defense technologies and related space systems
- Against asking management to report on the company's foreign military sales or foreign offset activities
- Against asking management to limit or end nuclear weapons production
- Against asking management to review nuclear weapons production
- Against asking the company to establish shareholder-designated contribution programs
- Against asking the company to limit or end charitable giving
- For asking the company to increase disclosure of political spending and activities
- Against asking the company to limit or end political spending
- For requesting disclosure of company executives' prior government service
- Against requesting affirmation of political nonpartisanship
- For asking management to report on or change tobacco product marketing practices, except against if the proposal calls for action beyond reporting
- Against severing links with the tobacco industry
- Against asking the company to review or reduce tobacco harm to health
- For asking management to review or promote animal welfare, except against if the proposal calls for action beyond reporting
- For asking the company to report or take action on pharmaceutical drug pricing or distribution, except against if the proposal asks for more than a report
- Against asking the company to take action on embryo or fetal destruction
- For asking the company to review or report on nuclear facilities or nuclear waste, except against if the proposal asks for cessation of nuclear-related activities or other action beyond reporting
- For asking the company to review its reliance on nuclear and fossil fuels, its development or use of solar and wind power, or its energy efficiency, except vote against if the proposal asks for more than a report
- Against asking management to endorse the Ceres principles
- For asking the company to control generation of pollutants, except against if the proposal asks for action beyond reporting or if the company reports its omissions and plans to limit their future growth or if the company reports its omissions and plans to reduce them from established levels
- For asking the company to report on its environmental impact or plans, except against if management has issued a written statement beyond the legal minimum
- For asking management to report or take action on climate change, except against if management acknowledges a global warming threat and has issued company policy or if management has issued a statement and committed to targets and timetables or if the company is not a major emitter of greenhouse gases
- For asking management to report on, label, or restrict sales of bioengineered products, except against if the proposal asks for action beyond reporting or calls for a moratorium on sales of bioengineered products
- Against asking the company to preserve natural habitat
- Against asking the company to review its developing country debt and lending criteria and to report to shareholders on its findings

- Against requesting the company to assess the environmental, public health, human rights, labor rights, or other socioeconomic impacts of its credit decisions
- For requesting reports and/or reviews of plans and/or policies on fair lending practices, except against if the proposal calls for action beyond reporting
- Against asking the company to establish committees to consider issues related to facilities closure and relocation of work
- For asking management to report on the company's affirmative action policies and programs, including releasing its EEO-1 forms and providing statistical data on specific positions within the company, except against if the company releases its EEO-1 reports
- Against asking management to drop sexual orientation from EEO policy
- Against asking management to adopt a sexual orientation non-discrimination policy
- For asking management to report on or review Mexican operations
- Against asking management to adopt standards for Mexican operations
- Against asking management to review or implement the MacBride principles
- Against asking the company to encourage its contractors and franchisees to implement the MacBride principles
- For asking management to report on or review its global labor practices or those of its contractors, except against if the company already reports publicly using a recognized standard or if the resolution asks for more than a report
- Against asking management to adopt, implement, or enforce a global workplace code of conduct based on the International Labor Organization's core labor conventions
- For requesting reports on sustainability, except against if the company has already issued a report in GRI format
